*The Wealth of (Some) Nations* Zak Cope, 2019-03-20 In this provocative new study Zak Cope makes the case that capitalism is empirically inseparable from imperialism historically and today Using a rigorous political economic framework he lays bare the vast ongoing transfer of wealth from the poorest to the richest countries through the mechanisms of monopoly rent unequal exchange and colonial tribute The result is a polarised international class structure with a relatively rich Global North and an impoverished exploited Global South Cope makes the controversial claim that it is because of these conditions that workers in rich countries benefit from higher incomes and welfare systems with public

health education pensions and social security As a result the internationalism of populations in the Global North is weakened and transnational solidarity is compromised The only way forward Cope argues is through a renewed anti imperialist politics rooted in a firm commitment to a radical labour internationalism      **China's New Political Economy** Susumu

Robert Cord,2013 Various explanations have been put forward as to why the Keynesian Revolution in economics in the 1930s and 1940s took place Some of these point to the temporal relevance of John Maynard Keynes s The General Theory of Employment Interest and Money 1936 appearing as it did just a handful of years after the onset of the Great Depression whilst others highlight the importance of more anecdotal evidence such as Keynes s close relations with the Cambridge Circus a group of able young Cambridge economists who dissected and assisted Keynes in developing crucial ideas in the years leading up to the General Theory However no systematic effort has been made to bring together these and other factors to examine them from a sociology of science perspective This book fills this gap by taking its cue from a well established tradition of work from history of science studies devoted to identifying the intellectual technical institutional psychological and financial factors which help to explain why certain research schools are successful and why others fail This approach it turns out provides a coherent account of why the revolution in macroeconomics was Keynesian and why on a related note Keynes was able to see off contemporary competitor theorists notably Friedrich von Hayek and Michal Kalecki

### **Free Trade In The World**

**Economy** Herbert Giersch, 2019-03-04 International trade policy is facing a cross roads This is creating uncertainty impairing world economic growth Unless a policy of more open markets is pursued protectionism may well turn into a self perpetuating and cumulative process This is why the 1986 Kiel Conference was devoted to Free Trade in the World Economy Towards an Opening of Markets We felt that such a conference would help to stimulate policy discussion preceding the Uruguay Round under the auspices of the GATT and the moves within the European Community towards completing a common internal market by 1992 *The Political Economy of the European Social Model* Philip B. Whyman, Mark J. Baimbridge, Andrew Mullen, 2012-05-31 This book seeks to analyse the development of the European Union EU which was founded upon the principle of the free movement of capital goods services and people in 1957 Its central thesis is that from a practical and theoretical point of view such a basis is fundamentally at odds with the creation of an interventionist regime that the construction of a social Europe would require The authors argue convincingly that economically the EU does not currently possess the budget or the economic tools to pursue such a strategy politically close to none of the institutions of the EU have backed such a policy practically conservative and neo liberal forces among member states and the institutions of the EU have repeatedly thwarted any moves in this direction In reality the Single Internal Market Economic and Monetary Union enlargement the Lisbon Agenda and European Constitution projects all prioritise supply side measures and expanding the scope of the market rather than the boosting of demand and other economic intervention Consequently constructing a social Europe in the face of this would appear problematic Hence in both theory and practice the idea that there can be a social Europe vis vis neoliberalisation is a contradiction in terms This controversial book will be an educating and refreshing read

Capitalising on constraint Catherine Moury, Stella Ladi, Daniel Cardoso, Angie Gago, 2021-10-12 This book is an essential analysis of what really happens behind closed doors during and after a bailout In the last decade five Eurozone governments in economic difficulty received assistance from international lenders on the condition that certain policies specified in the Memoranda of Understanding were implemented How did negotiations take place in this context What room for manoeuvre did the governments of these countries have After conditionality to what extent were governments willing and able to roll back changes imposed on them by the international lenders This book explores the constraints on national executives in the five bailed out countries of the Eurozone during and beyond the crisis from 2008 to 2019 The authors argue that despite international market pressure and creditors conditionality governments had some room for manoeuvre during a bailout and were able to advocate resist shape or roll back some of the policies demanded by external actors Under certain circumstances domestic actors were also able to exploit the constraint of conditionality to their own advantage Capitalising on constraint shows that after a bailout programme governments could use their discretion to revert the measures that brought the greatest benefits at a lower cost The authors provide a valuable insight into the determinants of bargaining leverage the importance of credibility and the limits of conditionality that might inform the design of international and European lending during future crises
