The Maternal Fetal Interface Anthony Carter, Vibeke Dantzer, Thomas Jansson, 1998 The 29 papers contained in this volume look closely at various aspects of what is termed The Maternal Fetal Interface as it relates to the latest research in placental science A substantial section of the book is devoted to the troublesome question of vertical transmission of infectious agents namely the HIV 1 virus However other sections of the volume examine related issues such as drug and toxin transfer across

the term placenta and the diversity of placental types and how this can affect a placenta's effectiveness as a barrier Anthony Carter is at the University of Odense Denmark Vibeke Dantzer is at the University of Copenhagen Denmark Thomas Jansson is at the University of Gothenburg Sweden *Blackwell's Five-Minute Veterinary Consult* Jean-Pierre Lavoie, Kenneth William Hinchcliff, 2011-09-20 *Blackwell's Five Minute Veterinary Consult Equine Second Edition* is a concise comprehensive resource for all topics related to equine medicine Now fully revised and updated this authoritative quick reference provides thorough coverage of practical information arranged alphabetically for efficient searching Bringing together the expert knowledge of 175 contributors the popular Five Minute Veterinary Consult format allows rapid access to complete coverage of nearly 500 diseases and conditions seen in the horse This reference is an essential tool for students and practicing veterinarians to quickly diagnose and treat equine patients **Genital Infections and Infertility** Atef Darwish, 2016-06-29 This book highlights the impact of genital tract infections on female infertility male infertility and even veterinary infertility A comprehensive source on genital infections essential for all infertility specialists is now at your hands *Reproduction in Mammals: Volume 5, Manipulating Reproduction* Colin Russell Austin, 1986-12-11 In this our second edition of *Reproduction in Mammals* we are responding to numerous requests for a more up to date and rather more detailed treatment of the subject The first edition was accorded an excellent reception but Books 1 to 5 were written some 14 years ago and inevitably there have been many advances on many fronts since then As before the manner of presentation is intended to make the subject matter interesting to read and readily comprehensible to undergraduates in the biological sciences and yet with sufficient depth to provide a valued source of information to graduates engaged in both teaching and research Our authors have been selected from among the best known in their respective fields Book 5 is concerned with the many ways in which we can now manipulate reproductive processes in animals and humans thanks to our new understanding of hormone action and improved control over early developmental events We have at our disposal a whole array of synthetic hormone agonists antagonists and antibodies that can be used at will to stimulate or inhibit fertility in animals and humans alike so that productivity in livestock can be promoted according to plan and child bearing becomes more a matter of choice than chance We can compensate for infertility by in vitro fertilization and embryo transfer and overcome inherent deficiencies by techniques involving embryo manipulation Existing barriers to the dissemination and application of this new found knowledge are discussed in some detail since it is becoming increasingly clear that improvements in the quality of life for people in many developing countries will be long delayed unless they can meet essential needs and call a halt to runaway population growth
