The Policy Space in International Intellectual Property Law Emmanuel Kolawole Oke, 2022-04-19 The Policy Space in International Intellectual Property Law presents a critical and original examination of the policy space in international intellectual property law through the unique lens of glocalisation. Distinguishing between the unregulated local space and the regulated glocal space as distinct components of this policy space it contends that it is within the glocal space that states can resist or adapt the globalising waves flowing from the international intellectual property system. It discusses both the contours and the components of this glocal space. It further highlights the important role that the WTO's adjudicatory bodies play in preserving this glocal space in international intellectual property law.

Negotiating Health Pedro Roffe, Geoff Tansey, David Vivas-Eugui, 2012-04-27 In developing countries access to affordable medicines for the treatment of diseases such as AIDS and malaria remains a matter of life or death. In Africa for instance more than one million children die each year from malaria alone a figure which could soon be far higher with the extension of patent rules for pharmaceuticals. Previously access to essential medicines was made possible by the supply of much cheaper generics manufactured largely by India from 2005 however the availability of these drugs is threatened as new WTO rules take effect. Halting the spread of malaria and HIV/AIDS is one of the eight Millennium Goals adopted at the UN Millennium Summit which makes this a timely and topical book. Informed analysis is provided by internationally renowned contributors who look at the post 2005 world and discuss how action may be taken to ensure that intellectual property regimes are interpreted and implemented in a manner supportive to the right to protect public health and in particular to promote access to medicines for all.
