Lucifer's Hammer Jerry Pournelle, 1981-04 Captain Rick Galloway and his men had been talked into volunteering for a dangerous mission only to be ruthlessly abandoned when faceless CIA higher ups pulled the plug on the operation They were cut off in hostile territory with local troops and their Cuban advisors rapidly closing in And then the alien spaceship landed Copyright Libri GmbH All rights reserved *Lucifer's Hammer* Larry Niven, Jerry Pournelle, 1985-05-12 The first satisfying end of the world novel in years an ultimate one massively entertaining Cleveland Plain Dealer The gigantic comet had slammed into Earth forging earthquakes a thousand times too powerful to measure on the Richter scale tidal waves thousands of feet high Cities were turned into oceans oceans turned into steam It was the beginning of a new Ice Age and the end of civilization But for the terrified men and women chance had saved it was also the dawn of a new struggle for survival a struggle more dangerous and challenging than any they had ever known Take your earthquakes waterlogged condominiums swarms of bugs colliding airplanes and flaming what nots wrap them up and they wouldn't match one page of Lucifer's Hammer for sweaty palmed suspense Chicago Daily News **Armageddon Films FAQ** Dale Sherman, 2013-10-01 FAQ Mankind has been predicting its own demise through various methods from fables and religious scriptures to hard core scientific studies since the dawn of time And if there is one thing Hollywood knows how to exploit it is the fears of Things to Come Movies about the end of the world have been around since the early days of cinema and Armageddon Film FAQ is a look into the various methods we have destroyed ourselves over the years zombies mad computers uptight aliens plunging objects from space crazed animals Satan God Contagions the ever popular atomic bomb sometimes even a combination of these in the same movie Armageddon Films FAQ goes from the silent days of filmmaking to the most recent literally earth shattering epics from cinema to television and even the novels from comedies to dramas from supernatural to scientific It also explores other aspects of the genre such as iconic but unfilmable apocalyptic novels postnuclear car racing flicks domestic dramas disguised as end of the world actioners and more from the most depressing to the happiest Armageddons ever **Postapocalyptic Fiction and the Social Contract** Claire P. Curtis, 2010-07-17 Postapocalyptic Fiction and the Social Contract We'll Not Go Home Again provides a framework for our fascination with the apocalyptic events The popular appeal of the end of the world genre is clear in movies novels and television shows Even our political debates over global warming nuclear threats and pandemic disease reflect a concern about the possibility of such events This popular fascination is really a fascination with survival how can we come out alive And what would we do next The end of the world is not about species death but about beginning again This book uses postapocalyptic fiction as a terrain for thinking about the state of nature the hypothetical fiction that is the driving force behind the social contract The first half of the book examines novels that tell the story of the move from the state of nature to civil society through a Hobbesian a Lockean or a Rousseauian lens including Lucifer's Hammer by Larry Niven and Jerry Pournelle Alas Babylon by Pat Frank Malevil by Robert Merle and Into

the Forest by Jean Hegland The latter half of the book examines Octavia Butler's postapocalyptic Parable series in which a new kind of social contract emerges one built on the fact of human dependence and vulnerability **The Gods of Golf** John P. Holms, David L. Smith, 1997-06 Equal parts enchanting fable and hilarious satire The Gods of Golf puts a fresh spin on the idea of golf as a metaphor for life [A Novel Approach to Politics](#) Douglas A. Encyclopedia of Science and Technology Communication Susanna Hornig Priest, 2010-07-14 The explosion of scientific information is exacerbating the information gap between richer poorer educated less educated publics The proliferation of media technology and the popularity of the Internet help some keep up with these developments but also make it more likely others fall further behind This is taking place in a globalizing economy and society that further complicates the division between information haves and have nots and compounds the challenge of communicating about emerging science and technology to increasingly diverse audiences Journalism about science and technology must fill this gap yet journalists and journalism students themselves struggle to keep abreast of contemporary scientific developments Scientist aided by public relations and public information professionals must get their stories out not only to other scientists but also to broader public audiences Funding agencies increasingly expect their grantees to engage in outreach and education and such activity can be seen as both a survival strategy and an ethical imperative for taxpayer supported university based research Science communication often in new forms must expand to meet all these needs Providing a comprehensive introduction to students professionals and scholars in this area is a unique challenge because practitioners in these fields must grasp both the principles of science and the principles of science communication while understanding the social contexts of each For this reason science journalism and science communication are often addressed only in advanced undergraduate or graduate specialty courses rather than covered exhaustively in lower division courses Even so those entering the field rarely will have

a comprehensive background in both science and communication studies This circumstance underscores the importance of compiling useful reference materials The Encyclopedia of Science and Technology Communication presents resources and strategies for science communicators including theoretical material and background on recent controversies and key institutional actors and sources Science communicators need to understand more than how to interpret scientific facts and conclusions they need to understand basic elements of the politics sociology and philosophy of science as well as relevant media and communication theory principles of risk communication new trends and how to evaluate the effectiveness of science communication programmes to mention just a few of the major challenges This work will help to develop and enhance such understanding as it addresses these challenges and more Topics covered include advocacy policy and research organizations environmental and health communication philosophy of science media theory and science communication informal science education science journalism as a profession risk communication theory public understanding of science pseudo science in the news special problems in reporting science and technology science communication ethics Library of Famous Fiction: pt. 1 Ceasarine Dietrich ,1880 *After the End* James Berger,1999-01-01 In this study of the cultural pursuit of the end and what follows Berger contends that every apocalyptic depiction leaves something behind some mixture of paradise and wasteland Combining literary psychoanalytic and historical methods Berger mines these depictions for their weight and influence on current culture He applies wide ranging evidence from science fiction to Holocaust literature from Thomas Pynchon to talk shows from American politics to the fiction of Toni Morrison to reveal how representations of apocalyptic endings are indelibly marked by catastrophic histories **Using Medicine in Science Fiction** H. G. Stratmann,2015-09-14 This book offers a clearly written entertaining and comprehensive source of medical information for both writers and readers of science fiction Science fiction in print in movies and on television all too often presents dubious or simply incorrect depictions of human biology and medical issues This book explores the real science behind such topics as how our bodies adapt to being in space the real life feasibility of common plot elements such as suspended animation and medical nanotechnology and future prospects for improving health prolonging our lives and enhancing our bodies through technology Each chapter focuses on a single important science fiction related subject combining concise factual information with examples drawn from science fiction in all media Chapters conclude with a Bottom Line section summarizing the most important points discussed in the chapter and giving science fiction writers practical advice on how to incorporate them into their own creations including a list of references for further reading The book will appeal to all readers interested in learning about the latest ideas on a variety of science fiction related medical topics and offers an invaluable reference source for writers seeking to increase the realism and readability of their works Henry G Stratmann MD FACC FACP is a cardiologist with board certifications in internal medicine cardiology and nuclear cardiology Before entering private practice he became Professor of Medicine at St Louis University School of Medicine and performed clinical medical research Henry received a

BA in chemistry from St Louis University and his MD at Southern Illinois University School of Medicine He is currently enrolled at Missouri State University to obtain a BS in physics with a minor in astronomy His professional publications include being an author or coauthor of many research articles for medical journals primarily in the field of nuclear cardiology Henry is also a regular contributor of both stories and science fact articles to Analog Science Fiction and Fact **Ripples on the Cosmic Ocean** Dagomar Degroot,2025-10-28 Changes in cosmic environments from solar storms to asteroid impacts have altered the course of history Tracing how such events shaped geopolitics and spurred scientific and cultural innovation Dagomar Degroot asks what comes next as the solar system becomes increasingly vulnerable to human activity

Disturbing Times Catherine E. Karkov,Anna Kłosowska,Vincent W. J. van Gerven Oei,2020 From Kehinde Wiley to W E B Du Bois from Nubia to Cuba Willie Doherty s terror in ancient landscapes to the violence of institutional Neo Gothic Reagan s AIDS policies to Beowulf fanfiction this richly diverse volume brings together art historians and literature scholars to articulate a more inclusive intersectional medieval studies It will be of interest to students working on the diaspora and migration white settler colonialism and pogroms Indigenous studies and decolonial methodology slavery genocide and culturecide The authors confront the often disturbing legacies of medieval studies and its current failures to own up to those and also analyze fascist nationalist colonialist anti Semitic and other ideologies to which the medieval has been and is yoked collectively formulating concrete ethical choices and aims for future research and teaching In the face of rising global fascism and related ideological mobilizations contemporary and past and of cultural heritage and history as weapons of symbolic and physical oppression this volume s chapters on Byzantium Medieval Nubia Old English Hebrew Old French Occitan and American and European medievalisms examine how educational institutions museums universities and individuals are shaped by ethics and various ideologies in research collecting and teaching **Rumors of War and Infernal Machines** Charles E. Gannon,2005-08-11 This provocative and unique work reveals the remarkably influential role of futuristic literature on contemporary political power in America Tracing this phenomenon from its roots in Victorian Britain Rumors of War and Infernal Machines offers a fascinating exploration of how fictional speculations on emergent or imaginary military technologies profoundly influence the political agendas and actions of modern superpower states Gannon convincingly demonstrates that military fiction anticipated and even influenced the evolution of the tank the development of the airplane and also the bitter political battles within Britain s War Office and the Admiralty In the United States future fictions and Cold War thrillers were an officially acknowledged factor in the Pentagon s research and development agendas and often gave rise and shape to the nation s strategic development of technologies as diverse as automation atomic weaponry aerospace vehicles and the Strategic Defense Initiative Star Wars His book reveals a striking relationship between the increasing political influence of speculative military fiction and the parallel rise of superpower states and their technocentric ideologies With its detailed political historical and literary analysis of U S and British fascination with hi tech

warfare this lively and revealing study will appeal to students literary and cultural scholars military and history enthusiasts and general readers **The Loom of God** Clifford A. Pickover, 2009 From the mysterious cult of Pythagoras to the awesome mechanics of Stonehenge to the gargoyles and fractals on today's computers mathematics has always been a powerful even divine force in the world In a lively intelligent synthesis of math mysticism and science fiction Clifford Pickover explains the eternal magic of numbers Taking a uniquely humorous approach he appoints readers Chief Historian of an intergalactic museum and sends them along with a quirky cast of characters hurtling through the ages to explore how individuals used numbers for such purposes as predicting the end of the world finding love and winning wars
