Archaeology of Medieval Germany Günter P. Fehring,2014-10-24 Medieval archaeology is a relatively young discipline It relies heavily on and contributes to the neighbouring disciplines of history and geography as well as certain of the natural sciences The kinds of sources investigated in the context of medieval archaeology also cast light on many aspects of life in later centuries The main sources used are graveyards churches and churchyards castles and fortifications rural and urban settlements technical production sites and routes of communication Closely allied to these are the numerous finds of small objects of everyday life from cutlery and tools to animal remains and grain This book is a comprehensive discussion of what can be established from the use of such materials about the culture and daily life of medieval Germany Each subject is augmented with the use of many illustrations Besides methodological questions the author considers what can be learnt about the history of settlement and architecture of technology of economic and social matters of churches and missions and of population diet and vegetation **Kulturgeschichte der "Kulturgeschichten"** Martin Eichhorn,2002 *Handbook of*

Plant Palaeoecology (First edition 2012) René T. J. Cappers,Reinder Neef,2012-01-06 Plant palaeoecologists use data from plant fossils and plant subfossils to reconstruct ecosystems of the past This book deals with the study of subfossil plant material retrieved from archaeological excavations and cores dated to the Late Glacial and Holocene One of the main objectives of this book is to describe the processes that underlie the formation of the archaeobotanical archive and the ultimate composition of the archaeobotanical records being the data that are sampled and identified from this immense archive Our understanding of these processes benefits from a knowledge of plant ecology and traditional agricultural practices and food processing This handbook summarizes the basic ecological principles that relate to the reconstruction of former vegetations and of agricultural practices in particular We hope this book will help palaeobotanists environmental archaeologists and colleagues from related disciplines optimize inferences based on what we could term old style archaeobotany And we hope that our observations will serve as an eye opener and improve future research not only as it is practised in our laboratories but also as it is practised in the field **The Oxford Handbook of Engineering and**
