## **A Textbook of Business**

**Mathematics (5e)** Dr Padmalochan Hazarika, The revised edition of A Textbook of Business Mathematics provides the students with a comprehensive knowledge of important topics and concepts in business mathematics. The book bridges theory and practical application providing a solid foundation in key topics such as algebra, calculus, optimisation and derivatives. It provides sound conceptual understanding of mathematical principles and techniques from a business perspective. The textbook is written in a lucid style to make it user friendly. Abundant examples and exercises incorporated in the text will help the students for preparation of examination and practice. While the book is primarily intended for B Com and BBA students, it will be equally beneficial for students pursuing business-related courses who require a solid foundation in business mathematics.

The Handbook of Mathematics Teacher Education: Volume 4, 2008-01-01. The Handbook of Mathematics Teacher Education, the first of its kind, addresses the learning of mathematics teachers at all levels of schooling to teach mathematics and the provision of activity and programmes in which this learning can take place. It consists of four volumes. Volume 4 of this handbook has the title The Mathematics Teacher Educator as a Developing Professional. The volume seeks to complement the other three volumes by focusing on knowledge and roles of teacher educators working with teachers in teacher education processes and practices. In this respect, it is unique. Chapter authors represent a community of teacher educators world-wide who can speak from practical, professional and theoretical viewpoints about what it means to promote teacher education practice. The volume is in 3 main sections. In the first, we focus on Challenges to and Theory in Mathematics Teacher Education. Here, authors write from perspectives of theory and/or challenge and relate this to examples and insights from their practice. The second section, Reflection On Developing as a Mathematics Teacher Educator, has four autobiographical chapters in which authors delineate their experiences as teacher educators and relate these to theoretical and/or moral standpoints. In Section 3, Working With Prospective and Practising Teachers: What We Learn, What We Come to Know, authors write from perspectives on practice. In many cases, the practices in which they themselves have engaged and relate this to theoretical perspectives and rationales for teacher education programmes. The volume also has an introductory chapter in which the purpose and content of the volume is set out and a final chapter that synthesises themes and issues from the chapters as a whole, offering an overview of the field and suggesting future directions.
