Intelligent Skins Michael Wigginton, Jude Harris, 2013-06-17 Looking to the future

Intelligent Skins sets out the principles for the design of the intelligent building envelope

It highlights an exciting new approach to the area where the fabric of the building responds to external changes and internal demands

The prime objective is to control internal environments through a responsive building fabric rather than by energy consuming building services systems

The authors examine the potential for integral intelligence within the fabric of the building and explore the evolution of information technology and smart materials which have allowed a whole new category of design principles to be created

Behind the Scenes Francesco De Luca, Marco Nardini, 2002-09-26

Information technology has brought about a radical change in architectural design

The sketches and plans of yesterday have been transformed by CAD

In this book the authors cast a glance behind the scenes to provide a systematic overview of the tools and technical processes which are now an integral part of today's design methods

The most important digital tools are presented the principal steps are analysed and the essential concepts are explained

The theoretical information is vividly illustrated by a selection of examples from the world of architecture

A concise and accessible introduction to electronic designing this book makes the subject easily comprehensible to all who are new to the field and for those who already involved in digital designing it is a useful recapitulation and orientation

Aktivhaus - The Reference Work Manfred Hegger, Caroline Fafflok, Johannes Hegger, Isabell Passig, 2016-04-25

The first comprehensive reference work on energy independent Active Houses

The Active House is a logical development of existing building standards

It draws renewable energy from the sun and wind in order to cover energy needs as completely as possible

The basic ideas of the Active House are described in detail in this standard work and serve as a planning guide for all parties involved in the construction of Active Houses

From the principles of sustainable and energy efficient construction to planning tools and technical details the reader learns what constitutes active houses how they developed and the components required for its construction

Active House architecture is illustrated by

fourteen built works in the areas of residential non residential new construction and renovation

Interiors Construction Manual Gerhard Hausladen, Karsten Tichelmann, 2012-12-10 Soccer stadiums airports theaters museums it falls to very few architects to tackle spectacular building tasks like these The everyday work of most architects is more often focused on manageable projects like the renovation remodeling or rebuilding of single and multi family houses schools and offices Whatever the nature of the building task interior construction is always a significant design and qualitative challenge that calls for highly detailed technical expertise After all it affects the realm that will be brought to life and utilized by the user when the task is finished and whose aesthetic and functional serviceability will be put to the test each and every day The Interior Construction Manual supports planners in their daily work as a practical planning aid and reference work with the relevant standards guidelines reference details and constructional solutions all illustrated by built example projects It brings together the crucial facts on all aspects of interior construction and presents the key fundamentals of building physics fire protection interior construction systems and openings In addition it offers concrete tips on integrated planning approaches energy and sustainability issues materials used in interior construction hazardous substances and dealing with building services and light planning

Roof Construction Manual Eberhard Schunck, Hans Jochen Oster, Rainer Barthel, Kurt Kießl, 2013-01-21 the Roof Construction Manual is a comprehensive reference work on the construction of pitched roofs containing over 1800 plans and 220 photographs Thirteen fundamental roof types and the relevant materials including thatch wood slate tile concrete fibrous cement bitumen glass metal membranes and synthetic materials are documented in detail Essential topics such as ventilation vapour and wind seals insulation and drainage renovation and energy conservation are examined As with all the Construction Manuals some 38 built examples illustrate the theoretical details paying particular attention to important features such as the ridge hip eaves roof valley verge and penetration A compact presentation of the load bearing physics and structures as well as current norms and standards make this volume an indispensable standard work for all architects and engineers
