Lens,2017-07-24 This book covers the principles underlying mechanisms thermodynamic functions kinetics and modeling aspects of sustainable technologies particularly from the standpoint of applying physical chemical and biological processes for the treatment of wastewater polluted with heavy metals Particular emphasis has been given to technologies that are based on adsorption electro coagulation bio precipitation bio solubilization phytoremediation and microbial electrolysis Metal contamination in the environment is one of the persisting global issues

The adverse health effects of heavy metals on human beings and its impact on the environment has been well documented. Several physico-chemical and biological technologies have been successfully implemented to prevent and control the discharge of industrial heavy metal emissions. On the contrary, metal resource depletion has also accelerated dramatically during the 20th century due to rapid advances in industrial engineering and medical sciences which requires large amount of raw materials. To meet the global metal demand in recent years novel research lines have started to focus on the recovery of metals from metal contaminated waste streams. In order to conflate both metal removal and recovery new technologies have been successfully tested both at the lab and pilot scale. The target audience of this book primarily comprises of research experts practicing engineers in the field of environmental chemical technology and graduate students. Knowledge and Technology Integration in Production and Services Vladimír Marík, Luis M. Camarinha-Matos, Hamideh Afsarmanesh, 2013-06-05. Knowledge and Technology Integration in Production and Services presents novel application scenarios for balanced distributed and integrated systems based on knowledge and up to date technology and provides a great opportunity for discussion of concepts, models, methodologies, technological developments, case studies, new research ideas and other results among specialists. It comprises the proceedings of the Fifth International Conference on Information Technology for BALANCED AUTOMATION SYSTEMS in Manufacturing and Services BASYS 02 which was sponsored by the International Federation for Information Processing IFIP and held in September 2002 in Cancun, Mexico.
