The Many Faces of Tolerance Ewa A. The Many Faces of Development Nieuwenhuijze, 2023-07-31

The Many Faces of Faith Michael Taylor, 2009-12-02 Faith is one of the most critical aspects of the Christian life because it is the means by which we receive all that God has secured for us yet the nature of faith is one of the most misunderstood concepts of Christianity Some conceptualize faith as some mental state that one must reach before they are able to tap into God s resources Others view faith as some sort of incorporeal substance that is out there for which we must reach All of these concepts of faith are deficient if not heretical and yet all of them are found in the church Others view faith as a mere fantasy or hope with no basis in reality and thus religious claims are excluded from the arena of knowledge For a number of years my heart has been trilled over the doctrine of faith as it is received and taught

among evangelical Christians everywhere Great emphasis is laid upon faith in orthodox circles and that is good but still I am troubled Specifically my fear is that the modern conception of faith is not the biblical one that when the teachers of our day use the word they do not mean what Bible meant when they used it I also share the same concerns with A W Tozer when he said the cause of my uneasiness are these 1 The lack of spiritual fruits in the lives of so many who claim to have faith 2 The rarity of a radical change in the conduct and general outlook of persons professing their new faith in Christ as their personal Savior 3 The failure of our teachers to define or even describe the thing to which the word faith is supposed to refer 4 The heartbreaking failure of multitudes of seekers is they are even so earnest to make anything out of the doctrine or to receive any satisfying experience through it 5 The real danger that a doctrine that is parroted so widely and received so uncritically by so many is false as understood by them 6 I have seen faith put forward as an escape from reality a refuge from the necessity of hard thinking a hiding place for weak character natural optimism emotional thrills and nervous tics Therefore in the pages of this book I will endeavor to outline for your benefit the dynamics of faith What is faith How does faith work How to grow in faith The power of faith the Excellency of faith the demand of faith the perseverance of faith the challenges of faith the object of faith the effect of faith the response of faith the discipline of faith the necessity of faith and many more are discussed

The Many Faces of Social Attention Aina Puce, Bennett I. Bertenthal, 2015-09-09 social neuroscience social psychology developmental psychology social cognition vision research and clinical psychology social neuroscience social psychology developmental psychology sThis comprehensive volume reviews current developments in our evolving knowledge of social attention and its processes In doing so it examines the brain behavioral bases of social attention from diverse complementary fields including disordered and healthy adult findings infant and developmental studies and social neuroscience The studies explored in this volume reflect the ongoing shift toward naturalistic context based experiments and integrative scientific approaches and away from relying solely on standardized tasks in laboratory settings In keeping with this proactive perspective the authors pose critical questions throughout the book to point readers toward the potential next wave of research developments and interventions Included in the coverage The development of social attention in human infants Neural bases for social attention in healthy humans Social attention social presence and the dual function of gaze Early departures from normative processes of social engagement in infants with Autism Spectrum Disorder Aberrant social attention and its underlying neural correlates in adults with ASD The future of social attention research The Many Faces of Social Attention will interest researchers in social neuroscience social psychology developmental psychology social cognition visual attention and cognition and clinical psychology and inspire new advances in this increasingly important area of study ocial cognition vision research and clinical psychology *Aging and Time* Jan Baars, Henk Visser, 2020-11-25 The aim of this volume is to revitalise the debate about the concepts of time implicit in the study of aging The many problems related to aging and the aged put an enormous pressure on the gerontological community to come up with practical applications and

solutions In considering research findings we must keep in mind the basic assumptions that shape and influence even the most obvious statements about aging In this multidisciplinary volume the contributors take on the important task of exploring real issues concerning temporal concepts and approaches to aging and the concepts of time that are used in thinking about aging determine to a large extent the way aging is approached Most studies of aging still use a chronological approach to define populations for research purposes that is to determine which aged should be studied and to establish how people s characteristics social economic health and so forth change as a function of age This approach may lead to an accumulation of data but does not in itself lead to explanatory knowledge The step from chronological time to chronological age should be taken cautiously if we want to consider aging processes seriously especially because chronological age is widely used in contemporary societies as a basis for regulating all kinds of processes with many consequences for individuals The arguments presented here do not deny the finitude of human life nor do they deny that aging can be observed in any individual if we compare the characteristics of that person over a relatively long period The question is how to approach these themes to get a better understanding To achieve this we need to understand the specific significance and relativity of chronological time and uncover unfounded deductions about time in relation to aging This book will be of interested to students and professors of the social sciences humanities and aging including the methodology of aging studies professionals working in the field of aging including sociologists psychologists and biologists

The Different Faces of Motherhood
 Beverly Birns,Dale Hay,2013-06-29 The Different Faces of Motherhood began during a conversation between the two editors developmental psychologists who have spent our professional careers working with infants and very young children We are well aware of the importance of infants to their mothers and of mothers to their infants However we were particularly aware of the fact that whereas our knowledge about infants increases exponentially each decade our assumptions about mothers change relatively little We were concerned about the theories that underlie the advice given to mothers and also about the assumption that mothers appear to be generic More and more we have learned about individual differences in babies but not more and more about individual differences in mothers Our second concern has been to expand our knowledge about mothers Our assumptions were few and our questions were many We believed that the experience of women would vary greatly both in outlook and in behavior depending on each woman s age marital status financial status ethnicity health education and work experience as well as a woman s own experience in her family origin and her relationship to her husband If we are to understand child development and believe that the early years are important in a child s life then it seems critical to examine our beliefs about mothers If we are to understand human development then being a mother is surely an important area of inquiry

Many Faces, One Church Peter C. Phan, Diana L. Hayes, 2005. *Many Faces, One Church* captures and facilitates a seismic shift in the who, what, where, when, why, and how of Catholic theology today. Along with a diverse group of theologians who represent the many faces of the church, editors Peter C. Phan and Diana Hayes recast the story of the church in America by including immigrant groups either forgotten or ignored and in light of these new and not so new voices, retooling the theological framework of Catholicism itself. That the American Catholic Church is an immigrant church is not news. What is news, however, is how diverse the immigrant church really is and how much work there is to be done to include their voices in theological discourse and training. Beyond the German and Irish immigrants, what of other European immigrant groups such as the Italians, Poles, Lithuanians, Czechs, Slovaks, and Eastern rite Catholics? Where are the stories of the older presence of native Mexican, Native American, and African American Catholics in this country? And more recently of Asian American Catholics, especially the Chinese, the Japanese, and the Filipinos of the nineteenth and early twentieth century? And more recently still, Catholic immigrants have come from El Salvador, Guatemala, Vietnam, Cambodia, Korea, India, and the Pacific Islands. What impact are these immigrants having on American society and religious groups? *Many Faces, One Church* is a profound attempt to address these key questions and their implications for the Catholic way of being, church, worshipping, and practicing theology. The result of three years of conferences sponsored by Elms College exploring the new faces of the American Catholic Church, this thoughtful collection highlights opportunities and challenges lying ahead as the American Church tries to respond to the continuing presence of new immigrants in its midst. *Many Faces, One Church* is a beginning of a long but exciting journey in which the strangers welcome.

The Many Faces of Subud Riantee Lydia Rand, 2005-04-18. *Subud* is a direct and spontaneous spiritual experience that allows people to receive a contact with the Great Life Force.
