Russian Archaism Irina Shevelenko,2024-08-15 Russian Archaism considers the aesthetic quest of Russian modernism in relation to the nation building ideas that spread in the late imperial period Irina Shevelenko argues that the cultural milieu in Russia where the modernist movement began as an extension of Western trends at the end of the nineteenth century soon became captivated by nationalist indoctrination Members of artistic groups critics and theorists advanced new interpretations of the goals of aesthetic experimentation that would allow them to embed the nation building agenda within the aesthetic one Shevelenko's book focuses on the period from the formation of the World of Art group 1898 through the Great War and encompasses visual arts literature music and performance As Shevelenko shows it was the rejection of the Russian westernized tradition informed by the revival of populist sensibilities across the educated class that played a formative role in the development of Russian modernist agendas particularly after the 1905 revolution Russian Archaism reveals the modernist artistic enterprise as a crucial source of insight into Russia's political and cultural transformation in the early twentieth century and beyond

Offord,2010-04-01 The history of ideas has played a central role in Russia's political and social history. Understanding its intellectual tradition and the way the intelligentsia have shaped the nation is crucial to understanding the Russia of today. This history examines important intellectual and cultural currents: the Enlightenment, nationalism, nihilism, and religious revival, and key themes: conceptions of the West and East, the common people, and attitudes to capitalism and natural science in Russian intellectual history. Concentrating on the Golden Age of Russian thought in the mid nineteenth century, the contributors also look back to its eighteenth century origins in the flowering of culture following the reign of Peter the Great and forward to the continuing vitality of Russia's classical intellectual tradition in the Soviet and post Soviet eras. With brief biographical details of over fifty key thinkers and an extensive bibliography, this book provides a fresh, comprehensive overview of Russian intellectual history.

Decadence and Modernism in European and Russian Literature and Culture Jonathan Stone,2019-12-12 Decadence and Modernism in European and Russian Literature and Culture: Aesthetics and Anxiety in the 1890s rewrites the story of early modernist literature and culture by drawing out the tensions underlying its simultaneous engagement with Decadence and Symbolism: the unsustainable combination of this world and the other. With a broadly framed literary and cultural approach, Jonathan Stone examines a shift in perspective that explodes the notion of reality and showcases the uneasy relationship between the tangible and intangible aspects of the surrounding world. Modernism quenches a growing fascination with the ephemeral and that which cannot be seen while also doubling down on the significance of the material world and finding profound meaning in the physical and the corporeal. Decadence and Symbolism complement the broader historical trajectory of the fin de siècle by affirming the novelty of a modernist mindset and offering an alternative to the empirical and positivistic atmosphere of the nineteenth century. Stone seeks to recreate a significant historical and cultural moment in the development of modernity: a moment that embraces the concept of Decadence while repurposing its aesthetic and social import to help navigate the fundamental changes that accompanied the dawn of the twentieth century.

From Onomatodoxy to Aesthetics: Aleksei Losev's Concept of Symbol Teresa Obolevitch,2025-05-08 In *From Onomatodoxy to Aesthetics: Aleksei Losev's Concept of Symbol*, Teresa Obolevitch analyzes the category of symbol in broad historical and philosophical context, with a focus on Losev's exploration of symbol over his prolific and tragic career. A survivor of the Stalinist camps, Losev is recognized as the last classic of Russian Silver Age philosophy. This book addresses Losev's critical role within the divisive debate over *onomatodoxy* (*imiaslavie*) or the divine name, which occupied the minds of Russian thinkers in the early nineteenth century. Obolevitch presents the ancient and patristic roots of *onomatodoxy* and elucidates its importance for Losev's work in a range of fields, including aesthetics.

mathematics philosophy of language and religion Losev's work revolves around the possibility of expressing reality in language and his conception of symbol reflects both the apophatic aspect of Logos as well as the possibility for new interpretations of reality
