Mathematical Exploration Of The Environment:

Mathematical Exploration of the Environment István Bán, 1995 One of the most important tasks of mathematics is to describe or approximate the phenomena of nature as exactly as possible and to provide a useful tool in the exploration of nature For a deeper understanding of natural phenomena we need a systematized definition of the most important mathematical notions and statements In this book a new concept of the structure of the environment is introduced The environment has a porous structure This concept applies sets of state characteristic values The book provides a mathematical method which can process a very high number and different kinds of state characteristic values surveys the complex correlations and explains the structure and the local and global properties of the environment by means of a novel mathematical interpretation

Windows on Mathematical Meanings Richard Noss, Celia Hoyles, 1996-06-30 This book challenges some of the conventional wisdoms on the learning of mathematics The authors use the computer as a window onto mathematical meaning making The pivot of their theory is the idea of webbing which explains how someone struggling with a new mathematical idea can draw on supportive knowledge and reconciles the individual's role in mathematical learning with the part played by epistemological social and cultural forces

Essays In Computer-Supported Collaborative Learning Gerry Stahl, 2016-01-26 These essays are some of the most important papers co written with my colleagues that supplement the discussion of CSCL research in the published books These chapters take the discussion in specific directions They begin with my general reflections on the importance of CSCL as a research field situating my work on the VMT Project and my theory of group cognition within the field of CSCL They describe the VMT research project including its research approach technology pedagogy and analysis methods Mostly they discuss in some detail the findings that have emerged from the VMT Project about the nature of online interaction in that type of CSCL setting The volume concludes with reports of work in the project and future directions that were underway
