The Portable MLIS Ken Haycock, Mary-Jo Romaniuk, 2017-12-07 In this update of the ideal introduction to the library profession the core competencies of professional librarians are presented in 14 essays supplemented with foundational principles and context. The original edition of this book gained popularity as a required work for LIS because it uniquely provided a broad accessible overview of the core curricular areas and foundations for the library profession. What distinguishes the book as an introduction to the work of professional librarians is that it is not just about information in context or about libraries and their mission. Importantly it also covers the required competencies of professional librarians laying a firm foundation for future courses. In this second edition each chapter has been revised and updated to take into account current thinking and references. As with the first edition the book is organized around the foundations of the

profession and key functional areas Questions such as how to think like a librarian and how to facilitate community development are specifically and explicitly addressed In compiling the book the editors sought out the leading thinkers educators and practitioners in each core area as chapter authors Each of the contributors provides an introduction to the knowledge skills and abilities associated with their respective area of expertise discusses current and emerging applications and explores trends and issues

Hoover's Handbook of American Business Hoovers Inc,2006-12 Globalisation, New and Emerging Technologies, and Sustainable Development Jesper Lindgaard Christensen,Birgitte Gregersen,Jacob Rubæk Holm,Edward Lorenz,2021-05-03 This book explores the capacity of the Danish innovation system to respond to key societal challenges including the green imperative of achieving growth with environmental sustainability and the need to adapt to new and possibly disruptive changes in technology often referred to as the Fourth Industrial Revolution The book is divided into four main parts The first describes the evolving characteristics of the Danish system of research and innovation with special attention to the role of policy at the national and regional levels The second part focuses on interorganisational relations including the position of Danish firms in national and global value chains The third part examines changes in labour markets and in the educational and training system and it considers the impact of new technologies including robotics and artificial intelligence on employment and skills The fourth part turns to issues of climate change and environmental sustainability including an assessment of the Danish economy's success in meeting the challenges of the UN Sustainable Development Goals The book will be of particular interest to small countries of which the Danish innovation system is representative but it also appeals more broadly to an audience interested in innovation systems and policies to support economic development

The Three Levels of Sustainability Elena Cavagnaro,George H. Curiel,2017-09-08 This book aims to provide the missing link in current debates around sustainability The role of business governments NGOS and multilateral institutions are widely covered and many books discuss their possible actions strategies and roles But all of these organizations are made up of individuals And it is individuals who will need to steer society and organizations toward a more just and equitable world The book takes a holistic approach to sustainable development The authors argue that this approach starts and ends with the human being They believe that the personal dimension of sustainable development has been neglected and that it is clear that sustainable

societies cannot be achieved without committed individuals who are convinced of the need to be part of the sustainability project. The authors frame their ideas around the Three Levels of Sustainability TLS framework which they argue addresses at least some of the weaknesses inherent in a fragmented approach to sustainability. Their approach encompasses societal, organizational and individual levels and by looking through the lens of how sustainability has evolved, provides a roadmap for producing the kind of leaders necessary for sustainable development in all of its dimensions: people, planet and profit. The focus on how the individual can contribute to these three dimensions is unique. To arrive at this multi-level and multi-dimensional framework, the book introduces and analyzes theories from sustainable development, corporate social responsibility and personal leadership and systemically looks for linkages between them that are useful for sustainability. This framework is placed firmly in its historical context. The authors are highly literate about the development and interpretations of sustainability and bring us to their current position via informed discussions on the history of economics, business and environment, social development, the corporation and the profit principle, CSR and measurement and reporting. The book has been designed as both a text for students as well as those already in management and leadership positions in the private, public or non-profit sectors and will also prove invaluable to those wishing to familiarize themselves with sustainability.

India's Technology-led Development: Managing Transitions To A Digital Future Vipin Gupta, Samir

Chatterjee, Alka Maurya, 2023-05-24. The recent disruptions caused by the COVID-19 pandemic have shaken the fundamental foundations of global business to their core, creating unprecedented challenges for management scholars and practitioners. In addition, over the past few decades, the general adoption of communication technologies and the evolving trends towards digitalization and Industry 4.0 have revolutionized the way organizations are managed and led. Business model innovation and the developing importance of sustainability have also emerged as strategic platforms for all types of organizations. Technology-led managerial transformation has now become critical for 21st century business. This book investigates four approaches in understanding the perspectives for integrating technology with holistic development: a Civilizational Approach which integrates cultural, historical as well as geographical nuances in a way totally different from the Western positivistic models; a Stakeholder Approach which involves moving away from a mere participant or observer role and embracing the Stakeholder role; a Knowledge Partnership Approach which lays the foundations of India's technology-led development through education, training, research and talent management; and a Strategic Development Approach which unlocks the economic growth and wealth creation potential by keying marketing and branding at the ecosystem level.
