Republic At Risk:

Republic at Risk Walter J. Stone, James A. McCann, 2021-06-03 When people have the freedom to further their own personal interests in politics the results may be disastrous Chaos Tyranny Can a political system be set up to avoid these pitfalls while still granting citizens and politicians the freedom to pursue their interests Republic at Risk is a concise and engaging introduction to American politics The guiding theme is the problem of self interest in politics which James Madison took as his starting point in his defense of representative government in Federalist 10 and 51 Madison believed that unchecked self interest in politics was a risk to a well ordered and free society But he also held that political institutions could be designed to harness self interest for the greater good Putting Madison s theory to the test the authors examine modern challenges to the integrity and effectiveness of US policy making institutions inviting readers to determine how best to respond to these risks

Republic at Risk Walter J. Stone, 1990 This book takes a conceptual and theoretical approach as opposed to most books which are merely descriptive of American government

Foresight Model of Economic and Legal Development in the Digital Age Agnessa O. Inshakova, Elena I. Inshakova, 2020-04-17
This proceedings book presents papers from the 18th International Scientific Conference held in September 2019 at Volgograd State University Russia. The research findings are largely based on the theoretical assumptions of Oleg Inshakov, renowned for his pioneering work on the theory of economic genetics and the theory of development nucleus for economic systems. The papers focus on the impact of the 4th industrial revolution on economic growth, the concept of ecosystems corresponding to the rapid spread of digital technologies, regulatory and legal aspects of the Russian economy, digitalization, the development of digital technologies in EAEU and BRICS, foreign trade and the corresponding law enforcement measures. The book is intended for academics and practitioners as well as anyone interested in the problems of new industrialization and the digital transformation of the economy of business entities, regions, countries and integration unions and their legal regulation to enhance competitiveness on a national and global scale. **Developments in Financial Supervision and the**

Use of Macroprudential Measures in Central America Mr. Fernando L. Delgado, Mr. Mynor Meza, 2011-12-01
Improvements in financial regulation and supervision in the Central American region (CAPDR) have strengthened financial stability. Prudential instruments with potential macroeconomic effects have been introduced. Nonetheless, compared with the larger Latin American and selected industrial countries, there is still an important scope for CAPDR to enhance financial supervision and regulation. Based on two surveys and the analysis of the Basel Core Principles, the paper determines that some weaknesses exist in risk-based supervision and that macroprudential measures have scarcely been deployed. The Vulnerability of Cities Mark Pelling, 2012-06-25
When disaster strikes in cities, the effects can be catastrophic compared to other environments. But what factors actually determine the vulnerability or resilience of cities? The Vulnerability of Cities fills a vital gap in disaster studies by examining the too often overlooked impact of disasters on cities, the conditions leading to high losses from urban disasters and why some households and communities withstand disaster more effectively than others. Mark Pelling takes a fresh look at the literature on disasters and urbanization in light of recent catastrophes. He presents three detailed studies of cities in the global South drawn from countries with contrasting political and developmental contexts: Bridgetown, Barbados, a liberal democracy; Georgetown, Guyana, a post-socialist state; and Santo Domingo, Dominican Republic, an authoritarian state in democratic transition. This book demonstrates that strengthening local capacity through appropriate housing, disaster preparedness, infrastructure and livelihoods is crucial to improving civic resilience to disasters. Equally important are strong partnerships between local community-based organizations, external non-governmental and governmental organizations, public and private sectors and between city and national government. The author highlights and discusses these best practices for handling urban disasters. With rapid urbanization across the globe, this book is a must-read for professionals, policy makers, students and researchers in disaster management, urban development and planning, transport, planning, architecture, social studies and earth sciences.
