*Beyond Ethnicity* Camilla Fojas, Rudy P. Guevarra, Nitasha Tamar Sharma, 2018-03-31 Written by scholars of various disciplines the essays in this volume dig beneath the veneer of Hawai i s myth as a melting pot paradise to uncover historical and complicated cross racial dynamics Race is not the primary paradigm through which Hawai i is understood Instead ethnic difference is celebrated as a sign of multicultural globalism that designates Hawai i as the crossroads of the Pacific Racial inequality is disruptive to the tourist image of the islands It ruptures the image of tolerance diversity and happiness upon which tourism business and so many other vested transnational interests in the islands are based The contributors of this interdisciplinary volume reconsider Hawai i as a model of ethnic and multiracial harmony through the lens of race in their analysis of historical events group relations and individual experiences and humor among other focal points *Beyond Ethnicity* examines the dynamics between race ethnicity and indigeneity to challenge the primacy of ethnicity and cultural practices for examining difference in Hawai i while recognizing the significant role of settler colonialism This original and thought provoking volume reveals what a racial analysis illuminates about the current political configuration of the islands and in doing so challenges how we conceptualize race on the continent Recognizing the ways that Native Hawaiians or K naka Maoli are impacted by shifting violent and hierarchical colonial structures that include racial inequalities the editors and contributors explore questions of personhood and citizenship through language land labor and embodiment By admitting to these tensions and ambivalences the editors set the pace and tempo of powerfully argued essays that engage with the various ways that K naka Maoli and the influx of differentially racialized settlers continue to shift the social political and cultural terrains of the Hawaiian Islands over time

**The Deportation Machine**

Adam Goodman, 2021-09-14 By most accounts the United States has deported around five million people since 1882 but this includes only what the federal government calls formal deportations Voluntary departures where undocumented immigrants who have been detained agree to leave within a specified time period and self deportations where undocumented immigrants leave because legal structures in the United States have made their lives too difficult and frightening together constitute 90% of the undocumented immigrants who have been expelled by the federal government This brings the number of deportees to fifty six million These forms of deportation rely on threats and coercion created at the federal state and local levels using large scale publicity campaigns the fear of immigration raids and detentions to cost effectively push people out of the country Here Adam Goodman traces a comprehensive history of American deportation policies from 1882 to the present and near future He shows that one of the country s largest deportation operations expelled hundreds of thousands of people almost exclusively through the use of voluntary departures and through carefully planned fear campaigns that terrified undocumented immigrants through newspaper radio and television publicity These deportation efforts have disproportionately targeted Mexican immigrants who make up half of non citizens but 90% of deportees Goodman examines the political economy of these deportation operations arguing that they run on private transportation companies corrupt public private relations and the creation of fear based internal borders for long term undocumented residents He grounds his conclusions in over four years of research in English and Spanish language archives and twenty five oral histories conducted
