Fortifications and Siegecraft Jeremy Black, 2018-05-25 As centers for defense and bases for attack since ancient times fortifications are a crucial aspect of military history Indeed as Jeremy Black shows the history of fortifications is a global history of humanity itself Moreover their remains offer a still potent often dramatic testimony to the past notably through the strength of the sites the power of the works and the vast resources they required This compelling book explores not only the history of fortifications themselves but also the real and potential threat to them posed by siegecraft Tracing the interaction of attack and defense over time Black situates the evolution of fortifications within the wider development of governments societies and cultures Moreover his examination of the future of these installations as well as of potential methods of destroying them only reaffirms their omnipresence in human history and their continued importance Fortifications are not simply relics of the past but rather elements fundamental to military and social interaction across the world today

Defense Spending, Natural Resources, and Conflict Christos Kollias, Hamid E. Ali, 2017-10-02 This book is an intellectual contribution of policy scientists and

researchers from different academic institutions in different parts of the world The Arab Spring the rise of ISIS and terrorism ignite the debate on studying conflict and natural resources Uniquely the book discusses the sources of the conflicts and the institutions that are managing the conflicts The natural resources defense spending conflict and human welfare are intertwined In support of the resource curse hypothesis the book shows that an abundance of natural resources particularly oil encourages an increase in military spending and lower economic growth In addition the good economic and political institutions do reduce the hazard of conflict and strong political institutions for checks and balances appear to weaken the impact of natural resources on conflicts The book also examines the relationship between defense and social welfare expenditures specifically health and education Shedding light on the complicated nature of the relationship between defense spending inequality and types of political and welfare regimes gives us a deeper understanding of the type of democratic systems that will likely improve social welfare In studying the political economy of defense spending the book shows the link between public opinion toward defense spending and voters support for candidates The analysis shows that party identification or having a vested interest in defense industries do correlate with a preference for increasing defense spending This book was published as a special issue of Defence and Peace Economics *Exploding the Myth?* Derek Braddon, 2014-02-25 From a cold war peak of some 1000 billion per annum world military expenditure has declined by about 40% since 1990 reaching its lowest level for thirty years With such significant decline in global public expenditure commitments to the defence sector a substantial and lasting peace dividend was anticipated Most governments believed that market forces left more or less to their own devices would deal effectively with this major exogenous shock and generate sufficient new economic activity to allow increased public expenditure on health education and welfare The approach of this book is to challenge the fundamental but flawed belief that a substantial and lasting peace dividend could be secured through market solution alone The principal assertion is that market adjustment by itself cannot deliver such a dividend The book focuses on the major aspects of the economic business and security consequences of post Cold War defence expenditure reduction Key problems obstructing optimal market response are identified and possible remedial action by government and others is considered *Safety and Security Engineering VI* C.A. Brebbia, F. Garzia, D. Poljak, 2015-05-06 This book contains the proceedings of the sixth in a series of interdisciplinary conferences on safety and security engineering The papers from the biennial conference first held in 2005 include the work of engineers scientists field researchers managers and other specialists involved in one or more aspects of safety and security The papers presented cover areas such as Risk Analysis Assessment and Management System Safety Engineering Incident Management Information and Communication Security Natural Disaster Management Emergency Response Critical Infrastructure Protection Public Safety and Security Human Factors Transportation Safety and Security Modelling and Experiments Security Surveillance Systems **Routledge Library Editions: British Sociological Association** Various, 2021-07-14 The volumes in this set originally published
