Writing of Space in Early Modern England and Ireland B. Klein, 2001-01-11 Maps make the world visible but they also obscure distort idealize This wide ranging study traces the impact of cartography on the changing cultural meanings of space offering a fresh analysis of the mental and material mapping of early modern England and Ireland Combining cartographic history with critical cultural studies and literary analysis it examines the construction of social and political space in maps in cosmography and geography in historical and political writing and in the literary works of Marlowe Shakespeare Spenser and Drayton **Historian's Guide to Early British Maps** Helen Wallis, Anita McConnell, 1995-04-06 Great Britain and Ireland

enjoy a rich cartographic heritage yet historians have not made full use of early maps in their writings and research This is partly due to a lack of information about exactly which maps are available With the publication of this volume from the Royal Historical Society we now have a comprehensive guide to the early maps of Great Britain The book is divided into two parts part one describes the history and purpose of maps in a series of short essays on the early mapping of the British Isles part two comprises a guide to the collections national and regional Now available from Cambridge University Press this volume provides an essential reference tool for anyone requiring to access maps of the British Isles dating back to the medieval period and beyond **Manors and Maps in Rural England, from the Tenth Century to the Seventeenth** P.D.A.

Harvey, 2023-05-31 P D A Harvey is a historian of medieval rural England with a wide interest in the history of cartography this collection of his essays brings together both these strands It first looks at the English countryside from the 10th century to the 15th investigating problems in particular documents in the village community and in underlying long term changes How landlords drew profits from their property in the eleventh and twelfth centuries how and why there followed changes in the way landed estates were run and in the written records they produced what new light their personal seals can throw on medieval peasants are all among the topics discussed while the local management of large estates and the development of the peasant land market are themes that recur throughout There follow essays on the way maps were brought into the management of landed estates in the 16th and 17th centuries starting with the introduction of consistent scale into mapping

a new concept crucially important in the general history of topographical maps The collection closes by looking at some of the traps that both documents and maps set for the historian of the English countryside **Maps and History** Jeremy Black,2000-01-01 Explores the role development and nature of the atlas and discusses its impact on the presentation of the past The Royal Map Collections of England Helen Wallis,1981 **Maps in Tudor England** Paul D. The King's Two Maps Daniel Birkholz,2004-03-01 While a culture may have a dominant way of mapping its geography is always plural and there is always competition among conceptions of space Beginning with this understanding this book traces the map s early development into an emblem of the state and charts the social and cultural implications of this phenomenon This book chronicles the specific technologies both material and epistemological by which the map shows itself capable of accessing organizing and reorienting a tremendous range of information Dury and Andrews' Map of Hertfordshire Andrew Macnair,Anne Rowe,Tom Williamson,2015-11-30 This book is about the map of an English county Hertfordshire which was published in 1766 by two London mapmakers Andrew Dury and John Andrews For well over two centuries from the time of Elizabeth I to the late 18th century the county was the basic unit for mapping in Britain and the period witnessed several episodes of comprehensive map making The map which forms the subject of this book followed on from a large number of previous maps of the county but was greatly superior to them in terms of quality and detail It was published in a variety of forms in nine sheets with an additional index map over a period of 60 years No other maps of Hertfordshire were produced during the rest of the century but the Board of Ordnance later the Ordnance Survey established in the 1790s began to survey the Hertfordshire area in 1799 publishing the first maps covering the county between 1805 and 1834 The OS came to dominate map making in Britain but of all the maps of Hertfordshire that produced by Dury and Andrews was the first to be surveyed at a sufficiently large scale to really allow those dwelling in the county to visualize their own parish local topography and even their own house and its place in the wider landscape The first section examines the context of the map s production and its place in cartographic history and describes the creation of a new digital version of the map which can be accessed online The second part describes various ways in which this electronic version can be interrogated in order to throw important new light on Hertfordshire s landscape and society both in the middle decades of the eighteenth century when it was produced and in more remote periods The attached DVD contains over a dozen maps which have been derived from the digital version and which illustrate many of the issues discussed in the text as well as related material which should likewise be useful to students of landscape history historical geography and local history

Ships on Maps Richard W. Unger,2010-08-04 Renaissance map makers produced ever more accurate descriptions of geography which were also beautiful works of art They filled the oceans Europeans were exploring with ships and to describe the real ships which were the newest and best products of technology Above all the ships were there to show the European conquest of the seas of the world *Shakespeare's histories and counter-histories* Dermot Cavanagh,Stuart

Hampton-Reeves, Stephen Longstaffe, 2018-07-30 Shakespeare's history plays have always been pivotal to our understanding of his works. This collection renews attention to these crucial plays by exploring official and unofficial versions of the past histories and counter histories in the plays of Shakespeare and his contemporaries. By exploring the diversity of Shakespeare's engagement with history in all its forms, these contributors open up a range of new interpretive possibilities for understanding the way history plays with the past. The book is divided into three sections: Memory and mourning, Counter histories, Identity and performance. In each section, leading theorists, historicists, and performance critics offer fresh perspectives on the key issues that are transforming our understanding of Shakespeare. These include gender and violence, the mapping of Britain, cultural memory, and religion. This collection will appeal to all critically engaged readers of Shakespeare. In particular, it will command wide-ranging interest from undergraduates, postgraduates, academic researchers, and students of early modern theatre history and culture.

Region, Religion and Patronage Richard Dutton, Alison Gail Findlay, Richard Wilson, 2003. This groundbreaking book uses the possibility that Shakespeare began his theatrical career in Lancashire to open up a range of new contexts for reading the plays and introduces readers to the non-metropolitan theater spaces which formed a vital part of early modern dramatic activity. Essays give a detailed picture of the contexts in which the apprentice dramatist would have worked, providing new insights into regional performance, touring theatre, the patronage of the Earls of Derby, and the purpose-built theater at Prescott.

Enclosure Gary Fields, 2017-09-05. Enclosure marshals bold new and persuasive arguments about the ongoing dispossession of Palestinians. Revealing the Israel-Palestine landscape primarily as one of enclosure, geographer Gary Fields sheds fresh light on Israel's actions. He places those actions in historical context in a broad analysis of power and landscapes across the modern world. Examining the process of land grabbing in early modern England, colonial North America, and contemporary Palestine, Enclosure shows how patterns of exclusion and privatization have emerged across time and geography. That the same moral, legal, and cartographic arguments were copied by enclosers of land in very different historical environments challenges Israel's current rationale as being uniquely beleaguered. It also helps readers in the United Kingdom and the United States understand the Israel-Palestine conflict in the context of their own tortured histories. Provided by publisher.

Writing local history John Beckett, 2013-07-19. This fascinating book looks at how local history developed from the antiquarian county studies of the sixteenth century through the growth of professional history in the nineteenth century to the recent past. Concentrating on the past sixty years, it looks at the opening of archive offices, the invigorating influence of family history, the impact of adult education, and other forms of lifelong learning. The author considers the debates generated by academics, including the divergence of views over local and regional issues and the importance of standards set by the Victoria County History (VCH). Also discussed is the fragmentation of the subject. The antiquarian tradition included various subject areas that are now separate disciplines; among them, industrial archaeology, name studies, family landscape, and urban history. This is an authoritative account of how

local history has come to be one of the most popular and productive intellectual pastimes in our modern society Written by a practitioner who has spent more than twenty years teaching local history to undergraduates and M A students as well as lecturing to local history societies John Beckett is currently Director of the VCH A remarkable book that will be of great interest to students and scholars of local history as well as amateur and professional genealogists *England's Insular Imagining* Lorna Hutson,2023-11-09 Our image of England as island nation is the legacy of the Elizabethan literary erasure of Scotland

Excavating the Lost Colony Mystery Eric Klingelhofer,2023-10-18 The fate of Sir Walter Raleigh's 1587 Lost Colony on Roanoke Island has been one of the most enduring mysteries in the history of European settlement in North America For generations writers scholars and others have speculated about the disappearance of more than one hundred colonists whose only obvious clue left behind was the word CROATOAN carved on the palisade of the settlement But in the early 1990s archaeologists at Roanoke opened fresh lines of inquiry and in 2012 the search for evidence gained new momentum when a reexamination of an Elizabethan map revealed a hidden symbol The symbol seemed to indicate the location of a Renaissance style fort some distance from Roanoke Island starting the quest for Site X After leading a team to explore multiple lines of research Eric Klingelhofer here draws together the fullest possible account of what can be known today about the colony The book features authoritative research by historians archaeologists and other experts and it is richly illustrated with maps and photographs including never before seen artifacts recovered in recent excavations While some of the Lost Colony's mysteries may never be solved readers will enjoy this informative and accessible account of efforts to reconstruct events more than four centuries ago Contributors include Peter Barber Phillip Evans James Horn Karen Ordahl Kupperman Nicholas Lucchetti Kim Sloan Beverly Straube and Edward Clay Swindell Published in association with the First Colony Foundation

Masons, Tricksters and Cartographers David Turnbull,2003-09-02 In an eclectic and highly original study Turnbull brings together traditions as diverse as cathedral building Micronesian navigation cartography and turbulence research He argues that all our differing ways of producing knowledge including science are messy spatial and local Every culture has its own ways of assembling local knowledge thereby creating space through the linking of people practices and places The spaces we inhabit and assemblages we work with are not as homogenous and coherent as our modernist perspectives have led us to believe rather they are complex and heterogeneous motleys

The Anthony Roll of Henry VIII's Navy D.M. Loades,2017-09-29 Here for the first time complete in print is the famous pictorial survey of Henry VIII's navy compiled in 1546 by Anthony Anthony a clerk in the ordnance office Originally comprising three rolls of vellum the MS features paintings of each of the king's 58 ships below

which are set details of their guns shot and related equipment Two of the original rolls were allegedly given by Charles II to Samuel Pepys who had them cut to form a volume which is one of the treasures of his library now at Magdalene College Cambridge The other roll remains in the British Library Several of the illustrations have become familiar especially that of the Mary Rose herself already a wreck when Anthony presented his work to the king The present edition re assembles the three parts of the Anthony Roll allowing the document to be seen in its original sequence for the first time in over 300 years The fleet which Henry VIII created is revealed as the king saw it in the last year of his life Because of the unusual format of the MS a complete facsimile is not presented here Anthony s paintings at Magdalene and in the British Library are reproduced in full colour from newly commissioned photographs Adjacent to each ship illustration is the relevant text given in its original spelling In the Introduction Anthony s personal and professional career is set out for the first time and the subsequent history of his MS is revealed as a subject of interest in its own right In order to explore the many facets of this remarkable document a work of art as well as an administrative record the Introduction includes essays by experts in the field of ordnance art history heraldry and fabric and on the oared vessels which were so distinctive a feature of the navy of the time Marine archaeologists from the Mary Rose Trust examine the accuracy of Anthony s representation and inventory of the Mary Rose in the light of the excavation of the ship In the second part of this
