Report Together With The Report Of 12vol:

President's Report Together with the Reports of the Dean and the Librarian ,1911 *Consumption-based emissions reporting* Great Britain: Parliament: House of Commons: Energy and Climate Change Committee,2012-04-18 The Department for Energy and Climate Change s DECC official CO2 figures that count territorial emissions from power stations and transport etc within UK borders show nearly 20% reduction between 1990 2009 But research commissioned for the Department for the Environment Food and Rural Affairs reveals that CO2 emissions were 20% higher in 2009 if consumption based emissions from imported goods are included The fall in territorial emissions was not mainly the consequence of the Government s climate policy Rather it was the result of the shift in manufacturing industries away from the UK and the switch from coal to gas fired electricity generation that began in the early 1990s Since 1990 carbon dioxide emissions from imports have almost doubled from 166 million tonnes Mt CO2 to 331 Mt CO2 in 2009 If the UK wishes to encourage emissions reductions in countries that manufacture and export goods to the UK the MPs say the Government should recognise the growth in the UK s consumption based emissions Acknowledging that UK consumption is driving up territorial emissions in other countries could increase the UK s leverage over those emissions and help to secure a binding global agreement on carbon cuts There is sufficiently robust data available to develop new policy options and identify carbon intensive behaviours that are overlooked by concentrating on territorial emissions alone Ministers should explore the options for incorporating consumption based emissions data in to the policy making process and setting emissions targets on a consumption basis at the national level **U.S. Government Research Reports** ,1954 Reference Catalogue of the Reynolds Library, Rochester, N.Y.
