Burns,1990 Silvics of North America Russell M. Burns,1990 Forest and Stream ,1898 **Faith in a Seed** Henry D. Thoreau,1993-03-01 Faith in a Seed contains the hitherto unpublished work The Dispersion of Seeds one of Henry D Thoreau s last important research and writing projects and now his first new book to appear in 125 years With the remarkable clarity and grace that characterize all of his writings

Thoreau describes the ecological succession of plant species through seed dispersal *The Dispersion of Seeds* which draws on Charles Darwin's theory of natural selection refutes the then widely accepted theory that some plants spring spontaneously to life independent of roots cuttings or seeds As Thoreau wrote Though I do not believe a plant will spring up where no seed has been I have great faith in a seed Convince me that you have a seed there and I am prepared to expect wonders Henry D Thoreau's *Faith in a Seed* was first published in hardcover in 1993 by Island Press under the Shearwater Books imprint which unifies scientific views of nature with humanistic ones This important work the first publication of Thoreau's last manuscript is now available in paperback *Faith in a Seed* contains Thoreau's last important research and writing project *The Dispersion of Seeds* along with other natural history writings from late in his life Edited by Bradley P Dean professor of English at East Carolina University and editor of the *Thoreau Society Bulletin* these writings demonstrate how a major American author at the height of his career succeeded in making science and literature mutually enriching *Made for Each Other* Ronald M. Lanner, 1996 In *Made for Each Other A Symbiosis of Birds and Pines* Ronald M Lanner details for the first time this fascinating relationship between wingless seeded pine trees and seed dispersing Corvids nutcrackers and jays showing how mutualism can drive not only each others evolution but affect the ecology of many other members of the surrounding ecosystem as well In a complex process of mutual dependency myriad species of both plants and animals from Engelmann spruce elk and moose to red squirrels bear and fungi advance the overall life cycle by taking advantage of the ecological terrain that precedes them Focusing on the Rocky Mountains and the American Southwest and ranging as far afield as the Alps Finland Siberia and China this beautifully illustrated and gracefully written work illuminates the phenomenon of co evolution
