Beauty in Context Wilfried van Damme, 2021-11-01 This is the first study to survey the field of the anthropology of aesthetics which during the last few decades has emerged on the cross roads between anthropology and non Western art scholarship While critically examining the available literature thereby addressing such basic issues as the existence of aesthetic universals the author elaborates on a central thesis which concerns the relationship between aesthetic preference and sociocultural ideals Drawing on empirical data from several African cultures he demonstrates that varying notions of beauty are inspired by varying sociocultural ideals thus shedding light on the phenomenon of cultural relativism in aesthetic preference Emphasizing unity within diversity the systematic anthropological approach offered in this volume invites the reader to reconsider aesthetic preference from an empirical cross cultural and contextual perspective

Global Issues and Comparative Education Wendy Bignold, Liz Gayton, 2009-06-30 Almost every Education Studies degree includes an element of comparative education and this book provides an accessible undergraduate level introduction to the theme It begins by defining what is meant by the term comparative education and examines the

Beyond the Visible and the Material Laura M. Rival, Neil L. Whitehead, 2001 The contributors to this volume explore the legacy of Peter Rivi re recently retired Professor of Social Anthropology University of Oxford in the development of the anthropology of Amazonia This international group of leading specialists contributes to the substantial and growing body of Amazonian ethnography discussing topics which include kinship and genealogy the village as a unit of ethnographic observation and analysis the human body in political and social processes and gender relationships as aspects of political cosmological thinking In addition the ethnology of the Guianas receives particular emphasis as do the themes of shamanism history and colonialism as they have affected this region In showing how alive the field of Amazonian anthropology has become whilst pointing to conceptual aspects in need of further elaboration the contributors demonstrate their shared conviction that the impact of Amazonian ethnology is becoming comparable to that of African ethnology in the 1950s and Melanesian ethnology in the 1980s *African Anthropologies* Mwenda Ntarangwi, David Mills, Mustafa H. Babiker, 2006-05 Publisher Description **The Wheel of Autonomy** Felix Girke, 2018-08-17 How do the Kara a small population residing on the eastern bank of the Omo River in southern Ethiopia manage to be neither annexed nor exterminated by any of the larger groups that surround them Through the theoretical lens of rhetoric this book offers an interactionalist analysis of how the Kara negotiate ethnic and non ethnic differences among themselves the relations with their various neighbors and eventually their integration in the Ethiopian state The model of the Wheel of Autonomy captures the interplay of distinction agency and autonomy that drives these dynamics and offers an innovative perspective on social relations *Ethnosymbolism and the Dynamics of Identity* Liu Mingxin, Elya Tzaneva, 2015-10-13 This book is an exploration of the potential of the ethnosymbolic approach to nation and identity to act as an instrumental tool for research into the mechanisms of identity building Using insights and data from Bulgarian history and culture it views the construction of Bulgarian national identity as a modern process intimately affected by circumstances which prevailed in nineteenth century Bulgarian society and also as a process which for its structural and psychological prerequisites drew upon and reworked various specific features and peculiarities of an available but always malleable and never fixed Bulgarian ethnic and cultural tradition The development of Bulgarian national identity drew in combination or mutual interaction upon two main sources namely a process of articulating systematising and rationalising ideas of group commonality and ethnic distinctiveness and the mobilising and politicising effect of modern economic and political forces upon that intersubjective process The overall means of national identity construction in all its complexity was achieved as a symbiosis between the historical continuity of a collective ethnic inheritance and the modern dynamics of its political activation and mobilisation The book combines

diachronically the ideas and logic of social evolution with a synchronic approach that draws upon the so called instrumentalist view of ethnic phenomena It explores the cultural landscape of available ethnic notions and terms that were utilised as expressions of Bulgarian ethnic identity but which also in that process reshaped all this in response to the changing conditions of Bulgarian society in the nineteenth century As such the book offers an in depth investigation of how ideas of national identity were formed and changed within a modernist framework Furthermore it shows how ethnosymbolism used as a tool and instrumentarium for national identity construction can reveal the main patterns that contribute to what is defined as a discursive construction of identity dynamics **Essays on and around Dancing** Riitta Parvia,2024-03-21 Essays on and around Dancing centers on dance education clinical dance therapy and dance ritual

Language and Learning in the International University Bent Preisler,Ida Klitgård,Anne Fabricius,2011-07-18 This book views the international university as a microcosm of a world where internationalization does not equate with across the board use of English but rather with the practice of linguistic and cultural diversity even in the face of Anglophone dominance The globalization localization continuum manifests itself in every university trying to adopt internationalization strategies The many cases of language and learning issues presented in this book from universities representing different parts of the world are all manifestations of a multidimensional space encompassing local vs global diversification vs Anglicization The internationalization of universities represents a new cultural and linguistic hybridity with the potential to develop new forms of identities unfettered by traditional us and them binary thinking and a new open mindedness about the roles of self and others resulting in new patterns of communicative educational and social practices *Archetype & Sapientosophy* Augustin Ostace,2018-09-24 Could one know the totality ancestors of our Species Sapiens as accumulated experiences through Sapiens itself coming from Genus Homo Hominid Family Order Primate Class Mammals Phylum Vertebrata Kingdom Animals More than sure the answer is not just by taking into account that this chain of evolution has an average age of ca about 500 millions years of different eras and periods and the unnumerable ascendant species or genus or families had been already in extinct phase of paleontology of the earth But through a theoretical process of the psychoanalytic introversion into upright posture of the Hominid Family Genus Homo and Species Sapiens it is tried a confrontation not only with the supposed subconscious of this triad bipedic ancestor of present human but a re sensing of myth o poiesis enchainned into the three interrelated evolutionary groups perhaps the main responsible for our qualities for our fragilities for our vulnerabilities and for our creativities This metaphor for a Species individuation with a huge emptiness around us united in contraries transcending ourselves towards unknown resembles a creative pathology in written into human who is the carrier of duality consciousness sub consciousness which is the mirror into which the cosmos and the nature are seen reflected Anthrope Sapientosophist *The Pax Assyriaca: The Historical Evolution of Civilisations and Archaeology of Empires* Benjamin Toro,2022-02-24 This study of the evolutionary process of ancient civilisations stresses the

complementarity between theoretical principles and the relevant historical and archaeological evidence Taking its approach from World Systems Theory it focuses on the origin development and collapse of the first Near Eastern stage of the Central Civilisation *Reflexive Ethnography* Charlotte Aull Davies,2012-10-02 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company **Tourism, Tradition and Culture** David Harrison,2020-11-18 David Harrison has contributed to the academic study of tourism over the last 30 years This book brings together a collection of his published material that reflects the role played by tourism in development both in societies emerging from Western colonialism and in societies previously part of the Soviet system The overarching theme looks at how promoted as a tool for development tourism can lead to conflict between competing elites but can also empower groups previously subject to constraint by traditional authorities Tradition is intensely manipulatable and always reflects power relations Such pressure on tradition is but one aspect of tourism s wider social impacts This includes changes in economic and social structure which for many constitute social problems that need to be addressed At the same time sustainability though apparently a worthy aim can be a problematic concept especially when applied to traditional cultures and may conflict with such ideals as egalitarianism

Tourism and Social Identities Peter M. Burns, Marina Novelli,2006-08-14 The making and consuming of tourism takes place within a complex social milieu with competing actors drawing into the product peoples history culture and lifestyles Culture and people thus become part of the tourism product The implications are not fully understood though the literature ranges the arguments along a continuum with culture being described on one hand as vulnerable and fixed waiting to be impacted by tourism and on the other being seen as vibrant and perfectly well capable of dealing with globalization and modernity trends Some of the answers are likely to focus around ideas of social identities The intention of this book is to make a contribution to the theoretical framework of tourism through a series of international case studies The overall purpose of the edited book is to assemble a series of essays enabling the dissemination of ideas on the critical discourse of tourism and tourists as they relate to social and cultural identities **The Workshop for Morality** Dindin
