**The Future of Third Sector Research** Andrea Bassi, Mario Aquino Alves, Carolyn Cordery, 2024-12-04 The volume discusses the current state of international comparative Third Sector research and potential avenues for future development of the field. Building on seminal work by Helmut Anheier and Lester Salamon, the volume provides necessary updates to ensure further Third Sector research is relevant and impactful due to the changing landscape of international relations and the way that the Third Sector interacts with the state, corporations, and wider civil society to face the new global challenges, environmental, economic, and social. The book is articulated in five sections that are organized to move from theory to definition and classification towards aggregation, measurement, counting, plus one section dedicated to the relationship between Third Sector and faith. The sixth and final section synthesizes the scientific conversation developed in the five previous ones and opens new research paths for the future. Encompassing multi-disciplinary approaches and international points of view, the volume is directed towards graduate students and researchers across the academic spectrum as well as practitioners and policymakers working in the Third Sector. This is an open access book.

Third Sector Policy at the Crossroads Helmut K. Anheier, Jeremy Kendall, 2012-10-02 The nonprofit sector occupies an ever more central role in economic and social policies, from the redesign of welfare systems in the U.S. or UK to fostering democracy in Central and Eastern Europe. At the same time, nonprofit organizations face increased public scrutiny and calls for more efficiency and greater accountability. Against this background, this revealing book explores key policy issues such as: Is the nonprofit sector in crisis? What are the common themes and patterns in current policy debates concerning the future of the nonprofit sector? What policy models are being discussed and what are their implications? How can nonprofit organizations negotiate a course between commercialization and tighter government regulation? As this sector is confronted with often conflicting demands of new public management, tight budgeting, and greater competition, it arrives at a crucial crossroad in its development. Through the detailed investigations presented in this key book, postgraduate students of business and politics can fully explore this significant sector and analyze its position in today's society.

Hybrid Organizations and the Third Sector David Billis, 2010-05-07 Addressing a key social policy problem, this book analyses modern voluntary organisations through the lens of a new theory of hybrid organisations, which is tested and developed in the context of a range of case studies.
