Architecture, Festival and the City Jemma Browne, Christian Frost, Ray Lucas, 2018-10-26 Historically the urban festival served as an occasion for affirming shared convictions and identities in the life of the city Whether religious or civic in nature these events provided tangible expressions of social cultural political and religious cohesion often reaffirming a particular shared ethos within diverse urban landscapes Architecture has long served as a key aspect of this process exhibiting continuity in the flux of these representations through the parading of elaborate ceremonial floats the construction of temporary buildings the dressing of existing urban space the alternative occupations of the everyday and the construction of new buildings and spaces which then become a part of the background fabric of the city This book examines how festivals can be used as a lens to examine the relationship between city and citizen and questions whether this is fixed through time or has been transformed as a response to changes in the modern urban condition Architecture Festival and the City looks at the multilayered nature of a diverse selection of festivals and the way they incorporate both orderly authoritative and disorderly subversive components The aim is to reveal how the civic nature of urban space is utilised through festival to represent ideas of belonging and identity Recent political and social gatherings also raise questions about the relationship of these events to ritual and whether traditional practices can serve as meaningful references in the twenty first century

The Garland Encyclopedia of World Music Robert C. Provine, Yoshihiko Tokumaru, J. Lawrence Witzleben, 2017-11-22 This volume explores not only the close ties that link the cultures and musics of East and Northeast

Asia but also the distinctive features that separate them Recent Social, Environmental, and Cultural Issues in East Asian Societies Merviö, Mika Markus, 2019-11-15 East Asian societies continue to react to developments occurring in the Western part of the world as well as influence development elsewhere due to the global reach of East Asian economies and the increased political weight of East Asian societies These systems have distinctive features often connected with local social and cultural traditions However these traditions are constantly being reinterpreted and the changing meanings attached to them must be taken into account Recent Social Environmental and Cultural Issues in East Asian Societies is an essential research book that explores various social environmental and cultural issues challenging modern East Asian cultures and their implications on society Featuring a wide range of topics such as local identity social risk and government policy this book is ideal for researchers policymakers sociologists managers anthropologists politicians diplomats academicians and students **The Kakure Kirishitan of Japan** Stephen Turnbull, 1998-01-19 First major study in English of the Japanese hidden Christians and the development of the faith and rituals from the 16th century to the present day The Rousing Drum Scott Schnell, 1999-06-01 Ritual is too often equated with unvarying or repetitive behavior This impression is encouraged by the ethnographic tendency toward an overly narrow time frame which highlights current relationships and conditions rather than long term developments The Rousing Drum takes a different view It adopts a historical perspective encompassing several hundred years in exploring the role of ritual as an effective medium for negotiating sociopolitical and economic change The setting is Furukawa a town located in Japan's mountainous interior Every spring the local Shinto shrine festival provides an opportunity for enacting social relationships and attitudes By day a portable shrine containing the spirit of the guardian deity is escorted through town in a stately procession At night however a different scenario unfolds A barrel shaped drum is borne through the nighttime streets on a massive grid like platform Prominent members of the community are obliged to ride upon the platform while teams of young adults rush out and attack it as it passes through their respective neighborhoods The action can become quite unruly and random fights and injuries are accepted as inevitable correlates In analyzing the festival over time Schnell reveals a dramatic transformation The drum ritual which originated as a minor preliminary to the other events emerged during the late 1800s as an occasion for airing hostilities and settling scores As Japan's modernization progressed the ritual performance came to embody a symbolic challenge to institutionalized authority and occasionally escalated into politically motivated violence While the religious ceremonies observed during the day were appropriated by local power holders the nighttime drum ritual represented a folk response to the officially sanctioned liturgy The festival as a whole thus represented the clash of competing ideologies within the context of a single public forum Today's ritual rather tame by comparison is being transformed into a tourist attraction aligned with the town's economic development objectives Schnell's careful examination of the ethnohistorical data offers a valuable new perspective on Japanese festivals as well as the events and conditions that influence their development His innovative look at ritual behavior

over time persuades us that we can grasp the underlying significance of such activities only if we consider them within the context of larger historical patterns

Occidentalism : Images of the West James G. Carrier, 1995-04-13 This is an investigation of Western cultural identity It shows how people's images of themselves and others reflect the power that different groups in a society have to shape these images The contributors describe these images in Western academic writing popular Western culture and societies outside the West in this counterpart to Edward Said's Orientalism Occidentalism is an investigation of images of Western cultural identity Edward Said's Orientalism revolutionized Western understanding of non Western cultures by showing how Western projected images shaped the Occidental of the Orient but those who follow Said have not until now reflected that understanding back onto Western societies Occidentalism shows how images of the West shape people's conceptions of themselves and others and how these images are in turn shaped by members of Western and non Western societies alike The contributors describe and explicate these images in a variety of areas from Western academic writing to popular Western culture from societies within and outside the West to show how power and conflict shape such conceptions

Raz, 2020-03-23 In 1996 over 16 million people visited Tokyo Disneyland making it the most popular of the many theme parks in Japan Since it opened in 1983 Tokyo Disneyland has been analyzed mainly as an example of the globalization of the American leisure industry and its organizational culture particularly the company manual By looking at how Tokyo Disneyland is experienced by employees management and visitors Aviad Raz shows that it is much more an example of successful importation adaptation and domestication and that it has succeeded precisely because it has become Japanese even while marketing itself as foreign Rather than being an agent of Americanization Tokyo Disneyland is a simulated America showcased by and for the Japanese It is an America with a Japanese meaning

McVeigh,2013-09-13 Brian J McVeigh uses a unique anthropological approach to step outside flawed stereotypes of Japanese society and really engage in the current debate over the role of bureaucracy in Japanese politics To many in the West Japan appears as a paradox a rational high tech economic superpower and yet at the same time a deeply ritualistic and ceremonial society This adventurous new study demonstrates how these nominally conflicting impressions of Japan can be reconciled and a greater understanding of the state achieved
