**The IMF, World Bank and Policy Reform** Alberto Paloni, Maurizio Zanardi, 2012-10-12 The debate on whether or not the International Monetary Fund and World Bank and their intervention strategies are a positive force for change in the developing world continues to rage. Featuring both macroeconomic and microeconomic approaches, this book brings together an international team of contributors and centres upon three broad themes: the ideology of the IMF and World Bank poverty reduction conditionality. In exploring these themes, this book will be a valuable reference for postgraduate students and professionals in the fields of development studies and political economy.

***Routledge Handbook of Industry and Development*** John Weiss, Michael Tribe, 2015-09-16 The *Routledge Handbook of Industry and Development* is a global overview of industrialisation. Each chapter will provide readers with contemporary insights into this essential aspect of economic development. Industrialisation has been at the forefront of discussion on economic development since the earliest days of development economics. But over the last fifty years, the manufacturing sectors of different countries and regions have grown at strikingly different rates. In 1960, developing countries took a very small share of global manufacturing production. Today, the position had changed radically with fast growth of manufacturing in many parts of what was originally the developing world, particularly in China and the rest of East Asia. On the other hand, countries in Africa and parts of Latin America have been largely left behind by this process of industrialisation. This volume aims to illuminate this uneven

development and takes stock of the current issues that hinder and support industrialisation in low and middle income economies This Handbook is a collection of chapters on different aspects of industrialisation experience in a range of countries Key themes include the role of manufacturing in growth the nature of structural change at different stages of development the role of manufacturing in employment creation alternative options for trade and industrial policy the key role of technology and technical change and the impact of globalisation and the spread of global value chains and foreign direct investment on prospects for industrialisation Several chapters discuss individual country experiences with examples from India Mexico South Africa and Tanzania as well as an overview of African industrialisation This authoritative Handbook will be a key reference source for those studying or wishing to understand contemporary economic development Offering inspiration and direction for future research this landmark volume will be of crucial importance to all development economics scholars and researchers

*Development Economics and Social Justice* John Thoburn, 2017-11-28 Professor Ian Livingstone is one of a small group of British development economists who have achieved international renown and recognition The objective of this book is to pay tribute to his life's work particularly those aspects which related to key but challenging development issues These issues include at a broad level the understanding of the economic forces determining the development of low income economies more detailed micro work on agricultural development irrigation in particular decentralisation and local government finance small scale enterprises and large scale manufacturing development Themes running through his work relate to his over-riding concern for rigour and for socio-economic justice Ian Livingstone consistently used the traditional tools of economic analysis as a means to increase understanding of development issues in a way which was itself just as radical as the contributions of political scientists and sociologists This volume has been produced with similar aims

*The Political Economy of Africa* Vishnu Padayachee, 2010-06-10 The Political Economy of Africa aims to fill a major gap in the existing literature by exploring the economy and economics of Africa The book has a critical approach from the perspective of political economy rather than mainstream economics This book addresses the seemingly intractable economic problems of the African continent and trace their origins but also always to bring out the instances of successful economic change and the possibilities for economic revival and renewal

Economics and Development Studies Michael Tribe, Frederick Nixon, Andy Sumner, 2010-09-13 Development studies textbooks and courses have sometimes tended to avoid significant economic content However without an understanding of the economic aspects of international development many of the more complex issues cannot be fully comprehended Economics and Development Studies makes the economic dimension of discourse around controversial issues in international development accessible to second and third year undergraduate students working towards degrees in development studies Following an introductory chapter outlining the connections between development economics and development studies this book consists of eight substantive chapters dealing with the nature of development economics economic growth and structural change economic growth and developing

countries economic growth and economic development since 1960 the global economy and the Third World developing countries and international trade economics and development policy and poverty equality and development economists with a tenth concluding chapter This book synthesizes existing development economics literature in order to identify the salient issues and controversies and make them accessible and understandable The concern is to distinguish differences within the economics profession and between economists and non economists so that the reader can make informed judgments about the sources of these differences and about their impact on policy analysis and policy advice The book features explanatory text boxes tables and diagrams suggestions for further reading and a listing of the economic concepts used in the chapters

**Value Chains in Sub-Saharan Africa** Sören Scholvin,Anthony Black,Javier Revilla Diez,Ivan Turok,2019-05-09

Development largely depends on how given places participate in global economic processes The contributions to this book address various features of the integration of sub Saharan Africa into the world economy via value chains so as to explain corresponding challenges and opportunities The book deals with five issues that have not been covered adequately in scientific debates first policies are essential to promote value chains and increase their impact on development second value chains are diverse and the variance between them has major economic and political implications third regional value chains appear to constitute a viable alternative to global ones or at least are complementary to them promising better developmental outcomes for the Global South fourth political and socio economic factors are important considerations for a complete assessment of value chains fifth cities and city regions are also crucial objects of study in seeking to achieve a comprehensive assessment of value chains
