*Manufacturing Resource Planning* Oliver W. Wight,1984      MRP II John Toomey,1996-06-30 MRP II explores the principles of MRP II systems and how the manufacturer can utilize and institute them effectively for maximum profit The book will serve as a valuable professional reference for manufacturers instituting or utilizing an MRP II scheduling system It will also be a valuable teaching tool for the 2 and 4 year college or university programs a reference for APICS certification review and continuing education programs There are examples throughout as well as extensive end of chapter case studies and their solutions A glossary of terms is also included      *Manufacturing Resource Planning (MRP II)* Khalid Sheikh,2003 MRP is a manufacturing related activity concerned with managing the materials required to produce products This guide aims to provide a thorough knowledge of the basics of manufacturing planning systems      **Beyond Manufacturing Resource Planning (MRP II)** Andreas Drexl,Alf Kimms,2013-11-11 The logic of Manufacturing Resource Planning MRP II is implemented in most commercial production planning software tools and is commonly accepted by practitioners However these people are not satisfied with production planning and complain about long lead times high work in process and backlogging As many researchers have pointed out the reason for these shortcomings is inherent to the methods that are used The research community is thus eager to find more sophisticated approaches This book is an attempt to compile some state of the art work in the field of production planning research It includes material that somehow dominates the existing MRP II concept 15 articles written by 36 authors from 10 countries cover many aspects related to MRP II All papers went through a single blind refereeing process before they were selected for being published in this book When we received papers for this issue we discovered that MRP II is a topic about which not only management scientists show interest As the list of authors proves industrial engineers computer scientists and operations researchers from academia as well as practitioners have contributed to this book This we hope makes the book of value for a broad audience We thank all authors who submitted papers And we are indebted to Dr Werner Muller from Springer for his support in this book project
