## **Mathematical Foundations Of Information Retrieval:**

Mathematical Foundations of Information Retrieval S. Dominich, 2012-12-06 This book offers a comprehensive and consistent mathematical approach to information retrieval IR without which no implementation is possible and sheds an entirely new light upon the structure of IR models It contains the descriptions of all IR models in a unified formal style and language along with examples for each thus offering a comprehensive overview of them The book also creates mathematical foundations and a consistent mathematical theory including all mathematical results achieved so far of IR as a stand alone mathematical discipline which thus can be read and taught independently Also the book contains all necessary mathematical knowledge on which IR relies to help the reader avoid searching different sources Audience The book will be of interest to computer or information scientists librarians mathematicians undergraduate students and researchers whose work involves information retrieval

**The Geometry of Information Retrieval** C. J. van Rijsbergen, 2004-08-12 Information retrieval IR the science of extracting information from any potential source can be viewed in a number of ways logical probabilistic and vector space models are some of the most important In this book the author one of the leading researchers in the area shows how these views can be reformed in the same framework used to formulate the general principles of quantum mechanics All the usual quantum mechanical notions have their IR theoretic analogues and the standard results can be applied to address problems in IR such as pseudo relevance feedback relevance feedback and ostensive retrieval The relation with quantum computing is also examined To keep the book self contained appendices with background material on physics and mathematics are included Each chapter ends with bibliographic remarks that point to further reading This is an important ground breaking book with much new material for all those working in IR AI and natural language processing

**Information Retrieval Models** Thomas Roelleke, 2022-05-31

Information Retrieval IR models are a core component of IR research and IR systems The past decade brought a consolidation of the family of IR models which by 2000 consisted of relatively isolated views on TF IDF Term Frequency times Inverse Document Frequency as the weighting scheme in the vector space model VSM the probabilistic relevance framework PRF the binary independence retrieval BIR model BM25 Best Match Version 25 the main instantiation of the PRF BIR and language modelling LM Also the early 2000s saw the arrival of divergence from randomness DFR Regarding intuition and simplicity though LM is clear from a probabilistic point of view several people stated It is easy to understand TF IDF and BM25 For LM however we understand the math but we do not fully understand why it works This book takes a horizontal approach gathering the foundations of TF IDF PRF BIR Poisson BM25 LM probabilistic inference networks PIN s and divergence based models The aim is to create a consolidated and balanced view on the main models A particular focus of this book is on the relationships between models This includes an overview over the main frameworks PRF logical IR VSM generalized VSM and a pairing of TF IDF with other models It becomes evident that TF IDF and LM measure the same namely the dependence overlap between document and query The Poisson probability helps to establish probabilistic non heuristic roots for TF IDF and the Poisson parameter average term frequency is a binding link between several retrieval models and model parameters Table of Contents List of Figures Preface Acknowledgments Introduction Foundations of IR Models Relationships Between IR Models Summary Research Outlook Bibliography Author s Biography Index Thriving Rough Sets Guoyin Wang, Andrzej Skowron, Yiyu Yao, Dominik Ślęzak, Lech Polkowski, 2017-04-28 This special book is dedicated to the memory of Professor Zdzisław Pawlak the father of rough set theory in order to commemorate both the 10th anniversary of his passing and 35 years of rough set theory The book consists of 20 chapters distributed into four sections which focus in turn on a historical review of Professor Zdzisław Pawlak and rough set theory a review of the theory of rough sets the state of the art of rough set theory and major developments in rough set based data mining approaches Apart from Professor Pawlak s contributions to rough set theory other areas he was interested in are also included Moreover recent theoretical studies and advances in applications are also presented The book will offer a useful guide for researchers in Knowledge Engineering and Data Mining by suggesting new approaches to solving the problems they encounter

**Teaching and Learning in Information Retrieval** Efthimis Efthimiadis,Juan M. Fernández-Luna,Juan F. Huete,Andrew MacFarlane,2011-10-06 Information Retrieval has become a very active research field in the 21st century Many from academia and industry present their innovations in the field in a wide variety of conferences and journals Companies transfer this new knowledge directly to the general public via services such as web search engines in order to improve their information seeking experience In parallel teaching IR is turning into an important aspect of IR generally not only because it is necessary to impart effective search techniques to make the most of the IR tools available but also because we must provide a good foundation for those students who will become the driving force of future IR technologies There are very few resources for teaching and learning in IR the major problem which this book is designed to solve The objective is to provide ideas and practical experience of teaching and learning IR for those whose job requires them to teach in one form or another and where delivering IR courses is a major part of their working lives In this context of providing a higher profile for teaching and learning as applied to IR the co editor of this book Efthimis Efthimiathis had maintained a leading role in teaching and learning within the domain of IR for a number of years This book represents a posthumous example of his efforts in the area as he passed away in April 2011 This book his book is dedicated to his memory
