Cold Calling Russell Mardell, 2016-02-18 It was just a phone call Just meaningless words between two strangers It didn't mean anything Still reeling from a break up with the love of his life insurance firm cold caller Ray English has become a bit of a screw up Cynical and withdrawn Ray is aimlessly drifting through life in London However once he is asked to reform his college band for a friend's wedding Ray is soon forced to face up to his old life and the hometown he had tried so hard to turn his back on Anya Belmont is a woman with a secret and a history that continues to shape her life A coffee shop owner in Salisbury Anya is successful yet bored married yet lonely she is also trying to avert a looming mid life crisis Through fate coincidence or just bad timing Ray and Anya's lives begin to change when Ray cold calls Anya and the two strike up a seemingly innocuous phone conversation Against their better judgement their conversation is soon the start of a phone relationship of sorts As the weeks and months pass it grows in frequency and intimacy and a curious almost dependent friendship is born But can there be anything real in just a phone call As circumstances bring these two lonely souls to the same town at the same time both are forced to question the truth of what they have started and the realisation that if they are to move on in their lives they will have to start by facing the ghosts of their past This sharp witted saccharine free love story will appeal to those looking for a modern take on traditional romance including fans of Love Virtually by Daniel Glattauer

Li, D.A.D. Evans, J.B. Murphy, 2016-05-20 The supercontinent cycle hypothesis attributes planetary scale episodic tectonic events to an intrinsic self organizing mode of mantle convection governed by the buoyancy of continental lithosphere that resists subduction during the closure of old ocean basins and the consequent reorganization of mantle convection cells leading to the opening of new ocean basins

Characteristic timescales of the cycle are typically 500 to 700 million years Proposed spatial patterns of cyclicity range from hemispheric introversion to antipodal extroversion to precisely between those end members orthoversion Advances in our understanding can arise from theoretical or numerical modelling primary data acquisition relevant to continental reconstructions and spatiotemporal correlations between plate kinematics geodynamic events and palaeoenvironmental history The palaeogeographic record of supercontinental tectonics on Earth is still under development The contributions in this Special Publication provide snapshots in time of these investigations and indicate that Earth's palaeogeographic record incorporates elements of all three end member spatial patterns Farm Mechanics ...
