The Oxford Handbook of Phenomenologies and Organization Studies François-Xavier de Vaujany, Jeremy Aroles, Mar Pérezts, 2023. Phenomenologies are a major stream of philosophy. Our aim with this handbook is to explore critically and reflexively the plurality of phenomenologies and their becoming in the context of Management and Organization Studies. We detail in the introduction the genealogy of the phenomenological moment and make a distinction between four streams of phenomenologies: phenomenology as a phenomenological moment, post phenomenologies, anti phenomenologies, and non phenomenologies. Beyond many clichés about phenomenologies, we argue that phenomenologies cultivate critical perspectives, ontologies, and even for some of them, metaphysics that make them particularly interwoven with other philosophical traditions. We draw implications for Management and Organization Studies as a field.

While we know that configurations—the relative arrangement of parts and elements—matters, empirical research on configurations is just beginning to deliver on its promise.
