Tucker, Nancy D. Anderson, 2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800 s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free *Walford's Guide to Reference Material: Science and technology* Albert John Walford, Library Association, 1999 A revised and updated guide to reference material It contains selective and evaluative entries to guide the enquirer to the best source of reference in each subject area be it journal article CD ROM on line database bibliography encyclopaedia monograph or directory It features full critical annotations and reviewers comments and comprehensive author title and subject indexes The contents include mathematics astronomy and surveying physics chemistry earth sciences palaeontology anthropology biology natural history botany zoology patents and interventions medicine engineering transport vehicles agriculture and livestock household management communication chemical industry manufactures industries trades and crafts and the building industry Scientific Journals: Issues in Library Selection and Management Tony Stankus, 2019-12-06 This book first published in 1987 brings together from a variety of sources analysis on the major issues involved in the collection of scientific journals Working from the premise that scientists tend to know much more about their subject than about their journals it examines the rationale for journal choices journals and tenure journals and budgeting and the elements of a good journal It shows librarians how to penetrate the internal structure of some imposing technical literatures in a way that can help them make responsible collection management decisions that even their science clientele will respect Writing Research Papers James D. Leonard Rubinstein, 1986      **The Best Books for Academic Libraries: General works, military & naval, library science**, 2002      **Library Literature**, 1993      *Food Freezing and Thawing Calculations* Q. Tuan Pham, 2014-04-16 Freezing time and freezing heat load are the two most important factors determining the economics of food freezers This Brief will review and describe the principal methods available for their calculation The methods can be classified into analytical methods which rely on making physical simplifications to be able to derive exact solutions empirical methods which use regression techniques to derive simplified equations from experimental data or numerical calculations and numerical methods which use computational techniques such as finite elements analysis to solve the complete set of equations describing the physical process The Brief will evaluate the methods against experimental data and develop guidelines on the choice of method Whatever technique is used the accuracy of the results depends crucially on the input parameters such as the heat transfer coefficient and the product's thermal properties In addition the estimation methods and data for these parameters will be

reviewed and their impacts on the calculations will be evaluated Freezing is often accompanied by mass transfer moisture loss solute absorption super cooling and nucleation and may take place under high pressure conditions therefore methods to take these phenomena into account will also be reviewed      **Resources in Education** ,2000-10
