Radiation Dose from Adult and Pediatric Multidetector Computed Tomography D. Tack,Pierre Alain Gevenois,2007-12-31 Because of the radiation dose delivered multidetector row CT MDCT may induce cancers and the risk of death has been estimated at up to one per 1 000 examinations Despite this only a small proportion of referring clinicians radiologists and technologists are aware of both the radiation risks and their underlying mechanisms This book is designed to rectify this

situation The first part of the book provides a comprehensive approach to all the factors that influence the radiation dose and subsequently the risk induced by using MDCT in children and adult patients In the second part guidelines are proposed for optimization of the radiation dose in order to obtain an image quality sufficient for appropriate diagnostic performance while restricting the dose delivered This book written by experts of international standing will appeal to both general and specialized radiologists including pediatric radiologists CT technologists physicists manufacturers and all professionals involved in MDCT Pediatric PET Imaging Martin Charron,2006-04-19 The technique for successfully completing a PET procedure is complex and involves a knowledge of physics pharmacy anatomy physiology and the disease process applying PET scanning to children is even more challenging and technically demanding One cannot simply adopt the approach used for adults but instead must receive specialized training in order to master pediatric PET procedures This one of a kind interdisciplinary book is one of the first practical guides to imaging children with PET The text opens with a section that focuses on practical and technical issues of pediatric PET imaging including radiation dose and sedation Principles of operation instrumentation and nuclear medicine regulations are also discussed Subsequent sections cover the clinical applications of PET in pediatrics With contributions from leading international authorities in the field each chapter is heavily illustrated and provides the reader with extensive coverage of the essentials of clinical PET studies in oncology and neurology which stand out as key areas for PET imaging in pediatrics *Hormesis With Ionizing Radiation* T.
