Design Management Robert Jerrard, David Hands, 2013-08-06 Demystifying the design development and management process this outstanding volume includes a series of international case studies and expertly shows how to research design operations and strategies in organizations Regeneration of Abandoned Spaces: A New Design Approach Luciano Crespi, 2024-09-24 Our urban landscapes are filled with leftovers abandoned buildings and unused spaces remnants of industrial decline and societal transformations Regeneration of Abandoned Spaces A New Design Approach investigates how design and architecture can revitalize these neglected areas transforming them into dynamic livable environments This book is organized into three parts each providing a comprehensive framework for addressing this multifaceted challenge Part One explores the dynamic nature of modern living spaces and how interior design can adapt to the fluid lifestyles of contemporary nomads It delves into advanced drawing techniques that capture the intricate complexities of these evolving environments Part Two focuses on the philosophical aspects of design particularly within exhibition design examining how unfinished spaces can evoke deep emotional responses It explores the role of temporary installations in revitalizing urban areas demonstrating how ephemeral interventions can catalyze long term renewal The final section Part Three addresses the concept of unfinished design in architecture showcasing successful projects from around the world It emphasizes the aesthetic and functional benefits of embracing imperfections and repurposing abandoned spaces This part provides practical strategies and inspiring examples illustrating how adaptive reuse and incompleteness can lead to sustainable and inclusive urban regeneration Regeneration of Abandoned Spaces A New Design Approach is an essential resource for professionals urban planners and anyone passionate about urban architecture and renewal Combining theoretical insights with practical guidance it equips readers with the tools and knowledge needed to reimagine and reconstruct our cities fostering a more sustainable and inclusive future **Hertzian Tales** Anthony Dunne, 2008-09-26 How design can improve the quality of our everyday lives by engaging the invisible electromagnetic environment in which we live As our everyday social and cultural experiences are increasingly mediated by electronic products from intelligent toasters to iPods it is the design of these products that shapes our experience of the electrosphere in which we live Designers of electronic products writes Anthony Dunne in Hertzian Tales must begin to think more broadly about the aesthetic role of electronic products in everyday life

Industrial design has the potential to enrich our daily lives to improve the quality of our relationship to the artificial environment of technology and even argues Dunne to be subverted for socially beneficial ends The cultural speculations and conceptual design proposals in *Hertzian Tales* are not utopian visions or blueprints instead they embody a critique of present day practices mixing criticism with optimism Six essays explore design approaches for developing the aesthetic potential of electronic products outside a commercial context considering such topics as the post optimal object and the aesthetics of user unfriendliness and five proposals offer commentary in the form of objects videos and images These include *Electroclimates* animations on an LCD screen that register changes in radio frequency *When Objects Dream* consumer products that dream in electromagnetic waves *Thief of Affection* which steals radio signals from cardiac pacemakers *Tuneable Cities* which uses the car as it drives through overlapping radio environments as an interface of hertzian and physical space and the *Faraday Chair Negative Radio* enclosed in a transparent but radio opaque shield Very little has changed in the world of design since *Hertzian Tales* was first published by the Royal College of Art in 1999 writes Dunne in his preface to this MIT Press edition Design is not engaging with the social cultural and ethical implications of the technologies it makes so sexy and consumable His project and proposals challenge it to do so

Multidisciplinary Aspects of Design Francesca Zanella, Giampiero Bosoni, Elisabetta Di Stefano, Gioia Laura Iannilli, Giovanni Matteucci, Rita Messori, Raffaella Trocchianesi, 2023-12-30 This open access book gathers the contributions from the Design OPEN International Conference held in Parma Italy in May 2022 The conference explored the multidisciplinary aspects of design starting from its dimensions objects design as focused on the object on its functional and symbolic dimension and at the same time on the object as a tool for representing cultures processes the designer's self reflective moment which is focused on the analysis and on the definition of processes in various contexts spanning innovation social engagement reflection on emergencies or forecasting experiences design as a theoretical and practical strategy aimed at facilitating experiential interactions among people people and objects or environments and narratives making history representing through different media archiving narrating and exhibiting design The contributions which were selected by means of a rigorous international peer review process highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists

Buildings for Education Stefano Della Torre, Massimiliano Bocciarelli, Laura Daglio, Raffaella Neri, 2019-12-30 This open access book presents theoretical and practical research relating to the vast publicly financed program for the construction of new schools and the reorganization of existing educational buildings in Italy This transformative process aims to give old buildings a fresh identity to ensure that facilities are compliant with the new educational and teaching models and to improve both energy efficiency and structural safety with respect to seismic activity The book is divided into three sections the first of which focuses on the social role of the school as a civic building that can serve the needs of the community Innovations in both design and construction processes are then analyzed paying special attention to the Building Information Modeling BIM strategy as a tool for the integration of different disciplines The final section is devoted to the built heritage and tools technologies and approaches for the upgrading of existing buildings so that they meet the new regulations on building performance The book will be of interest to all who wish to learn about the latest insights into the challenges posed by and the opportunities afforded by a comprehensive school building and renovation program

Designing the Creative Child Amy F. Ogata, 2013-04-21 The postwar American stereotypes of suburban sameness traditional gender roles and educational conservatism have masked an alternate self image tailor made for the Cold War The creative child an idealized future citizen was the darling of baby boom parents psychologists marketers and designers who saw in the next generation promise that appeared to answer the most pressing worries of the age Designing the Creative Child reveals how a postwar cult of childhood creativity developed and continues to this day Exploring how the idea of children as imaginative and naturally creative was constructed disseminated and consumed in the United States after World War II Amy F Ogata argues that educational toys playgrounds small middle class houses new schools and children s museums were designed to cultivate imagination in a growing cohort of baby boom children Enthusiasm for encouraging creativity in children countered Cold War fears of failing competitiveness and the postwar critique of social conformity making creativity an emblem of national revitalization Ogata describes how a historically rooted belief in children s capacity for independent thinking was transformed from an elite concern of the interwar years to a fully consumable and aspirational ideal that persists today From building blocks to Gumby playhouses to Playskool trains Creative Playthings to the Eames House of Cards Crayola fingerpaint to children s museums material goods and spaces shaped a popular understanding of creativity and Designing the Creative Child demonstrates how this notion has been woven into the fabric of American culture

objects of italian design La Triennale di Milano AA. VV., 2012-01-29 T00:00:00+01:00 Italian Design The Milan Triennale is an Italian State institution which together with the Municipality of Milan and the Lombardy Region is charged with preserving and promoting Italian Design as well as carrying out research in framework programs focusing on town planning architecture handicrafts industrial production fashion new media etc In its long history the Milan Triennale has always followed developments in the field of applied arts from the thirties to the post war years during the reconstruction years and the country's economic miracle and later during the economic and energy crisis of the seventies Since the eighties Milan has increasingly become an international centre of design The Triennale played a leading role in organizing important qualitative events that have enhanced the city's image Last but not least the foundation of the Museum of Design To achieve its goals the Milan Triennale has established its own Research Centre and a Permanent Collection of Italian Design The 100 objects of Italian Design on show in this exhibition have been selected from the Permanent Collection a unique qualitative and quantitative ensemble of Italy's design legacy The Permanent Collection is used as a basis for all exhibits on Italian Design at the Triennale or around the world its intention is to shed new light on the history of industrial production in Italy The pieces in the Collection illustrate the heterogeneous history of Italian design the innovation and experimentation that have made it famous and immediately recognisable thanks to the works created by its master designers Italy is a country with a thriving manufacturing industry that focuses on quality design and products in fact design represents one of the country's strategic

economic resources Its good fortune and niche position on the international stage and world markets is primarily due to the system that has gradually been developed The system unites design culture and production which are influenced on the one hand by the still unrivalled works of the past for example those by Leonardo da Vinci and on the other by the vision of a future that goes beyond mere technique and the exploitation of natural resources The exhibition 100 Objects of Italian Design organised by the curator of the Collection Silvana Annicchiarico uses the objects that have made Italian design famous all over the world to tell this story The exhibition is a way to discover the history of a country which thanks to its creativity and design is once again a leader on the world stage a role it intends to pursue and develop by welcoming all and every contribution Davide Rampello President of the Milan Triennale
