

Features of Macroeconomics

- ❖ It is the study of the economy in totality.
- ❖ It uses lumping method for the purpose of economic study. Under lumping method the general price level is studied, and not prices of individual products.
- ❖ It concerns with the behavior of aggregates.
- ❖ It is a general equilibrium analysis in which everything depends on everything else. For instance, a change in income level may results in change in savings, which in turn influence investment.
- ❖ Macroeconomics is the obverse of microeconomics.
- ❖ Therefore it deals with total or aggregates national income output and employment, total consumption, saving and investment and the general price level.
- ❖ A bird's eye view to entire economy

Macroeconomics Merton H. Miller, Charles W. Upton, 1986-10-15 Miller and Upton is by far the most cited macroeconomics text in front line academic research journals over the last ten years It has become a contemporary classic Roger C Kormendi University of Michigan The most innovative approach to introducing macroeconomics that I have seen A classic in the sense that every serious student of macroeconomics is likely to want it in his or her library John P Gould University of Chicago The task the authors set out to perform is ambitious to write a macroeconomics textbook structured around a neoclassical growth model And in this task they have succeeded Clifford W Smith Jr Journal of Finance This is a superb book As a vehicle for teaching economics I have to place it right behind Henderson and Quant Microeconomics and Dorfman Samuelson and Solow Linear Programming Moreover it is an exciting book both to read and to think about It is not just that these authors have something to say but their way of saying it is generally superior F E Banks Kyklos

An Introduction to Computational Macroeconomics Anelí Bongers, Trinidad Gómez, José L.

Torres, 2020-09-01. This book presents an introduction to computational macroeconomics using a new approach to the study of dynamic macroeconomic models. It solves a variety of models in discrete time numerically using a Microsoft Excel spreadsheet as a computer tool. The solved models include dynamic macroeconomic models with rational expectations both non microfounded and microfounded, constituting a novel approach that facilitates the learning and use of dynamic general equilibrium models which have now become the principal tool for macroeconomic analysis. Spreadsheets are widely known and relatively easy to use, meaning that the computer skills needed to work with dynamic general equilibrium models are affordable for undergraduate students in Advanced Macroeconomics courses.
