Seeing New Worlds:

Representing the New World J. Hart, 2001-09-15 *Representing the New World* argues for the importance of Spain in the New World as an example of France and England in their efforts to establish colonies and suggests that this example was ambivalent and contradictory as well as surprisingly persistent in the representations of Spain in French and English texts concerning the Americas

Russia and the New World Disorder Bobo Lo, 2015-08-17 A Brookings Institution Press and Chatham House publication The Russian annexation of Crimea was one of the great strategic shocks of the past twenty five years For many in the West Moscow's actions in early 2014 marked the end of illusions about cooperation and the return to geopolitical and ideological confrontation Russia for so long a peripheral presence had become the central actor in a new global drama In this groundbreaking book renowned scholar Bobo Lo analyzes the broader context of the crisis by examining the interplay between Russian foreign policy and an increasingly anarchic international environment He argues that Moscow's approach to regional and global affairs reflects the tension between two very different worlds the perceptual and the actual The Kremlin highlights the decline of the West a resurgent Russia and the emergence of a new multipolar order But this idealized view is contradicted by a world disorder that challenges core assumptions about the dominance of great powers and the utility of military might Its lesson is that only those states that embrace change will prosper in the twenty first century A Russia able to redefine itself as a modern power would exert a critical influence in many areas of international politics But a Russia that rests on an outdated sense of entitlement may end up instead as one of the principal casualties of global transformation

Seeing Beyond Sarah-Jane Biggart, 2021-11-16 Activate your prophetic senses and operate in the invisible realm today Imagine having access to the unseen spiritual dimension In fact the Bible is clear that this should be every believer's daily experience As a citizen of the Kingdom of God your inheritance is the ability to see sense and operate in the invisible realm of

New World Monkeys Alfred L. Rosenberger, 2020-09 This book is a broad synthesis of new world monkey evolution integrating their unique evolutionary story into the bigger picture of primate evolution and Amazon biodiversity Capsule For more than 30 million years New World monkeys have inhabited the forests of South and Central America Whether these primates originally came from Africa by rafting across the Atlantic or crossing overland from North America they soon flourished This book tells the story of these New World monkeys Integrating data from fossil and living animals it explores the evolution of the three major New World monkey lineages as well as how they fit into the broader story of primate evolution and Amazon biodiversity After providing readers with necessary background in primate taxonomy and systematics Rosenberger shows that the notion of adaptive zones is central to our understanding of primate evolution The idea of adaptive zones can explain how radiations evolve morphological adaptations appear and communities form From here Rosenberger synthesizes what is known about New World monkeys unique ecological adaptations including those involving feeding and locomotion as well as their social behaviour The book's concluding chapters explore theories of how primates

first arrived in South America and what their future looks like given the threat of extinction Biography Internal Use Only

Alfred L Rosenberger is Professor Emeritus of Biological Anthropology at Brooklyn College An expert on the origin and evolution of New World Monkeys Rosenberger has contributed numerous articles in edited volumes and his work is published in journals such as Nature Journal of Human Evolution and American Journal of Primatology Audience The audience for this book is scholars and graduate students in biological physical anthropolog and primatology and to a lesser extent conservation biology evolutionary biology and behavioral ecology Rationale no copy text Other Relevant Info no copy text **Science and Empire in the Atlantic World** James Delbourgo,Nicholas Dew,2008-09-25 Science and Empire in the Atlantic World is the first book in the growing field of Atlantic Studies to examine the production of scientific knowledge in the Atlantic world from a comparative and international perspective Rather than focusing on a specific scientific field or single national context this collection captures the multiplicity of practices people languages and agendas that characterized the traffic in knowledge around the Atlantic world linking this knowledge to the social processes fundamental to colonialism such as travel trade ethnography and slavery **Learning to See** Richard Christensen,2022-03-03 Teaching in the southern African nation of Botswana in the early 1980s Richard Christensen faced a new world one endlessly fascinating and challenging Experiencing warm hospitality from many people sharing both joyful celebrations and painful struggles with students he and his family encountered a deeper sense of the true meaning of community Travel in apartheid South Africa and war weary Zimbabwe gave him a fuller understanding of the reality of oppression and how people of faith endured their plight and kept hope alive In this experience so surprising in many ways he came to a deepened realization of the genuine freedom of the gospel and the hope it affords us He saw that relationships are what save us that the salvation of God in Christ is not merely personal and individual but communal and that we are thus more dependent upon one another than we realize Learning to see the world with new eyes he discovered not only a more expansive vision of the church and the world but also a more honest and complete understanding of himself as a product of an affluent and segregated society The Cambridge Companion to Literature and the Environment Louise Westling,2014 This authoritative collection of rigorous but accessible essays investigates the exciting new interdisciplinary field of environmental literary criticism The Art of God Christopher Irvine,2005 **Queer Environmentality** Dr Robert Azzarello,2013-05-28 Offering a model for meaningful dialogue between queer studies and environmental studies Robert Azzarello s book traces a queer environmental lineage in American Romantic and post Romantic literature Azzarello challenges the notion that reading environmental literature is unsatisfying in terms of aesthetics and proposes an understanding of literary environmentalism that is rich in poetic complexity With the term queer environmentality Azzarello points towards a queer sensibility in the history of environmental literature to balance the dominant narrative that reading environmental literature is tantamount to witnessing a spectacular dramatization of heterosexual teleology Azzarello s study treats four key figures in the American literary tradition Henry David Thoreau

Herman Melville Willa Cather and Djuna Barnes Each of these writers problematizes conventional notions of the strange matrix between the human the natural and the sexual They brilliantly demonstrate the ways in which the queer project and the environmental project are always connected or put another way show that questions and politics of human sexuality are always entwined with those associated with the other than human world **Brian Aldiss** Michael R. Collings,1986-01-01 A guide to Aldiss s fictional output from the 50 s to the 80 s **Suspect Relations** Kirsten Fischer,2002 Over the course of the eighteenth century race came to seem as corporeal as sex Kirsten Fischer has mined unpublished court records and travel literature from colonial North Carolina to reveal how early notions of racial difference were shaped by illicit sexual relationships and the sanctions imposed on those who conducted them Fischer shows how the personal and yet often very public sexual lives of Native American African American and European American women and men contributed to the new racial order in this developing slave society Liaisons between European men and native women among white and black servants and between servants and masters as well as sexual slander among whites and acts of sexualized violence against slaves were debated denied and recorded in the courtrooms of colonial North Carolina Indentured servants slaves Cherokee and Catawba women and other members of less privileged groups sometimes resisted colonial norms making sexual choices that irritated neighbors juries and magistrates and resulted in legal penalties and other acts of retribution The sexual practices of ordinary people vividly bring to light the little known but significant ways in which notions of racial difference were alternately contested and affirmed before the American Revolution Fischer makes an innovative contribution to the history of race class and gender in early America by uncovering a detailed record of illicit sexual exchanges in colonial North Carolina and showing how acts of resistance to sexual rules complicated ideas about inherent racial difference

Doty,2020-10-05 The nineteenth century saw a marked change in how Americans viewed and understood the human form These new ways of understanding the body reflect how Americans were beginning to see the body s constituent parts as interconnected From the transcendentalists idealized concept of self to the rise of Darwinian theory after the Civil War the era and its writers redefined the human body as both deeply reactive and malleable Josh Doty explores antebellum American conceptions of bioplasticity the body s ability to react and change from interior and exterior forces and argues that literature helped to shape the cultural reception of these ideas These new ways of thinking about the body s responsiveness to its

surroundings enabled exercise fanatics cold water bathers cookbook authors and everyday readers to understand the tractable body as a way to reform the United States at the physiological level Doty weaves together analysis of religious texts nutritional guides and canonical literature to show the fluid relationship among bodies literature and culture in nineteenth century America

The Population Crisis and the Use of World Resources Stuart Mudd,2013-12-11 Environmental Practice and Early American Literature Michael Ziser,2013-07-29 This original and provocative study tells the story of American literary history from the perspective of its environmental context Weaving together close readings of early American texts with ecological histories of tobacco potatoes apples and honey bees Michael Ziser presents a method for literary criticism that explodes the conceptual distinction between the civilized and natural world Beginning with the English exploration of Virginia in the sixteenth century Ziser argues that the settlement of the New World and the cultivation and exploitation of its bounty dramatically altered how writers used language to describe the phenomena they encountered on the frontier Examining the work of Harriot Grainger Cooper Thoreau and others Ziser reveals how these authors whether consciously or not transcribed the vibrant ecology of North America and the ways that the environment helped codify a uniquely American literary aesthetic of lasting importance

Victory: Into the Fire Harold Coyle,Harold Robbins,R. J. Pineiro,2004-05-16 Harold Coyle takes us to the fierce fighting in the Pacific where the Japanese and the Americans clash over a strategic airfield on the island of Guadalcanal Their battlefield will earn the nickname Bloody Ridge from both sides Harold Robbins takes us back to a time when victory could be had on the Normandy beaches if a reluctant hero managed to stop the Master of Europe with his blood R J Piniero brings the Eastern Front to light as a young American pilot is ordered to train Russian pilots in the new American made P 39D Aircobras during the final months of the brutal battle of Stalingrad in the winter of 1942

The Early Modern Global South in Print Sandra Young,2016-03-23 Early modern geographers and compilers of travel narratives drew on a lexicon derived from cartography s seemingly unchanging coordinates to explain human diversity Sandra Young s inquiry into the partisan knowledge practices of early modernity brings to light the emergence of the early modern global south Young proposes a new set of terms with which to understand the racialized imaginary inscribed in the scholarly texts that presented the peoples of the south as objects of an inquiring gaze from the north Through maps images and even textual formatting equivalences were established between new worlds many of them long known to European explorers she argues in terms that made explicit the divide between north and south This book takes seriously the role of form in shaping meaning and its ideological consequences Young examines in turn the representational methodologies or artes deployed in mapping the whole world illustrating creating charts for navigation noting down observations collecting and cataloguing curiosities reporting events formatting materials and editing and translating old sources By tracking these methodologies in the lines of beauty and evidence on the page we can see how early modern producers of knowledge were able to attribute alterity to the southern climes of an increasingly complex world while
