Macroeconomic Issues Of Recovery In Transition Economies:

Macroeconomic Issues of Recovery in Transition Economies Pál Gáspár, 1997 In this compilation of thirteen papers from a June 1995 conference held in Budapest specialists evaluate fiscal and monetary developments in contemporary Central and Eastern Europe excluding the former USSR which have served as microeconomic barriers to economic recovery Analyses center on broad issues of transition economics as well as specific case studies of the Hungarian Czech Austrian Polish and Slovenian experiences No index Distributed by ISBS Annotation copyrighted by Book News Inc Portland OR

The Balkans: Foreign Direct Investment and EU Accession Aristidis Bitzenis, 2016-03-23 The fall of communism and subsequent developments have put a renewed spotlight on the potential of the Balkan economies Bulgaria Albania Serbia Montenegro Romania and the Former Yugoslav Republic of Macedonia are countries which have attracted low levels of investment and poor political leadership in most of the countries has delayed much needed reforms However there are now signs of improvement and this timely book fills a significant gap in the available literature Demonstrating that these countries must engage as fully as possible with the world economy via EU accession this book explores the implications of the specific characteristics of these countries which have made the transition process more difficult This exciting new volume is valuable reading for students academics and business professionals interested in international development in the Balkans

Handbook of Research on Challenges in Public Economics in the Era of Globalization Akkaya, Şahin, Ergüder, Başak, 2022-03-18 Over time public goods services and policies have been developed for the welfare of people all over the world and public finance in particular focuses on challenging issues that are significantly important for the common good of humanity It is a plausible argument that public economics should be focused on dealing with new challenging issues such as global health crises global warming and internet architecture The Handbook of Research on Challenges in Public Economics in the Era of Globalization evaluates a variety of new challenging issues that have directly affected the world economy in terms of the economic units institutions and social life Covering topics such as democratic decentralization economic instability and global health issues this major reference work is a valuable resource for economists international business leaders government officials sociologists libraries researchers academicians educators and students *Economic Opening Up and Growth in Russia* Evgeny Gavrilenko, Paul J.J. Welfens, Ralf Wiegert, 2013-03-19 After a decade of sharp economic decline Russia switched to an impressive period of economic growth Yet the economic record is still mixed and many key problems remain unresolved both in the economic sphere and the political system The focus is on economic dynamics in Russia reasons for its hesitant opening up process as well as the special role of the natural resources sector which is expected to continue to grow This analysis highlights the existing deficiencies of the Russian economic system and raises doubts about the sustainability of growth Twin focus is on required reforms and endogenous forces that impair liberalizing trade and investment in an orderly way Russian discussions on WTO and other international topics are reflected

International Trade and Restructuring in Eastern Europe János Gács, 2013-11-11 János Gaes and Georg Winekler In recognition of the key position of international trade in the transition and the need for concentrated discussions of topical trade issues the International Institute for Applied Systems Analysis IIASA organized an international conference on International Trade and Restructuring in Eastern Europe which took place in Laxenburg Austria on 19 and 21 November 1992 The Austrian National Bank joined IIASA to co sponsor the event Participants of the conference were experts of international economics and trade policy from East and West policy makers and representatives of international organizations like the IMF the Commission of the European Communities the OECD and the European Bank for Reconstruction and Development EBRD The papers prepared for the event and the lively discussions during the conference itself prove that the topics are intellectually challenging and timely for policy makers It has widely been recognized that international economic relations play a crucial role in the transition of countries of Central and Eastern Europe The scope speed and success of the efforts to transform the formerly centrally planned economies to market economies have increasingly become dependent on the pattern these countries have in their relation to the rest of the world Transition comprises three major processes macro stabilization marketization and restructuring The success of these three hinges to a large extent on the response of these economies to the new conditions set by international trade and exchange regimes

Economic Dynamics in Transitional Economies Bruno Sergi, 2020-07-24 Learn more about the transitional economies of Central and Eastern Europe This book examines the economic dynamics of Central and Eastern European post Communist countries It illuminates the paths these countries are taking toward restructuring their markets increasing international trade and bettering their connections with the European Union and other countries Beginning with a comparative analysis of the three P governments Pigouvian Partisan and Paternalistic and continuing with a discussion of the interrelated political and economic difficulties of transition author Bruno Sergi proposes a surprising solution Inspired by the Bruxelles consensus he proposes that the European Commission should become a fourth P government replacing the role formerly played by the Washington consensus in the restructuring of post Communist economies *Economic Dynamics in Transitional Economies* also explores regional comparative macroeconomics the aftereffects of the Washington Consensus integration of Eastern and Western European economies interrelations between national and regional monetary activity political and economic policy reform involvement of European Union member countries We are living in historic times and *Economic Dynamics in Transitional Economies* will be a welcome guide to the rough roads ahead This thorough assessment of current political and economic realities will stimulate debate about new European paradigms the role of the European Union and the difficulties of post Communist transition These issues promise to be vital to the region's success in the new century

Lessons from the Economic Transition Salvatore Zecchini, 2013-12-01 An attentive reader embarking on this book might wonder what the economic transition to which the title refers might be In this century almost all countries have gone through periods of

economic transition but which period of economic history can claim to embody the notion or to represent the era of the transition Definitely no country or group of countries has experienced anything comparable to the economic upheavals that the fall of communism has brought about in a large portion of the world in just three years 1989 to 1991 No other transition to date has prompted more interest and more studies among economists academics and policy makers than has the transformation of centrally planned economies into market based systems It is this transformation that has come to define the transition Early in the transformation process in November 1990 with the support of the Centre for Co operation with the Economies in Transition CCET I launched a conference to examine the challenges faced by these countries About six years have gone by and a new economic landscape has emerged in that part of the world The difficulties in transforming these economies have exceeded all expectations and economic performances have varied considerably across countries The time has come therefore to make a first evaluation of progress and problems with a view to extracting useful policy lessons to guide policy makers in successfully completing the transition in the near future

New Approaches to Economic Challenges A Systemic Recovery OECD,2022-10-26 New economic thinking and acting through a systemic approach could outline policy alternatives to tackle the global scale systemic challenges of financial economic social and environmental emergencies and help steer our recovery out of the current crisis A systemic recovery requires an economic approach that balances several factors markets and states efficiency and resilience growth and sustainability national and global stability short term emergency measures and long term structural change

Globalization Ashish Vaidya,2005-12-19 This work is a comprehensive collection of cutting edge scholarship on the economic international business political legal and environmental ramifications of globalization one of the hottest topics of the day International trade is as old as nations During the last five decades however advances in technology and transportation have changed the scope and method of international trade Disputes rage about the effects of these changes advocates for different positions offer argument but little factual or theoretical analysis Globalization offers all the information readers need to sort out the arguments Written with the highest degree of scholarship intended for college students or working professionals the encyclopedia provides both introductory material to broad economic legal political and environmental theory and in depth analysis of how theory interacts with practice in the framework of global trade A trader in New York can in a matter of seconds execute a billion dollar currency transaction in Hong Kong What does this transaction mean to New Yorkers to residents of Hong Kong and to the rest of the world This book gives readers the tools to answer those questions

Regional Economic Issues--Special Report 25 Years of Transition Mr.James Roaf,Mr.Ruben Atoyan,Mr.Bikas Joshi,Mr.Krzysztof Krogulski,2014-10-17 The past 25 years have seen a dramatic transformation in Europe s former communist countries resulting in their reintegration with the global economy and in most cases major improvements in living standards But the task of building full market economies has been difficult and protracted Liberalization of trade and prices came quickly but institutional reforms such as governance

reform competition policy privatization and enterprise restructuring often faced opposition from vested interests The results of the first years of transition were uneven All countries suffered high inflation and major recessions as prices were freed and old economic linkages broke down But the scale of output losses and the time taken for growth to return and inflation to be brought under control varied widely Initial conditions and external factors played a role but policies were critical too Countries that undertook more front loaded and bold reforms were rewarded with faster recovery and income convergence Others were more vulnerable to the crises that swept the region in the wake of the 1997 Asia crisis *Yearbook of the United Nations, Volume 48 (1994)* United Nations,2023-09-29 Fully indexed the 1994 edition of the Yearbook is the single most current comprehensive and authoritative reference publication about the work of the United Nations other international organizations and related bodies The book is designed not just for use by diplomats officials and scholars but also by other researchers writers journalists teachers and students The year 1994 was a remarkably eventful one for the United Nations and in the conduct of international relations This volume of the Yearbook details the activities of the United Nations its many organs agencies and programmes working together to rekindle a new form of multilateral cooperation for a better world It records the diverse and globe encompassing activities of the United Nations and its enduring efforts to deal with the world s pressing concerns particularly matters of international peace and security disarmament human rights the settlement of regional conflicts economic and social development the preservation of the environment control of drugs and narcotic substance abuse crime prevention adequate shelter youth and the ageing and humanitarian assistance for refugees as well as disaster relief [The Cumulative Book Index](#) ,1998 A world list of books in the English language **The Economies of South Eastern Europe** C. Papazoglou,2005-05-04 This book provides a comprehensive analysis of the main factors that affected the course of the countries of South Eastern Europe during transition contributing as a result to their disappointing economic performance Thus the role of initial conditions and issues concerning the effectiveness of macroeconomic stabilization and structural reforms are at the centre of the analysis Furthermore this volume focuses on developments and issues concerning international trade patterns foreign direct investment and the impact of the Euro on the exchange rate policies of the countries in the region [Euro Adoption in Slovenia and Other New EU Member States](#) Vladimir Lavrač,2008 [Reform and Recovery in East Asia](#) Peter Drysdale,2003-09-02 This exciting sequel to East Asia in Crisis offers a completely up to date assessment of the progress of East Asian recovery and provides a detailed review of the experience of the region s economies *OECD Economic Outlook, Volume 2002 Issue 2* OECD,2002-12-24 Twice a year the OECD Economic Outlook analyses the major trends that will mark the next two years This issue s special features cover the deterioration of budgetary positions in most countries labour force participation of older workers product market competition reforms and inflation *From Conflict to Recovery in Africa* Tony Addison,2003-02-13 Revitalizing private sectors 4 Transforming states Conclusions For a list of contributions go to the full text area of this record *Good Governance in*

Central and Eastern Europe Herman Willem Hoen, 2001-01-01 Undeniably Good Governance in Central and Eastern Europe provides many insights in the political economy of institutional reform and constitutes an important contribution to the growing literature on second generation reforms Carlos Santiso Democratization The implementation of a democratic order embedded in a market economy environment has proved immensely difficult Furthermore this process is subject to tremendous variety within Central and Eastern Europe Ten years after the collapse of communism it was apparent that only Poland and Slovenia surpassed their 1989 levels of GDP This book scrutinises the arrangements to enforce good governance in this area both by means of external help and domestic political leadership From the popular assumption that transformation is a collective good it follows that the problem of free riding has to be faced Consequently there is a danger that transformation may never be completed This book empirically tests the relationship between economic performance and good governance focusing upon voluntary coercion as a means to prevent free riding behaviour The author examines the role of international organisations and discusses elite formation as an important element of good governance something often ignored in the economic analysis of economic performance
