Reading Contemporary African American Literature Beauty Bragg, 2014-11-12 Reading Contemporary African American Literature focuses on the subject of contemporary African

American popular fiction by women Bragg's study addresses why such work should be the subject of scholarly examination describes the events and attitudes which account for the critical neglect of this body of work and models a critical approach to such narratives that demonstrates the distinctive ways in which this literature captures the complexities of post civil rights era black experiences In making her arguments regarding the value of popular writing Bragg argues that black women's popular fiction foregrounds gender in ways that are frequently missing from other modes of narrative production They exhibit a responsiveness and timeliness to the shifting social terrain which is reflected in the rapidly shifting styles and themes which characterize popular fiction In doing so they extend the historical function of African American literature by continuing to engage the black body as a symbol of political meaning in the social context of the United States In popular literature Beauty Bragg locates a space from which black women engage a variety of public discourses

Impermanent Blackness Korey Garibaldi,2025-02-04 Revisiting an almost forgotten American interracial literary culture that advanced racial pluralism in the decades before the 1960s In Impermanent Blackness Korey Garibaldi explores interracial collaborations in American commercial publishing authors agents and publishers who forged partnerships across racial lines from the 1910s to the 1960s Garibaldi shows how aspiring and established Black authors and editors worked closely with white interlocutors to achieve publishing success often challenging stereotypes and advancing racial pluralism in the process Impermanent Blackness explores the complex nature of this almost forgotten period of interracial publishing by examining key developments including the mainstream success of African American authors in the 1930s and 1940s the emergence of multiracial children s literature postwar tensions between supporters of racial cosmopolitanism and of Negro literature and the impact of the Civil Rights and Black Power movements on the legacy of interracial literary culture By the end of the 1960s some literary figures once celebrated for pushing the boundaries of what Black writing could be including the anthologist W S Braithwaite the bestselling novelist Frank Yerby the memoirist Juanita Harrison and others were forgotten or criticized as too white And yet Garibaldi argues these figures at once dreamers and pragmatists have much to teach us about building an inclusive society Revisiting their work from a contemporary perspective Garibaldi breaks new ground in the cultural history of race in the United States

offers a holistic and culturally relevant approach to literacy education and is essential reading for anyone with an interest in the literacy practices of African American students *Making the American Century* Bruce J. Schulman, 2014-02-03 The twentieth century has been popularly seen as the American Century a long period in which the United States had amassed the economic resources the political and military strength and the moral prestige to assume global leadership By century's end the trajectory of American politics the sense of ever waxing federal power and the nation's place in the world seemed less assured Americans of many stripes came to contest the standard narratives of nation building and international hegemony charted by generations of historians In this volume a group of distinguished U.S. historians confronts the teleological view of the inexorable transformation of the United States into a modern nation The contributors analyze a host of ways in which local places were drawn into a wider polity and culture while at the same time revealing how national and international structures and ideas created new kinds of local movements and local energies Rather than seeing the century as a series of conflicts between liberalism and conservatism they illustrate the ways in which each of these political forces shaped its efforts over the other's cumulative achievements accommodating to shifts in government social mores and popular culture They demonstrate that international connections have transformed domestic life in myriad ways and in turn that the American presence in the world has been shaped by its distinctive domestic political culture Finally they break down boundaries between the public and private sectors showcasing the government's role in private life and how private organizations influenced national politics Revisiting and revising many of the chestnuts of American political history this volume challenges received wisdom about the twentieth century American experience **Reading Culture** Diana George, 2001 **Thomas King** Eva Gruber, 2012 Thomas King is one of North America's foremost Native writers best known for his novels including *Green Grass Running Water* for the Dreadful Water mysteries and for collections of short stories such as *One Good Story That One* and *A Short History of Indians in Canada* But King is also a poet a literary and cultural critic and a noted filmmaker photographer and scriptwriter and performer for radio His career and oeuvre have been validated by literary awards and by the inclusion of his writing in college and university curricula Critical responses to King's work have been abundant yet most of this criticism consists of journal articles and to date only one book-length study of his work exists *Thomas King Works and Impact* fills this gap by providing an up-to-date comprehensive overview of all major aspects of King's oeuvre as well as its reception and influence It brings together expert scholars to discuss King's role in and impact on Native literature and its processes of canonization and to offer in-depth analyses of his multifaceted body of work The volume will be of interest to students and scholars of literature English and Native American studies and to King aficionados

White Scholars/African American Texts Lisa Long, 2005-09-02 What makes someone an authority What makes one person's knowledge more credible than another's In the ongoing debates over racial authenticity some attest that we can know each other's experiences simply because we are all human while others assume a more skeptical stance insisting that

racial differences create unbridgeable gaps in knowledge Bringing new perspectives to these perennial debates the essays in this collection explore the many difficulties created by the fact that white scholars greatly outnumber black scholars in the study and teaching of African American literature Contributors including some of the most prominent theorists in the field as well as younger scholars examine who is speaking what is being spoken and what is not and why framing African American literature in terms of an exclusive black white racial divide is problematic and limiting In highlighting the whiteness of some African Americanists the collection does not imply that the teaching or understanding of black literature by white scholars is definitively impossible Indeed such work is not only possible but imperative Instead the essays aim to open a much needed public conversation about the real and pressing challenges that white scholars face in this type of work as well as the implications of how these challenges are met
