Bourne,2000-11 American Book Publishing Record ,2004 **England** Alan Edwin Day,1993 *Mothers, Midwives, and Reproductive Labor in Interwar and Wartime Britain* , Sandra Trudgen Dawson,2024-01-26 Mothers Midwives and Reproductive Labor in Interwar and Wartime Britain is about the experiences of mothers and midwives as they navigated the changing political and social issues surrounding childbirth and motherhood during interwar and wartime Britain The needs and agency of women as mothers and midwives often conflicted with the ideals of the state While government officials understood the importance of safe childbirth to the nation they also chose to allow economic crises and war preparation to take precedence The interwar plans for a national maternal healthcare system met financial constraints and a lack of political will As the outbreak of the Second World War appeared imminent politicians planned for pregnant women and those with small children to evacuate from cities The reception areas were less well planned and pregnant women returned to their homes rather than deliver among strangers

Wartime maternity provision didn't take into account the needs and desires of mothers and midwives. Reproductive laborers, mothers and midwives demonstrated agency throughout the period. Pregnant women chose to deliver at home with untrained or trained birth attendants; midwives entered and left the profession on their own terms, offering or withholding their skills when it suited individual need rather than at the behest of government. *Joseph Walshe* Aengus Nolan, 2008. A long overdue and fascinating examination of the career of Ireland's longest serving general secretary of Foreign Affairs. [A history of commerce](#) Clive Day, 2023-07-10. In *A History of Commerce*, Clive Day meticulously chronicles the evolution of trade from ancient times to the contemporary era, examining the intricate interplay between economic practices and societal developments. His literary style is both accessible and deeply analytical, weaving together historical facts with rich narratives that illuminate the significance of commerce in shaping civilizations. Through a careful selection of case studies, Day explores key themes such as the rise of mercantilism, the impact of the industrial revolution, and the globalization of markets, positioning commerce not merely as an economic activity but as a catalyst for cultural exchange and transformation. Clive Day, a scholar with a profound interest in economic history, draws from a well of knowledge garnered throughout his academic career. His background in both history and economics provides him with a unique lens through which he examines commerce, reflecting his belief that understanding economic pathways is essential to grasping the broader currents of human history. His passion for uncovering the underlying narratives of commerce likely stems from his desire to highlight its often overlooked implications in shaping human behavior and civilization. This book is highly recommended for readers keen on gaining a deeper understanding of how commerce has influenced not only the economy but also the social and cultural fabrics of societies. Its comprehensive scope and insightful analysis make it an invaluable resource for students, scholars, and anyone interested in the pivotal role that trade has played throughout history. In this enriched edition, we have carefully created added value for your reading experience. Hand-picked Memorable Quotes shine a spotlight on moments of literary brilliance. Europe and the British Geographical Imagination, 1760-1830 Paul Stock, 2019-10-03. *Europe and the British Geographical Imagination 1760-1830* explores what literate British people understood by the word Europe in the late eighteenth and early nineteenth centuries. Was Europe unified by shared religious heritage? Where were the edges of Europe? Was Europe primarily a commercial network, or were there common political practices too? Was Britain itself a European country? While intellectual history is concerned predominantly with prominent thinkers, Paul Stock traces the history of ideas in non-elite contexts, offering a detailed analysis of nearly 350 geographical reference works: textbooks, dictionaries, and encyclopaedias which were widely read by literate Britons of all classes and can reveal the formative ideas about Europe circulating in Britain: ideas about religion, the natural environment, race, and other theories of human difference, the state borders, the identification of the

centre and edges of Europe commerce and empire and ideas about the past progress and historical change By showing how these and other questions were discussed in eighteenth and nineteenth century British culture Europe and the British Geographical Imagination 1760 1830 provides a thorough and much needed historical analysis of Britain s enduringly complex intellectual relationship with Europe **Bulletin of the New York Public Library** New York Public Library,1921
