Tropical Montane Cloud Forests L. A. Bruijnzeel, F. N. Scatena, L. S. Hamilton, 2011-01-06 This volume represents a uniquely comprehensive overview of our current knowledge on tropical montane cloud forests 72 chapters cover a wide spectrum of topics including cloud forest distribution climate soils biodiversity hydrological processes hydrochemistry and water quality climate change impacts and cloud forest conservation management and restoration The final chapter presents a

major synthesis by some of the world's leading cloud forest researchers which summarizes our current knowledge and considers the sustainability of these forests in an ever-changing world. This book presents state-of-the-art knowledge concerning cloud forest occurrence and status as well as the biological and hydrological value of these unique forests. The presentation is academic but with a firm practical emphasis. It will serve as a core reference for academic researchers and students of environmental science and ecology as well as practitioners, natural resources management, forest conservation and decision makers at local, national and international levels.

The excavation of shell middens and mounds is an important source of information regarding past human diet, settlement technology and paleoenvironments. The contributors to this book introduce new ways to study shell matrix sites ranging from the geochemical analysis of shellfish to the interpretation of human remains buried within. Drawing upon examples from around the world, this is one of the only books to offer a global perspective on the archaeology of shell matrix sites. A substantial contribution to the literature on the subject and essential reading for archaeologists and others who work on this type of site.
