A Wild Constraint Jenny Taylor, 2008-12-11 In *A Wild Constraint* The Case for Chastity Taylor addresses the provocative subject of celibacy Too often considered an exclusively religious option celibacy has been reclaimed by some feminists and sociologists over the last 20 years as a radical alternative in secular society to the liberal sexual lifestyle What after all is sexual liberation when so often the outcome is pain and social chaos In the context of promiscuity sexual abuse and confusion celibacy can herald a different sexual freedom Jenny Taylor draws on personal experience and interviews with men and women of all ages to demonstrate the impact of the sexual revolution and to make a case for celibacy She argues that celibacy is a viable alternative that deserves to be taken seriously and challenges the church to speak out for sexual abstinence with confidence and certainty **Compassionate Love in Intimate Relationships** Josiane M.

uses the lens of her own life experience to tell the story of how visionary and prophetic women set in motion the important institutional structures that have allowed women to shape Catholic theology in North America over the past fifty years. She pays particular attention to issues and problems facing women theologians in the Catholic Church today such as the implications of the changing demographics of women theologians, women's impact on the theological establishment, the reception of feminism and feminist theology by the hierarchy, and the unmet intercultural challenges posed by those on the margins, as well as women theologians' response to them. Coming at the beginning of a new papacy, Hinsdale's compelling narrative is especially timely for a consideration of the future of women in the Catholic Church.

BOOK JACKET A History of Marriage Systems Gladys Robina Quale, 1988-05-06 Readers seeking a historical and cross-cultural treatment of marriage and the family will not be disappointed by this book. A readable and comprehensive account of marriage, rich in colorful social history, Quale's work excels in the comparison of lines of development among the foremost cultures of the world. Particularly impressive in this regard is her treatment of the Eastern civilizations and how these differed from what demographic historians have come to call the West European pattern of marriage. Although written as a history, this book should be of interest to students of the family in the social sciences. While it is not a path-breaking work in the sense of providing significant novel conceptual or theoretical insights, it skillfully incorporates theoretical and empirical contributions from a multitude of disciplines. It devotes considerable attention to contemporary trends and consistently relates the institution of the family to the overall socioeconomic, political, and demographic contingencies within society. Quale has written an important book that contains a wealth of useful information and deserves serious consideration for use in graduate and undergraduate instruction.

Journal of Marriage and the Family This is the first general worldwide history of marriage systems. Though it is comprehensive, it also uses contemporary American trends to illustrate broader tendencies in significant and sometimes dramatic ways. After going back to the earliest generations of human life to seek the roots of why and how human beings came to marry, it explores the various points in family life at which marriages are made, dissolved, and remade. It treats marriage systems as a basis for understanding how not only families but whole societies operate. The functioning of a marriage system is perceived to be fully related to the overall economic and political situation within which families and individuals must make their way. The overall situation is looked at in a historical context reflecting a condition of constant change. Quale traces the gradual modifications in patterns through the rise of agriculture and herding into commercial urban societies and on to contemporary industrial-commercial life, comparing lines of development in the major regions of the world.
