Challenges to Global Security

Hussein Solomon, 2007-10-24 Ours is an age of great upheaval where change sometimes appears to be the only constant. Three of the most important forces driving such change are globalization, regionalization and democratization. This substantial work makes a concerted attempt to understand these forces and to show how they impact on the vitally important question of global security. The volume brings together a wide range of scholars who hold diverse views and who collectively make a very significant contribution to current discourses within international relations and contemporary geopolitics. Such is the book's breadth that it covers every region of the world, addressing in turn security problems in the USA, Latin America, South Asia, South East Asia, Europe, Russia and environs, the Middle East and Africa. Each discourse receives substantial coverage from economics and politics to religion, religious fundamentalism and human rights. Challenges to Global Security offers one of the richest comparative volumes yet to be published on the subject and will have strong appeal to students, scholars and policymakers in the fields of international relations, ethics and politics.

The Foreign Policies of Arab

States 'Alī al-Dīn Hilāl, 2010 This is an indispensable aid for those studying or teaching the foreign policies of the contemporary Middle East. Not only are the elements of foreign policy discussed and presented as a whole region but the editors provide the established analytical framework by which each contributor in their individual chapters has analyzed and evaluated the foreign policies of nine Arab countries. Their framework perceives foreign policy in the context of its environment, domestic, regional and global. This edition has new material reflecting the earth-shaking events at the end of the Cold War and the continuation of violence and terrorism.

Foreign Relations of the United States, 1951: The Near East and

Africa, 1977 **Human Rights in Libya** Giacomina De Bona, 2013 Since the end of the Cold War a democratic wave has swept through large parts of the world, propagating liberal values and giving impetus to the case for human rights in an international society. To date, however, the promotion of human rights has presented a mixed account with some countries lagging behind others in terms of their observance. In an effort to account for these differences, this book analyzes the relationship between norms and the social construction of international society and examines how human rights are promoted in that context. Focussing on Libya as a case study, Giacomina De Bona criticises the neo-realist approach by demonstrating the impact of international society on the advancement of human rights. Libya has related to the international environment in different ways over time, ranging from isolation to reconciliation and regime change, making it a particularly interesting example. This book is of particular relevance in light of the recent Arab Spring and raises the question as to whether the coercive imposition of the Western liberal model contributes to establishing respect for human rights in what continue to be the peripheral zones of international society.

Security Challenges in the Mediterranean Region Roberto

Aliboni, George Joffe, Tim Niblock, 2013-04-03 Contributions to this book question the concept of the clash of cultures. The

challenge to the West does not lie in the monolith of Islam turning aggressively outward to Europe and the US but in the rivalries between regimes ruling over societies divided by an imbalance in wealth and power

Foreign Relations of the United States, 1949: The Near East, South Asia, Africa, 1976 Near East and North Africa - Regional Overview of Food Security and Nutrition, 2022 Food and Agriculture Organization of the United Nations, International Fund for Agricultural Development, United Nations Children's Fund, World Food Programme, World Health Organization, United Nations Economic and Social Commission for West Asia, 2023-03-29

This year's report presents evidence that Arab States face significant challenges in achieving Sustainable Development Goal 2 targets related to hunger food security and nutrition as undernourishment moderate or severe food insecurity and malnourishment are increasing Child wasting and overweight are higher and adult obesity is double the global average LDCs and conflict affected countries suffer from even more severe hunger and malnutrition including child stunting wasting and women's anaemia The report also provides the first assessment of the cost and affordability of a healthy diet since the outbreak of the COVID 19 pandemic which shows a growing trend in the price of nutritious diets in recent years and that more than half the Arab population cannot afford a healthy diet The Ukraine crisis which has triggered food shortages and increased food price inflation further adds to the burden on the region This year the report focuses on how trade can enable regional food security and nutrition Arab countries rely significantly on imports for the essential food items necessary for diverse and healthy diets that they cannot locally produce in sufficient quantities due to limited natural resource endowments It discusses the role of trade and trade facilitation as essential enablers of all four dimensions of food security and nutrition It also underlines how tariffs and non tariff measures influence the economic access to food in the area On the other hand countries that depend on trade may become more exposed to outside shocks as the pandemic and the Ukraine crisis have highlighted The report assesses Arab countries vulnerabilities such as import dependency and lack of supplier diversification To reduce the exposure to such external shocks international trade must be carefully managed sources of imports should be diversified and international trade relations must be expanded to include new partners and markets The report concludes with further policy recommendations that aim for the better integration of trade into food security and nutrition policies in the region

Near and Middle Eastern Series United States Department of State, 1949 **Emerging Security Threats in the Middle East** Ashok Swain, Anders Jägerskog, 2016-04-12

Increasingly the Middle East and its growing population face a highly complex and fragile security system The rich deposits of natural resources such as oil and gas suffer from a strained renewable resource base that includes water and arable land This leads to water scarcity desertification and land degradation Increasing population industrialization and urbanization put more and more demand on the food supply Energy insecurity may not be generally associated with the Middle East but the countries in the eastern Mediterranean part have been traditionally vulnerable to it as their fossil fuel endowments have been low Another issue is the large scale temporary labor migration and the large

number of forced migrants refugees and internally displaced persons The book analyzes these emerging security challenges in a comprehensive and systematic manner It draws national and regional security issues into both the global security and human security perspectives *Bound to Cooperate - Europe and the Middle East* Sven Behrendt, Christian-Peter Hanelt, 2010-07-30 Regional integration and the organisation of cross regional relations have been some of the most prominent features of international relations By further strengthening the institutions of the European Union Europe is taking steps to become a capable international actor Only in few world regions such as the Middle East integration has not been a driving force moving political and economic relations Given these structural imbalances between Europe and the Middle East but also geographical proximity economic interdependencies and shared historical experiences what interests does Europe pursue in the Middle East And if the goal of European policies is to establish stable political economic and social relations with its neighbouring region how could inter regional relations best be organised **Regional Security Dialogue in the Middle East** Chen Kane, Egle Murauskaite, 2014-07-25 At this time of considerable political turmoil in the Middle East there is a pressing need to explore alternative frameworks for regional security The book discusses the Helsinki Process as one potentially relevant historical model to learn from The Helsinki Process began in a divided Europe in the early 1970s and over 40 years achieved major successes in promoting cooperation between the Warsaw Pact and NATO member states on social human rights security and political issues In this volume established Middle East experts former diplomats and emerging scholars assess the regional realities from a broad range of perspectives and with the current momentum for reform across the Middle East chart a path towards a comprehensive mechanism that could promote long term regional security Providing a gamut of views on regional threat perception and suggesting ways forward for regional peace this book is essential reading for students and scholars with an interest in Politics the Middle East and Conflict Studies Changing Transatlantic Security Relations Jan Hallenberg, Håkan Karlsson, 2006-09-27 This new book shows how the idea of a strategic triangle can illuminate the security relationships among the United States the European Union and Russia in the greater transatlantic sphere This concept highlights how the relationships among these three actors may on some issues be closely related A central question also follows directly from the use of the notion of the triangle does the EU have actor capability in this policy sphere or will it get it in the future The reason this is so important for our project is that only if the Union is regarded by the two other actors and regards itself as an actor in security policy does the strategic triangle really exist Consequently this book has a strong focus upon the development of the actor capability of the Union In the case of the United States it examines to what extent the concept of the strategic triangle has significance under each of five grand strategies that serve as alternative visions of the superpower's role in the world **Turkey - Anglo-American Security Interests, 1945-1952** Ekavi Athanassopoulou, 2013-02-01 This book aims to enhance our understanding of how American presence came to become consolidated through NATO in the eastern Mediterranean in the early cold war period by examining how

American and British security considerations toward the region evolved between 1947 and 1952 and the impact Turkey's pressure had on American and British security thinking *Building Regional Security in the Middle East* Emily B.

Landau, Tamar Malz, Zeev Maoz, 2004-11-23 Discussions on regional security were initiated in the Middle East in 1992 as part of the Middle East peace process. The collapse of the Oslo process and other regional developments in the latter half of the 1990s have diminished hopes that the initial gains made in this direction might further develop as violence has again become the primary mode of effecting political changes in the region. On the backdrop of this somewhat dismal current reality in the Middle East, the rationale for this volume is that research into regional security structures should nevertheless be pursued. When looking at the long term process of creating regional security, setbacks are not unlikely. The articles that make up this collection focus on the problems that have been encountered and possible directions for getting regional efforts back on track. A special issue of the *Journal of Strategic Studies* **International Security Assistance Act of 1976** United States.

Congress. House. Committee on International Relations, 1976 **The New Politics of Energy Security in the European Union and Beyond** Andrea Prontera, 2017-05-18 Combining theoretical reflections and empirical insights from paradigmatic case studies in the area of external energy governance, pipeline politics, Liquefied Natural Gas development and offshore petroleum policy and politics, this ground breaking study demonstrates that a distinctive and new politics of energy security is definitively emerging in the European Union. Innovative not only in regard to the case studies presented which include the Caspian region, the Baltic Mediterranean countries, Central Asia and EU Russia relations, but also in regard to the analytical framework adopted, an International Political Economy approach informed by an historical institutional perspective, the book challenges the common view of the depoliticisation of energy security supported by the mainstream market approach and the power politics and zero sum game view supported by the geopolitical perspective. This book places the study of EU energy politics in the broader evolving context of global energy markets and explores the complex interactions between EU and national political dynamics and between energy security and environmental concerns at the local level Renewable Energy in the Middle East Michael Mason, Amit Mor, 2009-08-28 Energy insecurity is not normally associated with the Middle East. However, away from the oil rich Persian Gulf, the countries of the eastern Mediterranean are particularly vulnerable. Their fossil fuel endowments are low while their fractious relationships with each other have long fostered wider political insecurities. Focusing on the Jordan Basin, Israel, the Palestinian Territories, Lebanon and Jordan, this timely volume addresses the prospects for the adoption of renewable energy in the oil poor Middle East. Featuring regional energy experts, it offers an invaluable survey. After outlining the regional security context, this book first reviews renewable energy policy and practices in the Jordan Basin. It then considers options for greening energy use, including promising pilot projects in North Africa. The initiatives discussed encompass renewable energy finance, energy efficient rural communities and solar and wind energy. There is significant potential for an increase in the uptake of renewable energy technologies in the eastern Mediterranean.

This window of opportunity has been created by high oil prices energy infrastructure investment opportunities and the UN climate change regime In conclusion the book considers the institutional conditions for collaborative decision making on renewable energy Such cooperation would deliver substantial security and human development benefits to the region and indeed the world **The Future Security Environment in the Middle East** Nora Bensahel, Daniel Byman, 2004-03-12

This report identifies several important trends that are shaping regional security It examines traditional security concerns such as energy security and the proliferation of weapons of mass destruction as well as newer challenges posed by political reform economic reform civil military relations leadership change and the information revolution The report concludes by identifying the implications of these trends for U S foreign policy *Integrated Water Resources Management and Security in the Middle East* Clive Lipchin, Eric Pallant, Danielle Saranga, Allyson Amster, 2007-05-06 Integrated Water Resources Management and Security in the Middle East brings together diverse voices relating to the critical issue of water management in one of the world s most politically volatile areas the Middle East The book brings together Palestinian Israeli Jordanian and international expert opinions on creating a holistic and comprehensive view of water management challenges and strategies in an area of conflict and resource scarcity The book takes security studies to the next level beyond military preparedness to address the security implications of the most fundamental of resources that of water Indeed the book delves deeply into the underlying ideological underpinnings of various water regimes and possible opportunities for new decision making models and regional cooperation This book serves an important place in the scholarly literature on this topic for its breadth of participants and perspectives and its concrete steps forward It moves the academic discourse beyond pointing fingers and toward constructive solutions and dialogue
