Tsongkhapa 1357 1419 is by any measure the single most influential philosopher in Tibetan history His articulation of Prasangika Madhyamaka and his interpretation of the 7th Century Indian philosopher Candrakirti s interpretation of Madhyamaka is the foundation for the understanding of that philosophical system in the Geluk school in Tibet Tsongkhapa argues that Candrakirti shows that we can integrate the Madhyamaka doctrine of the two truths and of the ultimate emptiness of all phenomena with a robust epistemology that explains how we can know both conventional and ultimate truth and distinguish truth from falsity within the conventional world The Sakya scholar Taktsang Lotsawa born 1405 published the first systematic critique of Tsongkhapa s system In the fifth chapter of his *Freedom from Extremes Accomplished through Comprehensive Knowledge of Philosophy* Taktsang attacks Tsongkhapa s understanding of Candrakirti and the cogency of integrating Prasangika Madhyamaka with any epistemology This attack launches a debate between Geluk scholars on the one hand and Sakya and Kagyu scholars on the other regarding the proper understanding of this philosophical school and the place of epistemology in the Madhyamaka program This debate raged with great ferocity from the 15th through the 18th centuries and continues still today The two volumes of *Knowing Illusion* study that debate and present translations of the most important texts produced in that context Volume I *A Philosophical History of the Debate* provides historical and philosophical background for this dispute and elucidates the philosophical issues at stake in the debate exploring the principal arguments advanced by the principals on both sides and setting them in historical context This volume examines the ways in which the debate raises issues that are relevant to contemporary debates in epistemology and concludes with two contributions by contemporary Tibetan scholars one on each side of the debate **Our Human Potential** The Dalai

Three Pillars of Skepticism in

Classical India Ethan Mills, 2018-09-15 Beginning with the earliest strata of Indian philosophy this book uncovers a distinct tradition of skepticism in Indian philosophy through a study of the three pillars of Indian skepticism near the beginning middle and end of the classical era Nagarjuna c 150 200 CE Jayarasi c 770 830 CE and Sri Har a c 1125 1180 CE Moving beyond the traditional school model of understanding the history of Indian philosophy this book argues that the philosophical history of India contains a tradition of skepticism about philosophy represented most clearly by three figures coming from different schools but utilizing similar methods Nagarjuna Jayarasi and Sri Har a This book argues that there is a category of skepticism often overlooked by philosophers today skepticism about philosophy varieties of which are found not only in classical India but also in the Western tradition in Pyrrhonian skepticism Skepticism about philosophy consists of intellectual therapies for those afflicted by the quest for dogmatic beliefs The book begins with the roots of this type of skepticism in ancient India in the g Veda Upani ads and early Buddhist texts Then there are two chapters on each of the three major figures one chapter giving each philosopher s overall aims and methods and a second demonstrating how each philosopher applies these methods to specific philosophical issues The conclusion shows how the history of Indian skepticism might help to answer philosophy s detractors today while skeptics demonstrate that we should be modest about philosophy s ability to produce firm answers philosophy nonetheless has other uses such as cultivating critical thinking skills and lessening dogmatism This book is situated within a larger project of expanding the history of philosophy Just as the history of Western philosophy ought to inform contemporary philosophy so should expanding the history of philosophy to include classical India illuminate understandings of philosophy today its value limits and what it can do for us in the 21st century The Different

Philosophy in Classical India Jonardon Ganeri,2003-09-01 This original work focuses on the rational principles of Indian philosophical theory rather than the mysticism more usually associated with it Ganeri explores the philosophical projects of a number of major Indian philosophers and looks into the methods of rational inquiry deployed within these projects In so doing he illuminates a network of mutual reference criticism influence and response in which reason is used to call itself into question This fresh perspective on classical Indian thought unravels new philosophical paradigms and points towards new applications for the concept of reason An Interdisciplinary Approach to Cognitive Modelling Partha Ghose,Sudip Patra,2023-12-05 An Interdisciplinary Approach to Cognitive Modelling presents a new approach to cognition that challenges long held views It systematically develops a broad based framework to model cognition which is mathematically equivalent to the emerging quantum like modelling of the human mind The book argues that a satisfactory

physical and philosophical basis of such an approach is missing a particular issue being the application of quantization to the mind for which there is no empirical evidence as yet In response to this issue the book adopts a COM classical optical modelling approach broad based but mathematically equivalent to quantum like modelling while avoiding its problematic features It presents a philosophically informed and empirically motivated mathematical model of cognition mainly concerning decision making processes It also deals with applications to different areas of the social sciences It will be of interest to scholars and research students interested in the mathematical modelling of cognition and decision making and also interdisciplinary researchers interested in broader issues of cognition **The Two Truths Debate** Sonam

Thakchoe,2016-01-26 All lineages of Tibetan Buddhism today claim allegiance to the philosophy of the Middle Way the exposition of emptiness propounded by the second century Indian master Nagarjuna But not everyone interprets it the same way A major faultline runs through Tibetan Buddhism around the interpretation of what are called the two truths the deceptive truth of conventional appearances and the ultimate truth of emptiness An understanding of this faultline illuminates the beliefs that separate the Gelug descendents of Tsongkhapa from contemporary Dzogchen and Mahamudra adherents The Two Truths Debate digs into the debate of how the two truths are defined and how they are related by looking at two figures one on either side of the faultline and shows how their philosophical positions have dramatic implications for how one approaches Buddhist practice and how one understands enlightenment itself **Mūlamadhyamakakārikā of**

Nāgārjuna Nāgārjuna,David J. Kalupahana,1991-01-01 This is completely new translation of Nagarjuna s major work accompanied by a detailed annotation of each of the verses The annotations identify the metaphysical theories of the scholastics criticized by Nagarjuna and trace the source material and arguments utilized in his refutation back to the early discourses of the Buddha *The Cosmic Breath* Amos Yong,2012-05-10 The interjection of pneumatology in both theologies of interreligious dialogue and in the theology and science conversation comes together in this volume The resulting Christianity Buddhism science triologue opens up to new pneumatological perspectives on philosophical cosmology and anthropology in interdisciplinary and global context
