## **March Of The Matrons Military Influence On The British Civilian Nursing Profession 19391969:**

An Officer and a Lady Cynthia Toman,2008-05-20 During the Second World War more than 4 000 civilian nurses enlisted as Nursing Sisters a specially created all female officers rank of the Canadian Armed Forces They served in all three armed force branches and all the major theatres of war yet nursing as a form of war work has long been under explored An Officer and a Lady fills that gap Cynthia Toman analyzes how gender war and medical technology intersected to create a legitimate role for women in the masculine environment of the military and explores the incongruous expectations placed on military nurses as officers and ladies

**Nurse Writers of the Great War** Christine Hallett,2016-02-15 This electronic version has been made available under a Creative Commons BY NC ND open access license The First World War was the first total war Its industrial weaponry damaged millions of men and drove whole armies underground into dangerously unhealthy trenches Many were killed Many more suffered terrible life threatening injuries wound infections such as gas gangrene and tetanus exposure to extremes of temperature emotional trauma and systemic disease In an effort to alleviate this suffering tens of thousands of women volunteered to serve as nurses Of these some were experienced professionals while others had undergone only minimal training But regardless of their preparation they would all gain a unique understanding of the conditions of industrial warfare Until recently their contributions both to the saving of lives and to our understanding of warfare have remained largely hidden from view By combining biographical research with textual analysis Nurse writers of the great war opens a window onto their insights into the nature of nursing and the impact of warfare

**One hundred years of wartime nursing practices, 1854-1953** Jane Brooks,Christine Hallett,2015-11-01 This book examines the work that nurses of many differing nations undertook during the Crimean War the Boer War the Spanish Civil War both World Wars and the Korean War It makes an excellent and timely contribution to the growing discipline of nursing wartime work In its exploration of multiple nursing roles during the wars it considers the responsiveness of nursing work as crisis scenarios gave rise to improvisation and the sometimes quite dramatic breaking of practice boundaries The originality of the text lies not only in the breadth of wartime practices considered but also the international scope of both the contributors and the nurses they consider It will therefore appeal to academics and students in the history of nursing and war nursing work and the history of medicine and war from across the globe

*Mental health nursing* Anne Borsay,Pamela Dale,2015-07-01 This book seeks to integrate the history of mental health nursing with the wider history of institutional and community care It develops new research questions by drawing together a concern with exploring the class gender skills and working conditions of practitioners with an assessment of the care regimes staff helped create and patients experiences of them Contributors from a range of disciplines use a variety of source material to examine both continuity and change in the history of care over two centuries The book benefits from a foreword by Mick Carpenter and will appeal to researchers and students interested in all aspects of the history of nursing and the history of care The book is also designed to be accessible to

practitioners and the general reader      *Qualitative Research in Health Care* Christopher Bassett,2006-06-14 This is a comprehensive book with theoretical and practical input for health care researchers exploring the humanistic and individual aspects of health and illness It covers the main qualitative research methods and provides clear concise and well evidenced clinical information for researchers from all disciplines      **Fighting Fit** Kevin Brown,2008-09-01 The twentieth century saw two world wars and many other conflicts characterised by technological change and severity of casualties Medicine has adapted quickly to deal with such challenges and new medical innovations in the military field have had advantages in civil medicine There has thus been interplay between war and medicine that has not only been confined to the armed forces and military medicine but which has impacted on health and medicine for us all These themes will be examined from the Boer War to the dawn of a new century and a war against terror the experiences of individuals as doctors nurses and patients are highlighted with personal sometimes graphic first hand accounts bringing home the realities of medical treatment in wartime

**Who cared for the carers?** Deborah Palmer,2015-11-01 This book compares the histories of psychiatric and voluntary hospital nurses health from the rise of the professional nurse in 1880 to the advent of the National Health Service in 1948 In the process it reveals the ways national ideas about the organisation of nursing impacted on the lives of ordinary nurses It explains why the management of nurses health changed over time and between places and sets these changes within a wider context of social political and economic history Today high rates of sickness absence in the nursing profession attract increasing criticism Nurses took more days off sick in 2011 than private sector employees and most other groups of public sector workers This book argues that the roots of today s problems are embedded in the ways nurses were managed in the late nineteenth and early twentieth centuries It offers insights not only into the history of women s work but also the history of disease and the ways changing scientific knowledge shaped the management of nurses health      March of the Matrons Penny Starns,2000 The accepted view of nursing maintains that nursing evolved by adopting a series of professionalization strategies in order to gain credibility and status This work challenges the professionalization model of nursing history by arguing that nurses frequently turned to militarization rather than professionalization in an effort to raise and protect their status The author argues that the military imposition of an outdated military model on civilian nursing from 1945 onwards was responsible for hindering professional progress and preventing reform      **Current Contents.
