Midir and Boann in Ériu-Land Richard Leviton, 2022-12-30 The truth of Lucifer and Sophia is the world's biggest secret said Joe To get this story right you basically have to retell the history of reality itself That's what Joe Mike and Ronald pals since childhood and now in their late sixties set out to do Lucifer and Sophia were the first two archangels ever created but their reputations today are in ruins or obscurity They want to find out why After much travelling and on site investigation they discover that the true story of these two primary archangels is not what people have thought It is the key that unlocks the purpose and destiny of the Earth The final outcome of humanity is implicated too Many diverse cultures maintain cultural images of these two figures and in many cases their images are positive uplifting even comic This trio of geomythic researchers take the Greek icon of Prometheus bound on Mount Caucasus for defying Zeus as their rallying point and seek to probe its true meaning Mythic images especially old ones need to be decoded for the modern mind They tend to have layers of meaning and you shortchange yourself if you either dismiss them or take them only on a literal basis You have to jump into them psychically put them on like clothes and get mythopoeic about these old stories Along the way as they visit sites in America the British Isles Japan Uzbekistan Zimbabwe Chile Mexico and other far flung locales they're assisted by angels Ray Masters and the genius loci of the many sites that preserve a myth of these two archangels Foremost among the places visited is Ireland the legendary Emerald Isle and it turns out this island nation anciently called Ériu Land after its presiding landscape goddess has a pivotal world role to play in the restitution of these mythic figures and the future well being of the planet and its humanity

Androids and Intelligent Networks in Early Modern Literature and Culture Kevin LaGrandeur, 2013-01-04 Awarded a 2014 Science Fiction and Technoculture Studies Prize Honourable Mention This book explores the creation and use of artificially made humanoid servants and servant networks by fictional and non-fictional scientists of the early modern period Beginning with an investigation of the roots of artificial servants humanoids and automata from earlier times LaGrandeur traces how these literary representations coincide with a surging interest in automata and experimentation and how they blend with the magical science that preceded the empirical era In the instances that this book considers the idea of the artificial factotum is connected with an emotional paradox the joy of self

enhancement is counterpoised with the anxiety of self displacement that comes with distribution of agency In this way the older accounts of creating artificial slaves are accounts of modernity in the making a modernity characterized by the project of extending the self and its powers in which the vision of the extended self is fundamentally inseparable from the vision of an attenuated self This book discusses the idea that fictional artificial servants embody at once the ambitions of the scientific wizards who make them and society's perception of the dangers of those ambitions and represent the cultural fears triggered by independent experimental thinkers the type of thinkers from whom our modern cyberneticists descend *Stars on the Earth* Richard Leviton, 2006-08-18 Discover the wonderful secret the Earth holds for us that the stars of the galaxy live on our planet Holograms of high magnitude stars over holy mountains Physical travel to other planets through stargates on the Earth's surface Near instantaneous transportation across the planet through quick way portals Outrageous science fiction or sober geomantic fact Earth Mysteries researcher Richard Leviton takes you on a wild tour of three geomantic features of our planet and reveals that what science fiction has dreamed the Earth in fact offers us Stars on the Earth combines scholarship clairvoyance and field experience with the latest discoveries of geology and astrophysics and the timeless insights of the world's myths to open the planetary door to the stars It's all part of the Earth's unsuspected but staggeringly rich endowment as a designer planet Our planet was precisely designed and implemented for us and it's equipped with a visionary geography that mirrors features of the galaxy and Heavens Why are so many of the Earth's mountains said to be holy producing visions and encounters with the gods They all have canopies of light called domes each transmitting the presence of a galactic star What is the geomantic origin of the Bermuda Triangle Two dysfunctional stargates If working properly they and the Earth's other two million stargates could transport us rapidly to other planets Is there a way to travel quickly across the planet without using cars airplanes boats or trains Yes and it's called a traversable wormhole and the Earth has thousands of them awaiting our discovery and use Come join the tour of a planet you've never seen before our own star infused Earth **Lucifer's Pocket** Brett Ashton, 2013-02 It's New Year's Eve in Times Square but something is terribly wrong Alex Marshall suddenly finds himself the only person moving in a sea of totally still and silent people He soon discovers that the world is being manipulated by powerful overlords who control every aspect of life Only a handful of people on earth are even aware that the world is under their control Back jacket cover [Applied Cryptology, Cryptographic Protocols, and Computer Security Models](#) Richard A.
