**The Mathematics of the Cosmic Mind** L. Gordon Plummer, 1966      [Mathematics of the Cosmic Mind](#) L. Gordon Plummer, 1982-08      **Mathematics and the Question of Cosmic Mind** Cassius Jackson Keyser, 1935      *The Sheldrake Shift* Dr. Thomas Stark, You think you understand Rupert Sheldrake's theory of formative causation and morphic resonance You have no idea how deep the rabbit hole goes Sitting beneath his theory is the most extraordinary theory of all the theory that changes everything      [The Holographic Soul](#) Mike Hockney, 2016-01-02 Where is your mind located How does it interact with your body When your body dies does your mind die too or does it have an afterlife That's the mystery of existence If humanity cannot answer these questions once and for all then it has no understanding of reality Holography is what allows scientific materialism to be replaced by mathematical idealism Holography allows the soul rather than matter to be considered the source of reality Over 300 years ago Leibniz with his Monadology adopted a holographic model of reality whereby dimensionless monads created the illusion of the dimensional material world The answer to existence has always been right in front of humanity in the shape of mathematics The spacetime universe of matter is nothing but an ontological hologram that comes inbuilt with mathematical forcefields that lend it the illusion of being solid It's all in the math Everything starts with unextended minds dimensionless Fourier singularities mathematical souls      [Catalog of Copyright Entries. Third Series](#) Library of Congress. Copyright Office, 1973      **Cosmic Consciousness** Richard Maurice Bucke, 1905      [Gaither's Dictionary of Scientific Quotations](#) Carl C. Gaither, Alma E. Cavazos-Gaither, 2012-01-05 This unprecedented collection of 27 000 quotations is the most comprehensive and carefully researched of its kind covering all fields of science and mathematics With this vast compendium you can readily conceptualize and embrace the written images of scientists laymen politicians novelists playwrights and poets about humankind's scientific achievements Approximately 9000 high quality entries have been added to this new edition to provide a rich selection of quotations for the student the educator and the scientist who would like to introduce a presentation with a relevant quotation that provides perspective and historical background on his subject Gaither's Dictionary of Scientific Quotations Second Edition provides the finest reference source of science quotations for all audiences The new edition adds greater depth to the number of quotations in the various thematic arrangements and also provides new thematic categories      **God Is Mathematics** Dr. Thomas Stark, What's the most radical idea possible the one least likely to be understood by humanity the one so far beyond humanity's level of intelligence that whoever champions it is likely to be regarded as insane Go on if you're smart you ought to be conceive of a connection so unobvious so invisible to the masses so improbable in relation to any other idea that it will be almost universally rejected That idea despised mocked and reviled by practically everyone will be the No 1 candidate for being the authentic answer to existence Pythagoras was the genius that delivered this idea 2 500 years ago when he said All things are numbers The last connection that the average person would ever make when they look at the world is that what they are

actually seeing beyond the level of superficial appearance is nothing but numbers That is the ultimate unthinkable thought God is Mathematics     **Psychophysics** Mike Hockney,2015-09 One hundred percent of scientists think that Einstein's special theory of relativity is correct One hundred percent of scientists are wrong Isn't that astounding Why is it so hard for scientists to see the blatant errors in Einstein's logic The central reason for the failure of Einstein's theory as an account of ultimate existence is that like everything else in science it denies the real existence of mind Once mind is admitted to physics Einstein's fallacies become obvious To refute both Einstein only one thing is required to place an eternal non sensory mathematical Singularity at the centre of the spacetime universe This Singularity is a Fourier frequency domain but is functionally equivalent to a Cosmic Mind Because it's an immaterial dimensionless entity outside space and time the Singularity is undetectable by any scientific experiment yet its existence automatically disproves all claims of scientific materialism regarding the fundamental nature of reality     **The God Game** Mike Hockney,2013-09-30 What is the answer to everything Pythagoras provided a glimpse of the answer 2 500 years ago when he declared All things are numbers Mathematics is literally everything Unlike science mathematics offers certainty and absolute knowledge Mathematics unifies science religion and metaphysics and is the true Grand Unified Theory of Everything No experiment can ever contradict a mathematical truth Mathematics is the ONLY answer to everything Mathematics is the ONLY subject inherently about eternal Platonic truth The God Series starting with The God Game reveals the astonishing power of ontological mathematics to account for everything Isn't it time to convert to the world's only rational religion Illuminism the Pythagorean religion of mathematics that infallibly explains all things and guarantees everyone a soul that's not only eternal and indestructible but also has the capacity to make each of us a true God Isn't it time to become Illuminated The God Series is what God ought to have delivered to humanity rather than the Bible Knowledge rather than faith Truth rather than fantasy     *Kabbalah, Hermeticism and M-theory* Michael Faust,2013-02-10 M theory the latest attempt by scientists to formulate a grand theory of everything is doomed to failure from the outset Why Because it ignores the unextended domain outside space and time the domain of zero and infinity M theory explicitly sets out to prevent the appearance of zero and infinity in any of its equations It is the last will and testament of materialism its concluding grand folly before it confronts the truth of an immaterial partner to the material world So here is the tale of the cosmos We will take you on the strangest journey from Kabbalism Zoroastrianism Manichaeism Gnosticism Hermeticism Rosicrucianism Platonism Neoplatonism the Emerald Tablet the Golden Dawn Aleister Crowley the perennial philosophy genies Aristotle entelechy Forms and matter mind and matter universals and particulars all the way to M theory Judge for yourself who has the better answers regarding the true nature of existence scientists or the Pythagorean Illuminati     *What Is Mathematics?* Dr. Thomas Stark, So you know what mathematics is right Well if you do you're a smarter person than Nobel laureates Albert Einstein and Eugene Wigner who were baffled by what mathematics is and how it relates to science and the world Wigner wrote a famous paper entitled The

Unreasonable Effectiveness of Mathematics in the Natural Sciences No scientist has ever explained why mathematics is so uncannily appropriate to describing Nature Galileo said The Book of Nature is written in mathematical language and its characters are triangles circles and other geometric figures without which it is impossible to humanly understand a word without these one is wandering in a dark labyrinth Do you want to escape from the dark labyrinth Then you must discover what mathematics really is The answer will blow your mind Guaranteed Come on the greatest detective adventure of them all where you do nothing but exercise pure deduction Come and be a cosmic Sherlock Holmes Put on your deerstalker and practice the pristine science of deduction Determining the true nature of mathematics is the No 1 problem facing humanity To explain mathematics is to explain reality itself *Foundations and Fundamental Concepts of Mathematics* Howard Eves, 2012-04-10 Third edition of popular undergraduate level text offers historic overview readable treatment of mathematics before Euclid Euclid's Elements non Euclidean geometry algebraic structure formal axiomatics sets more Problems some with solutions Bibliography

**Eco-Phenomenology: Life, Human Life, Post-Human Life in the Harmony of the Cosmos** William S. Smith, Jadwiga S. Smith, Daniela Verducci, 2018-07-03 This volume presents discussions on a wide range of topics focused on eco phenomenology and the interdisciplinary investigation of contemporary environmental thought Starting out with a Tymieniecka Memorial chapter the book continues with papers on the foundations theories readings and philosophical sources of eco phenomenology In addition it examines issues of phenomenological anthropology ecological perspectives of the human relationship to nature and phenomenology of the living body and the virtual body Furthermore the volume engages in a dialogue with contemporary behavioral sciences on topics such as eco alienation sustainability and the human relationship to the earth in the context of the cosmos

**Soul Science** Steve Madison, 2020-11-21 There are two entities that have dominated human thinking and faith from the dawn of civilization God and the soul Even though they have been obsessively discussed for thousands of years by countless people including many of humanity's greatest geniuses the number of people today who can actually answer the simple questions What is God made of and What is the soul made of is vanishingly small Well can YOU give the answer If you can't isn't it time you started studying Soul Science *The Postsecular Sacred* David Tacey, 2019-07-16 In *The Postsecular Sacred* Jung Soul and Meaning in an Age of Change David Tacey presents a unique psychological study of the postsecular adding a Jungian perspective to a debate shaped by sociology philosophy and religious studies In this interdisciplinary exploration Tacey looks at the unexpected return of the sacred in Western societies and how the sacred is changing our understanding of humanity and culture Beginning with Jung's belief that the psyche has never been secular Tacey examines the new desire for spiritual experience and presents a logic of the unconscious to explain it Tacey argues that what has fuelled the postsecular momentum is the awareness that something is missing and the idea that this could be buried in the unconscious is dawning on sociologists and philosophers While the instinct to connect to something greater is returning Tacey shows that this need

not imply that we are regressing to superstitions that science has rejected The book explores indigenous spirituality in the context of the need to reanimate the world not by going back to the past but by being inspired by it There are chapters on ecopsychology and quantum physics and using Australia as a case study the book also examines the resistance of secular societies to becoming postsecular Approaching postsecularism through a Jungian perspective Tacey argues that we should understand God in a manner that accords with the time not go back to archaic rejected images of divinity The sacred is returning in an age of terrorism and this is not without significance in terms of the explosive impact of spirituality in our time Innovative and relevant to the world we live in this will be of great interest to academics and scholars of Jungian studies anthropology indigenous studies philosophy religious studies and sociology due to its transdisciplinary scope It would also be a useful resource for analytical psychologists Jungian analysts and psychotherapists How to Become God Michael Faust, 2013-01-27 Is it possible to become God Is the unconscious mind nothing other than the Heaven gate This is the extraordinary account of the ancient and controversial secret society known as the Pythagorean Illuminati of how it is possible for everyone to attain divinity There are two vast obstacles to overcome one relating to a lack of consciousness and the other to an over identification with consciousness The followers of the Abrahamic religions are bicameral meaning they are highly submissive and obey voices emanating from their unconscious Atheistic scientific materialists are overly rational and deny the existence of anything other than their mortal ego consciousness They have cut themselves off from the most mysterious domain in existence that of the two numbers zero and infinity This may be the most revolutionary book in history presenting a unique and breathtaking view of reality If you cannot find the answers to your profoundest questions in the God Program you will find them nowhere **Inside Reality** Dr. Thomas Stark, There are those such as scientists who see only the outside of reality its appearance its surface its phenomenal aspect They are blind to the inside the substance the foundation the noumenal aspect They dismiss it as non-existent or illusion or epiphenomenon Scientists are those that believe that phenomena have no underlying noumena What you see is what you get Seeing is believing Everything is appearance Nothing is concealed There are no hidden variables and no unobservables The scientific method says Observe That works only if everything is observable If there are foundational unobservables science is catastrophically wrong and has cut itself off from the truth The only truth it can furnish is that of surfaces and appearances with no substance Those who truly want to understand reality must become masters of both perspectives inside and outside noumenon and phenomenon and see how they relate communicate and interact **The False Awakeners: Illusory Enlightenment** Mark Romel, 2018-04-10 False Awakening A convincing dream about awakening from sleep when in reality you are still asleep Wake up What is the most sinister world you can imagine the worst of all possible worlds It is the one where all of the people are endarkened but believe themselves enlightened None of them wants to change because they think they are perfect They exist forever in this benighted condition doing nothing to discover the Truth of reality to find the answers to existence to see the real light rather

than the fake light Our world is full of the fake enlightened the phony awakened the fraudulent lightworkers The so called light they perceive is darkness visible i e Satanic light the light of hell Nothing is more dangerous than a false awakening The world is full of legions of the falsely awakened of endarkened zombies They are still asleep still inside the cave and merely dreaming that they have seen the light Wake up
