*The art of experimental natural history* Dana Jalobeanu, 2015 Francis Bacon introduced his contemporaries to a new way of investigating nature. He called it natural and experimental history. Despite its rather traditional name, Bacon's natural and experimental history was a new discipline; it comprised new ideas, new practices, and new models of collaborative research. This new discipline was in many ways a surprisingly successful project. It provided early modern naturalists with tools, methods, and models for both investigating nature and writing about their subject. It also offered a set of norms and values for guiding research. And yet this new discipline was not a science of nature; it was more like an art. This book aims to trace the emergence, evolution, and reception of Francis Bacon's art of experimental natural history.      *Sálvora* Julio

Vilches, 2017-11-01 Julio Vilches es un valenciano que a finales de los años sesenta llegó a la isla de S'lvora, reserva natural de las R'as Baixas para hacerse cargo del faro que acompaña a los barcos que se adentran en la r'a de Arousa. Allí descubrió un mundo de libertad e imaginación inagotable tras cuarenta años de franquismo. Porque los quehaceres en el faro dejan también tiempo para disfrutar la maravilla de la vida, fiestas de solsticio a la luz de hogueras, amores y amigos en abundancia, o una emisora de radio con la que cada noche Julio y otros fareros amenizan el tránsito de barcos mercantes y planeadoras de narcotraficantes. S'lvora es refugio seguro de naufragos y piratas modernos, pescadores furtivos y turistas extraviados. Y es ante todo un gran canto a la vida libre.      El susurro de las estrellas Irma Gallo, 2023-12-21 Alicia vive en una vieja casa destastada y llena de secretos; el más grande de todos es la extraña desaparición de su mamá. Abu le cuenta que un día salió a trabajar y no regresó. Alicia busca la manera de sobrevivir a esa ausencia y mantener el buen ánimo en compañía de su mejor amiga Cele, quien la anima a investigar el paradero de su madre. Abu parece tener mucho que contar, tanto como los documentos y diarios arrumbados en el cuarto de los trebejos. Encontrar la verdad no será sencillo, pero aceptarla y vivir con ella será todavía más desafiante.      **Tratado De Quirosología** Ernesto Issberner Haldane, 1988      The Road from

Ouspensky,1969      **A History of Magic and Experimental Science: The seventeenth century** Lynn Thorndike,1958 A history of science and magic spanning the period from early Christianity through early modern Europe to the end of the 17th century      **Jesuit Science and the End of Nature's Secrets** Mark A. Waddell,2016-03-09 Jesuit Science and the End of Nature's Secrets explores how several prominent Jesuit naturalists including Niccolò Cabeo Athanasius Kircher and Gaspar Schott tackled the problem of occult or insensible causation in the seventeenth century The search for hidden causes lay at the heart of the early modern study of nature and included phenomena such as the activity of the magnet the marvelous powers ascribed to certain animals and plants and the hidden destructive forces churning in the depths of the Earth While this was a project embraced by most early modern naturalists however the book demonstrates that the Jesuits were uniquely suited to the study of nature's hidden secrets because of the complex methods of contemplation and meditation enshrined at the core of their spirituality Divided into six chapters the work documents how particular Jesuits sought to reveal and expose nature's myriad secrets through an innovative blending of technology imagery and experiment Moving beyond the conventional Aristotelianism mandated by the Society of Jesus they set forth a vision of the world that made manifest the works of God as Creator no matter how deeply hidden those works were The book thus not only presents a narrative that challenges present day assumptions about the role played by Catholic religious communities in the formation of modern science but also captures the exuberance and inventiveness of the early modern study of nature      **A History of Magic and Experimental Science: & 8.
