Question 8: Thirty children were asked about the number of hours they watched TV programmes in the previous week. The results were found as follows:

```
1   6   2   3   5   12  5   8   4   8
10  3   4   12  2   8   15  1   17  6
3   2   8   5   9   6   8   7   14  12
```

(I) Make a grouped frequency distribution table for this data, taking class width 5 and one of the class intervals as 5 - 10.

(II) How many children watched television for 15 or more hours a week?

Answer: (I) Our class intervals will be 0 — 5, 5 — 10, 10 —15.....

The grouped frequency distribution table can be constructed as follows.

Hours	Number of children
0 — 5	10
5 — 10	13
10 —15	5
15 — 20	2
Total	30

(II) The number of children who watched TV for 15 or more hours a week is 2 (i.e., the number of children in class interval 15 — 20).

Question 9: A company manufactures car batteries of a particular type. The lives (in years) of 40 such batteries were recorded as follows:

```
2.6  3.0  3.7  3.2  2.2  4.1  3.5  4.5
3.5  2.3  3.2  3.4  3.8  3.2  4.6  3.7
2.5  4.4  3.4  3.3  2.9  3.0  4.3  2.8
3.5  3.2  3.9  3.2  3.2  3.1  3.7  3.4
4.6  3.8  3.2  2.6  3.5  4.2  2.9  3.6
```

Construct a grouped frequency distribution table for this data, using class intervals of size 0.5 starting from the intervals 2 — 2.5.

Answer: A grouped frequency table of class size 0.5 has to be constructed, starting from class interval 2 — 2.5.
Therefore, the class intervals will be 2 — 2.5, 2.5 — 3, 3 — 3.5...
By observing the data given above, the required grouped frequency distribution table can be constructed as follows.

Mathematical Statistics Exercises And Solutions:

   Mathematical Statistics: Exercises and Solutions Jun Shao,2006-06-26 Since the publication of my book Mathematical Statistics Shao 2003 I have been asked many times for a solution manual to the exercises in my book Without doubt exercises form an important part of a textbook on mathematical statistics not only in training students for their research ability in mathematical statistics but also in presenting many additional results as complementary material to the main text Written solutions to these exercises are important for students who initially do not have the skills in solving these exercises completely and are very helpful for instructors of a mathematical statistics course whether or not my book Mathematical Statistics is used as the textbook in providing answers to students as well as nding additional examples to the main text Mo vatedbythisandencouragedbysomeofmycolleaguesandSpringer Verlag editor John Kimmel I have completed this book Mathematical Statistics Exercises and Solutions This book consists of solutions to 400 exercises over 95% of which are in my bookMathematical Statistics Many of them are standard exercises that also appear in other textbooks listed in the references It is only a partial solution manual to Mathematical Statistics which contains over 900exercises

   Mathematical Statistics Jun Shao (Statistician),2005   Basics of Modern Mathematical Statistics Wolfgang Karl Härdle,Vladimir Spokoiny,Vladimir Panov,Weining Wang,2013-11-27 The complexity of today s statistical data calls for modern mathematical tools Many fields of science make use of mathematical statistics and require continuous updating on statistical technologies Practice makes perfect since mastering the tools makes them applicable Our book of exercises and solutions offers a wide range of applications and numerical solutions based on R In modern mathematical statistics the purpose is to provide statistics students with a number of basic exercises and also an understanding of how the theory can be applied to real world problems The application aspect is also quite important as most previous exercise books are mostly on theoretical derivations Also we add some problems from topics often encountered in recent research papers The book was written for statistics students with one or two years of coursework in mathematical statistics and probability professors who hold courses in mathematical statistics and researchers in other fields who would like to do some exercises on math statistics

   Mathematical Statistics: Exercises and Solutions Persi Diaconis,1988 The exercises are grouped into seven chapters with titles matching those in the author s Mathematical Statistics Can also be used as a stand alone because exercises and solutions are comprehensible independently of their source and notation and terminology are explained in the front of the book Suitable for self study for a statistics Ph D qualifying exam   **Mathematical Statistics** Wiebe R. Pestman,Ivo B. Alberink,2012-10-25 No detailed description available for Mathematical Statistics   **Statistics: Problems And Solution (Second Edition)** Eryl E Bassett,J Mike Bremner,Byron Jones,Byron J T Morgan,P M North,Ian T Jolliffe,2000-06-27 Originally published in 1986 this book consists of 100 problems in probability and statistics together with solutions and most importantly extensive notes on the solutions The level of sophistication of the problems is similar to that encountered in many

introductory courses in probability and statistics At this level straightforward solutions to the problems are of limited value unless they contain informed discussion of the choice of technique used and possible alternatives The solutions in the book are therefore elaborated with extensive notes which add value to the solutions themselves The notes enable the reader to discover relationships between various statistical techniques and provide the confidence needed to tackle new problems

Exercises in Theoretical Statistics Maurice George Kendall,1954 **Student Solutions Manual, Mathematical Statistics with Applications** , **Multivariate Statistics** Wolfgang Karl Härdle,Zdeněk Hlávka,2015-06-02 The authors present tools and concepts of multivariate data analysis by means of exercises and their solutions The first part is devoted to graphical techniques The second part deals with multivariate random variables and presents the derivation of estimators and tests for various practical situations The last part introduces a wide variety of exercises in applied multivariate data analysis The book demonstrates the application of simple calculus and basic multivariate methods in real life situations It contains altogether more than 250 solved exercises which can assist a university teacher in setting up a modern multivariate analysis course All computer based exercises are available in the R language All data sets are included in the library SMSdata that may be downloaded via the quantlet download center www quantlet org Data sets are available also via the Springer webpage For interactive display of low dimensional projections of a multivariate data set we recommend GGobi

Multivariate Statistics: Wolfgang Härdle,Zdeněk Hlávka,2007-07-27 The authors have cleverly used exercises and their solutions to explore the concepts of multivariate data analysis Broken down into three sections this book has been structured to allow students in economics and finance to work their way through a well formulated exploration of this core topic The first part of this book is devoted to graphical techniques The second deals with multivariate random variables and presents the derivation of estimators and tests for various practical situations The final section contains a wide variety of exercises in applied multivariate data analysis **Statistics: Problems and Solutions** John Murdoch,J.A.
