

What works is not perspective-taking but perspective-seeking: actually talking to people to gain insight into the nuances of their views. That's what good scientists do: instead of drawing conclusions about people based on minimal clues, they test their hypotheses by striking up conversations.

Congleton, Arye L. Hillman, Kai A. Konrad, 2008-08-01 The last survey of the rent seeking literature took place more than a decade ago Since that time a great deal of new research has been published in a wide variety of journals covering a wide variety of topics The scope of that research is such that very few researchers will be familiar with more than a small part of contemporary research and very few libraries will be able to provide access to the full breadth of that research This two volume collection provides an extensive overview of 40 years of rent seeking research The volumes include the foundational papers many of which have not been in print for two decades They include recent game theoretic analyses of rent seeking contests and also applications of the rent seeking concepts and methodology to economic regulation international trade policy economic history political competition and other social phenomena The new collection is more than twice as large as any previous collection and both updates and extends the earlier surveys Volume I contains previously published research on the theory of rent seeking contests which is an important strand of contemporary game theory Volume II contains previously published research that uses the theory of rent seeking to analyze a broad range of public policy and social science topics The editors spent more than a year assembling possible papers and although the selections fill two large volumes many more papers could have been included

Phenomenology and the Extreme Sport Experience Eric Brymer,Robert Schweitzer,2017-03-27 Understanding the motivations behind those who partake in extreme sports can be difficult for some If the popular conception holds that the incentive behind extreme sports participation is entirely to do with risking one s life then this confusion will continue to exist However an in depth examination of the phenomenology of the extreme sport experience yields a much more complex picture This book revisits the definition of extreme sports as those activities where a mismanaged mistake or accident would most likely result in death Extreme sports are not necessarily synonymous with risk and participation may not be about risk taking Participants report deep inner transformations that influence world views and meaningfulness feelings of coming home and authentic integration as well as a freedom beyond the everyday Phenomenologically these experiences have been interpreted as transcendent of time other space and body Extreme sport participation therefore points to a more potent life enhancing endeavour worthy of further investigation This book adopts a broad hermeneutic phenomenological approach to critique the assumed relationship to risk taking the death wish and the concept of No Fear in extreme sports and repositions the experience in a previously unexplored manner This is valuable reading for students and academics interested in Sports Psychology Social Psychology Health Psychology Tourism Leisure Studies and the practical applications of phenomenology
