Macroeconomic Management:

Macroeconomic Management and Fiscal Decentralization Jayanta Roy, 1995-01-01 Suggests guidelines by which developing countries can successfully manage the rapid surge in government revenues that occurs during a commodity boom The book addresses the problems associated with such booms including long term spending commitments Dutch disease and a slowdown in diversification **Macroeconomic Management When Policy Space is Constrained** Vitor

Gaspar, Mr. Maurice Obstfeld, Ms. Ratna Sahay, Mr. Douglas Laxton, Mr. Dennis P Botman, Kevin Clinton, Mr. Romain A Duval, Kotaro Ishi, Zoltan Jakab, Laura Jaramillo, Mr. Constant A Lonkeng Ngouana, Mr. Tommaso Mancini Griffoli, Mr. Joannes Mongardini, Susanna Mursula, Erlend Nier, Ms. Yulia Ustyugova, Hou Wang, Mr. Oliver Wuensch, 2016-09-28 The recovery in GDP growth since the global financial crisis has been halting and weak Concern is widespread that countercyclical policies have run out of space or lack the power to raise growth or deal with the next negative shock This note argues that room exists for effective policies and that it should be used if appropriate The most promising route involves a comprehensive consistent and coordinated approach to policy making Comprehensive policy actions within a country exploit synergies making the whole greater than the sum of parts Consistent policy frameworks anchor long term expectations while allowing decisive short to medium term accommodation whenever necessary Coordinated policies across major economies amplify the helpful effects of individual policy actions through positive cross border spillovers The findings of this paper indicate that policy coordination adds particular value if the current approach falls short of reviving growth or in the event of a further downward shock *Macroeconomic Management* Mohsin S. Macroeconomics and Human Development Deepak Nayyar, 2015-07-16 In the conventional discourse on macroeconomics the subject of human development is at best marginal and at worst irrelevant In the unconventional discourse on human development macroeconomics or its constraints are seldom recognised even if its consequences are often highlighted There are however intersections and interconnections which provide the rationale for this book that seeks to map some broad contours of an unexplored yet important domain Macroeconomics is important for human development because it determines levels of employment the degree of social protection and the public provision of services such as healthcare or education Human development has implications and consequences for macroeconomics for it can mobilize or claim resources to enlarge or diminish space for macroeconomic policies The relationship exists and matters not only in poor countries but also in wealthy ones Employment even if neglected provides the critical link This book shows that causation runs in both directions and can be either positive or negative It reveals similarities and differences between developing countries and industrialised countries The political context is significant everywhere as interests ideology and institutions influence economic policies in both spheres to shape outcomes This book was originally published as a special issue of the Journal of Human Development and Capabilities

People's Republic of China International Monetary Fund. Asia and Pacific Dept,2024-02-02 China has enjoyed decades of impressive growth which has significantly improved living standards and largely eradicated extreme poverty The growth has however been accompanied by widening imbalances and rising vulnerabilities as excessive investment in infrastructure and housing has resulted in rising debt levels among property developers local governments LG and local government financing vehicles LGFVs The authorities have proactively sought to contain developer leverage This has contributed to a significant but needed adjustment in the property market that continues to weigh on economic activity including through its impact on LG finances Amid these structural challenges the authorities have appropriately announced their goal to transition to high quality growth while tackling risks from the property sector and LG debt

People's Republic of China: 2021 Article IV Consultation-Press Release; Staff Report; and Statement by the Executive Director for the People's Republic of China International Monetary Fund. Asia and Pacific Dept,2022-01-28 China s recovery is well advanced but it lacks balance and momentum has slowed reflecting the rapid withdrawal of fiscal support lagging consumption amid recurrent COVID 19 outbreaks despite a successful vaccination campaign and slowing real estate investment following policy efforts to reduce leverage in the property sector Regulatory measures targeting the technology sector intended to enhance competition consumer privacy and data governance have increased policy uncertainty China s climate strategy has begun to take shape with the release of detailed action plans Productivity growth is declining as decoupling pressures are increasing while a stalling of key structural reforms and rebalancing are delaying the transition to high quality balanced inclusive and green growth

People's Republic of China International Monetary Fund. Asia and Pacific Dept,2023-02-03 Following an impressive recovery from the initial impact of the pandemic China s growth has slowed significantly in 2022 It remains under pressure as more transmissible variants have led to

recurring outbreaks that have dampened mobility the real estate crisis remains unresolved and global demand has slowed Macroeconomic policies have been eased appropriately but their effectiveness has been diminished by a focus on enterprises and increasingly less effective traditional infrastructure investment rather than support to households The pandemic and its impacts have also been a setback to economic rebalancing toward private consumption and to reducing greenhouse gas emissions A slowdown in growth enhancing reforms against the backdrop of increasing geoeconomic fragmentation pressures stand in the way of a much needed lift to productivity growth weighing on China's medium term growth potential
