Retooling For The Logistics Revolution:

Retooling for the Logistics Revolution. Designing Marine Corps Inventories to Support the Warfighter ,2000 In 1996 Marine Corps leaders recognizing the need to improve logistics processes and supply support to the Fleet Marine Force FMF implemented the Precision Logistics program One of the key ideas of Precision Logistics is envisioning logistics as a set of integrated processes actions occur in a linked chain with outputs from one source being transformed into inputs that satisfy the next link in the chain Logistics then becomes an unbroken chain of activities linking many actors all aimed at achieving an overarching goal of providing efficient and effective warfighter support to sustain military operations in continuously faster better and cheaper fashion While this concept is expressed in military specific terminology the idea is just as applicable to many civilian manufacturing and repair operations and is often referred to as supply chain management in the current logistics literature

Retooling for the Logistics Revolution Ronald D. Fricker,Marc L. Robbins,2000 This report presents new inventory management techniques to help the Marine Corps continue to improve logistics and repair processes The authors advocate two modern computational methods bootstrapping the ROP and dollar banding And demonstrate via simulations that these new tools lead to dramatically improved supply system performance for the Marine Corps In particular using actual data from a Marine Expeditionary Force General Account they show significant improvements in all supply system performance metrics they also demonstrate the benefit of reducing order and ship times for the Marines The improvements result not only in more fiscally efficient operation but also in better delivery of retail supply to the ultimate user the Marine warfighter The results are broadly applicable across the Marine Corps the other military services and the civilian business sector

Velocity Management John Dumond,2001 Velocity management brought a new way of doing business to U S Army logistics with a renewed focus on the Army customer and an approach for process improvement that cuts across time quality and cost The authors reveal the motivations methodology and management structure behind the initiative the process improvements that have led to such quick and impressive results and the steps that have been taken to develop and institutionalize the capabilities needed to achieve and sustain future improvement Lessons learned can be readily adapted for other business models

Retooling HR John W. Boudreau,2010 HR professionals have made major strides toward becoming strategic partners But they need to do more by generating value through savvy decisions about talent HR leaders typically assume that to make such decisions they must develop sophisticated analytical tools from scratch Even then the resulting tools often fail to engage their peers In Retooling HR John Boudreau shows how HR leaders can break this cycle by adapting powerful analytical tools already used by other functions to the unique challenges of talent management Drawing on his research and examples from companies including Google Disney IBM and Microsoft Boudreau explains six proven business tools leaders already use And he shows how HR can apply these tools to talent management Examples include Using engineering tolerances to find pivot points that job descriptions miss Using inventory and supply

chain analytics to ensure a ready supply of the right talent Applying logistics tools to optimize succession planning and leadership development Adapting consumer research tools to find untapped value in total rewards Retooling HR builds on Boudreau's bestselling book *Beyond HR* which traces HR's evolution as a decision science For HR professionals seeking to sharpen their decision making prowess this provocative new book blazes an innovative new path *US Military Innovation since the Cold War* Harvey Sapolsky, Benjamin Friedman, Brendan Green, 2009-04-28 This book explains how the US military reacted to the Revolution in Military Affairs RMA and failed to innovate its organization or doctrine to match the technological breakthroughs it brought about Many called for the transformation of the US military in the years after the end of the Cold War seeking the changes in organization and doctrine that would complete the RMA innovation and a commitment to counter insurgency peace keeping and nation building missions This volume describes the origins uses and limits of the RMA technologies examines how each of the five US armed services categorising the Special Operations as a separate service made their adjustments both to the technologies and the use of force and how the role of the civilian officials and the defense industry altered in this process of change and avoidance of change The book examines the internal politics of the services as well as civil military relations to identify the external pressures on the services for significant change in their doctrine and weapons Many have noted the failure of the services to innovate in what can be called the Second Inter war Period the years after the Cold War This book offers explanations for this failure and arguments about the possible range and desirability of military innovation in the post Cold war era This book will be of great interest to students of strategic studies US defence politics military studies and US politics Harvey M Sapolsky is Professor of Public Policy and Organization in the Department of Political Science at MIT and former Director of the Security Studies Program Benjamin H Friedman is a Research Fellow in Defense and Homeland Security Studies at the Cato Institute and a Ph D Candidate in Political Science at MIT Brendan Green is a Ph D Candidate in Political Science at MIT and an affiliate of the Security Studies Program

Schuster, Stuart J. Allen, David L. Brock, 2007-01-25 At the same time I was a junior Brand Manager at Procter Gamble worried about a much more mundane problem how to keep my products on the shelf Embedding RFID tags in the products and RFID readers in the shelf seemed like the perfect indeed the only way to do this But I needed RFID to be cheaper better and standardized in an open system In early 1999 by sheer chance I met Brock and Sarma The result was a potent meeting of minds I was looking to fund research and Brock Sarma and Siu were looking for research funding Working with Alan

Haberman of the Uniform Code Council one of the founding fathers of the UPC bar code and Allan Boath of the Gillette Company we developed a plan for a new industry funded research consortium at MIT Haberman wanted to call it the Center For Automatic Identification And Data Capture At the last minute I persuaded him to abbreviate it to the Auto ID Center But my luck with names is hit and miss inspired by the bar code I had the bad idea of calling Auto ID Center's technology UPC2 Brock and Sarma saved the day one of them I cannot remember which proposed a far better alternative EPC for electronic product code The Auto ID Center opened on October 1 1999 P G loaned me to MIT to act as Executive Director and Sunny Siu was the first Research Director

From Logistics Strategy to Macrologistics Jan Havenga, Ilse Witthöft, Anneke de Bod, Zane Simpson, 2020-05-03 Macrologistics is a strategic view of logistics as a production factor on national scales to support a shift towards sustainability The book details logistics evolution from a functional discipline to a value chain optimiser and ultimately an enabler of sustainability including the evolution of metrics to support this shift Macrologistics instrumentation involves striving towards the lowest total cost of ownership for national economies where to improve decision making these costs should ultimately include the societal and ecological costs incurred due to logistics activities From Logistics Strategy to Macrologistics represents macrologistics research outputs for a number of developing economies identifying distinctive macrologistics policy and infrastructure investments themes to address national logistics challenges in developing economies The book culminates in a discussion on the potential future role of logistics to support the shift to a more sustainable society where an acceptance of a degrowth paradigm might be required and even advisable for a more secure fulfilling future Logistics and economics scholars researchers and practitioners should steer their work towards contributing to the development of an ecologically sustainable society where resources and returns are shared widely sustainably and equitably

Selected Rand Abstracts Rand Corporation, 2000 Includes publications previously listed in the supplements to the Index of selected publications of the Rand Corporation Oct 1962 Feb 1963 *Dollars and Sense* Marygail K. Brauner, 2000 As the Army has implemented initiatives to improve its basic logistics processes it has found that these processes are hampered by a financial management system that is slow and inaccurate and that creates errors and delays This report documents analysis supporting the Army's effort to improve its logistics financial management FM processes using Velocity Management's Define Measure Improve methodology In defining the FM process researchers developed process maps that showed that the delivery of conflicting information from the supply and finance systems forces units to create time consuming manual reconciliation processes to determine their remaining budgets Researchers identified metrics to measure performance To improve the quality of price and credit information and eliminate the need for manual reconciliation the researchers recommended that when a transaction is first undertaken the prices and credits should be used for all records of the transaction
