Frozen in the Past Rawan Fouad Abdi, 2025-04-18 In August 2014 the so called Islamic State ISIS committed genocide against the Yezidis in the Shingal region of Iraq Thousands were murdered abducted enslaved and tortured The survivors of the seriously traumatized community are still healing the deep wounds of these crimes the 74th Ferman genocide in their history and for justice Frozen in the Past gives the survivors a voice In haunting unvarnished stories they tell of imprisonment rape loss and the immeasurable suffering they had to endure But despite the unimaginable cruelty their stories also reveal courage resilience and an unbroken will to regain hope They remind us that documenting history is not just about recording facts but about honoring the humanity of those who lived through it Rawan Fouad Abdi has spent years collecting these testimonies to come to terms with the crimes and to ensure that the world is listening Frozen in the Past is thus more than a collection of survival stories it is an appeal against forgetting and a call for justice

How We Remember Michael E. Hasselmo, 2013-08-16 A novel perspective on the biological mechanisms of episodic memory focusing on the encoding and retrieval of spatiotemporal trajectories Episodic memory proves essential for daily function allowing us to remember where we parked the car what time we walked the dog or what a friend said earlier In How We Remember Michael Hasselmo draws on recent developments in neuroscience to present a new model describing the brain mechanisms for encoding and remembering such events as spatiotemporal trajectories He reviews physiological breakthroughs on the regions implicated in episodic memory including the discovery of grid cells the cellular mechanisms of persistent spiking and resonant frequency and the topographic coding of space and time These discoveries inspire a theory for understanding the encoding and retrieval of episodic memory not just as discrete snapshots but as a dynamic replay of spatiotemporal trajectories allowing us to retrace our steps to recover a memory In the main text of the book he presents the model in narrative form accessible to scholars and advanced undergraduates in many fields In the appendix he presents the material

in a more quantitative style providing mathematical descriptions appropriate for advanced undergraduates and graduate students in neuroscience or engineering
