Mad Technology I. Oh, H. Park, S. Yoneyama, H. Kim, 2005-01-07 At the end of the Cold War the global economic system encountered a new phenomenon in the field of knowledge creation and technological innovation the birth of mad technologies This book analyses major changes in the national innovation systems NIS due to the introduction of mad technologies in East Asia The authors find that mad technologies were the cause of stock market crashes and economic uncertainties in the region and conclude that successful corporations use various measures to neutralize mad technologies and or incorporate them into the NIS **Routledge Handbook of Modern Korean History** Michael Seth, 2016-01-29 Beginning in the mid nineteenth century when Korea became entangled in the world of modern imperialism and the old social economic and political order began to change this handbook brings together cutting edge scholarship on major themes in Korean History Contributions by experts in the field cover the Late Choson and Colonial periods Korea's partition and the diverging paths of North and South Korea Topics covered include The division of Korea Religion Competing imperialisms Economic change War and rebellions Nationalism Gender North Korea Under Kim Jong Il Global Korea The Handbook provides a stimulating introduction to the most important themes within the subject area and is an invaluable reference work for any student and researcher of Korean History **Revolution of Innovation Management** Alexander Brem, Eric Viardot, 2017-01-31 This edited volume explores how the rapid development of business model innovation changes innovation management at an international level It discusses the next phases in its development and the impact that this could have on the field The authors identify and examine recent trends which have the potential to disrupt the traditional way of managing innovation notably in terms of creativity product development and process change In line with the constant globalization of innovation the second volume of Revolution of Innovation Management offers a variety of international perspective on these topics with illustrations and analysis coming from Asia America and Europe Guanxi in Contemporary Chinese Business Jane Nolan, Chris Rowley, 2020-12-30 Does guanxi still matter in 21st century Chinese business and management Is it really still a culturally distinct form of social interaction impenetrable by outsiders Or does it simply resemble the countless other elite networks embedded in business and political spheres across the globe This book answers these questions through a combination of new empirical insight and nuanced conceptual development Research examples include investigations of multinational enterprise corporate performance governance structures in Chinese private firms organisational justice in Chinese banks entrepreneurial learning and knowledge acquisition and the gendered and sexualized nature of guanxi in the workplace In terms of firm performance there is still much to be gained by MNE and Chinese firms through cultivating guanxi in different domains including the political sphere at both the local and national level However in terms of employee performance there is evidence that some younger employees have a strong desire to move towards more merit based systems and resent being judged on guanxi connections Similarly some women may find themselves shut out when attempting to

navigate conventional guanxi relationships based on Confucian paternalism In brief these practices may also exclude a large pool of emerging talent This book clearly shows that guanxi is a complex concept that holds a persistent power in Chinese societies To understand it fully we must acknowledge the dynamic nature of both its dark and light sides The chapters in this book were originally published in a special issue of the Asia Pacific Business Review Theory and Practice of the Triple Helix Model in Developing Countries Mohammed Saad,Girma Zawdie,2011-02-25 Theory and Practice of Triple Helix Model in Developing Countries contributes to the expanding literature on triple helix innovation focusing on developing countries The book is based on practical cases and experiences from Africa Latin America and Asia Relevant experiences and best practices from developed countries are also examined The book is presented as a response to the growing awareness about the need for policy shift from the traditional technology transfer practice to a policy position that is capable of providing a sustainable basis for innovation and technological progress in developing countries The book explores the triple helix system of innovation based on the dynamics of the interactive relationships between government industry and universities in the creation dissemination and sharing of knowledge in developing countries A major point addressed by the book is the extent to which the triple helix system of relationships between university industry and government can enhance the effectiveness of universities in developing countries as agents of innovation industrialization and sustainable development **Evolution of Innovation Management** A. Brem,E. Viardot,2013-01-30 Uses new approaches and solutions to tackle innovations in an international context Some of the challenges of innovating are remarkably consistent and recent times have shown the emergence of new ways for stimulating and managing the innovation process The authors explore these new routes and assess their value for markets and companies **Korean Studies Forum** ,2008 The British National Bibliography Arthur James Wells,2005 □□□□□□□□□□ □□□,□□□□,□□□□,2005-11 **Bulletin of the Atomic Scientists** ,1993-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Bulletin of the Atomic Scientists** ,1970-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Cyberspace in Peace and War, Second Edition** Martin Libicki,2021-09-15 This updated and expanded edition of Cyberspace in Peace and War by Martin C Libicki presents a comprehensive understanding of cybersecurity cyberwar and cyber terrorism From basic concepts to advanced principles Libicki examines the sources and consequences of system compromises addresses strategic aspects of cyberwar and defines cybersecurity in the context of military operations while highlighting unique aspects of the digital battleground and strategic uses of cyberwar This new edition provides updated analysis on cyberespionage including the enigmatic behavior of Russian actors making this volume a timely and necessary addition to the cyber practitioner s library Cyberspace in Peace and War
