Looking For A Wave:

Fields and Waves in Electromagnetic Communications Nemai Chandra Karmakar, 2023-04-11
FIELDS AND WAVES IN ELECTROMAGNETIC COMMUNICATIONS A vital resource that comprehensively covers advanced topics in applied electromagnetics for the professional Electromagnetism EM is a highly abstract and complex subject that examines how exerting a force on charged particles is affected by the presence and motion of adjacent particles The interdependence of the time varying electric and magnetic fields one producing the other and vice versa has allowed researchers to consider them as a single coherent entity the electromagnetic field Under this umbrella students can learn about numerous and varied topics such as wireless propagation satellite communications microwave technology EM techniques antennas and optics among many others Fields and Waves in Electromagnetic Communications covers advanced topics in applied electromagnetics for the professional by offering a comprehensive textbook that covers the basics of EM to the most advanced topics such as the classical electron theory of matters the mechanics model and macroscopic model Specifically the book provides a welcome all in one source on wireless and guided EM that deals in a wide range of subjects transmission lines impedance matching techniques metallic waveguides resonators optical waveguides optical fibres antennas antenna arrays wireless systems and electromagnetic compatibility EMC and more The content is supported with innovative pedagogy the most recent reports and working principles of relevant and contemporary technological developments including applications specialist software tools laboratory experiments and innovative design projects Fields and Waves in Electromagnetic Communications readers will also find Multiple practical examples similes and illustrations of interdisciplinary topics related to wireless and guided electromagnetism Explanations of new topics with support of basic theories connected to real world contexts and associated applications Sets of technology applications that rely on advanced electromagnetism A series of review questions and drills end of chapter problems and exercises to help enforce what was learned in each chapter Fields and Waves in Electromagnetic Communications is an ideal textbook for graduate students and senior undergraduates studying telecommunication and wireless communication It is also a useful resource for industry engineers and members of defense services Moreover the book is an excellent non specialist engineering reference able to be used in other disciplines such as biomedical engineering mechatronics computer science materials engineering civil and environmental engineering physics network engineering and wireless services

Advanced Interferometers and the Search for Gravitational Waves

Massimo Bassan, 2014-07-08 The search for gravitational radiation with optical interferometers is gaining momentum worldwide Beside the VIRGO and GEO gravitational wave observatories in Europe and the two LIGOs in the United States which have operated successfully during the past decade further observatories are being completed KAGRA in Japan or planned ILIGO in India The sensitivity of the current observatories although spectacular has not allowed direct discovery of gravitational waves The advanced detectors Advanced LIGO and Advanced Virgo at present in the development phase will

improve sensitivity by a factor of 10 probing the universe up to 200 Mpc for signal from inspiraling binary compact stars This book covers all experimental aspects of the search for gravitational radiation with optical interferometers Every facet of the technological development underlying the evolution of advanced interferometers is thoroughly described from configuration to optics and coatings and from thermal compensation to suspensions and controls All key ingredients of an advanced detector are covered including the solutions implemented in first generation detectors their limitations and how to overcome them Each issue is addressed with special reference to the solution adopted for Advanced VIRGO but constant attention is also paid to other strategies in particular those chosen for Advanced LIGO

Game AI Pro 360: Guide to Movement and Pathfinding Steve Rabin, 2019-09-10 Steve Rabin's Game AI Pro 360 Guide to Movement and Pathfinding gathers all the cutting edge information from his previous three Game AI Pro volumes into a convenient single source anthology covering movement and pathfinding in game AI This volume is complete with articles by leading game AI programmers that explore better ways to smooth paths avoid obstacles and navigate 3D space with cutting edge techniques Key Features Provides real life case studies of game AI in published commercial games Material by top developers and researchers in Game AI Downloadable demos and or source code available online

Irregularities and Prediction of Major Disasters Yi Lin, Shoucheng OuYang, 2010-03-18 Although scientists have effectively employed the concepts of probability to address the complex problem of prediction modern science still falls short in establishing true predictions with meaningful lead times of zero probability major disasters The recent earthquakes in Haiti Chile and China are tragic reminders of the critical need for

Agroclimatology Jerry L. Hatfield, Mannava V. K. Sivakumar, John H. Prueger, 2020-01-22 Can we unlock resilience to climate stress by better understanding linkages between the environment and biological systems Agroclimatology allows us to explore how different processes determine plant response to climate and how climate drives the distribution of crops and their productivity Editors Jerry L Hatfield Mannava V K Sivakumar and John H Prueger have taken a comprehensive view of agroclimatology to assist and challenge researchers in this important area of study Major themes include principles of energy exchange and climatology understanding climate change and agriculture linkages of specific biological systems to climatology the context of pests and diseases methods of agroclimatology and the application of agroclimatic principles to problem solving in agriculture

Breaking the Wave: Women, Their Organizations, and Feminism, 1945-1985 Kathleen A. Laughlin, Jacqueline Castledine, 2012-12-06 Breaking the Wave is the first anthology of original essays by both younger and established scholars that takes a long view of feminist activism by systematically examining the dynamics of movement persistence during moments of reaction and backlash Ranging from the civic feminism of white middle class organizers and the womanism of Harlem consumers in the immediate postwar period to the utopian feminism of Massachusetts lesbian softball league founders and environmentally minded feminists in the 1970s and 1980s Breaking the Wave documents a continuity of activism in both national and local organizing that creates a new discussion and a new
