**Macroeconomic Reform in China** Jiwei Lou, 1997-01-01 China is in the throes of two transitions from a command economy to a market based one and from a rural agricultural society to an urban industrial one So far both transitions have been spectacularly successful China is the fastest growing economy in the world with per capita incomes more than quadrupling since 1978 achieving in two generations what took other countries centuries Although swift growth and structural change have resolved many problems they also have created new challenges employment insecurity growing inequality stubborn poverty mounting environmental pressures rising costs of food self sufficiency and periods of macroeconomic instability stemming from incomplete reforms Unmet these challenges could undermine the sustainability of growth and Chinas promise could fade China 2020 a seven volume set examines China s recent history where it is today and the path it should follow during the first two decades of the 21st century The volume in the set entitled Clear Water Blue Skies Chinas Environment in the New Century explores the relationship between economic growth and the environment Chapters review the harmful effects of all forms of pollution and discuss ways of securing higher environmental living standards Particular attention is given to urban areas and the impact of pollution on health conditions *The Logic of Economic Reform in China* Xiaojing Zhang, Xin Chang, 2015-11-19 This book provides a historical overview of Chinese economic reform over the past 30 years From the genesis of the reform to the gradual improvement of the market system and then to the re start of the critical stage of the reform this book includes not only research on the reform process but also detailed descriptions of the key areas of reform since the Third Plenary Session of the 18th CPC Central Committee On this basis the author develops six logics for Chinese economic reform Firstly reform is cyclical moving between rapid advances and deadlock this calls upon us to re examine the common view of reform Secondly reform is systematic it cannot succeed without supporting reforms in other fields Thirdly the relationship between reform development and stability should be properly handled This trinity is quite different from the perspective of western mainstream theory which puts too much emphasis on efficiency Fourthly the success of Chinese reform was not achieved by chance The reform practice is based on the theoretical logic and also goes beyond the debate between progressive and radical modes Fifthly the Top level Design should be combined with crossing the river by moving from stone to stone i e the theoretical basis of reform should be combined with reform practice Sixthly and lastly the ongoing reform in China must be understood in the contexts of global competition and reform competition **Studies on Economic Reforms and Development in China** Siwei Cheng, 2001 In Studies in Economic Reform renowned and influential Chinese scholar and politician Siwei Cheng outlines his theories for bringing economic reform to China in the context of the increasingly global economy **Economic Reform in China** Wanda Tseng, 1994-09-15 Exchange and trade system reforms Monetary policy and financial sector reforms Fiscal system reforms Investment system reform State enterprise reform **Two Decades Of Reform In China** Shangquan

**from China's Forty Years of Reform and Opening-up** David Daokui Li,2021-03-26 This book first shows that the past 40 years of China s economic reform and opening up represents the greatest magnitude of economic growth in history Based on field trips extensive and intensive interviews and literature surveys this book argues that there are five general lessons for a rapid growing economy from China s economic reform and opening up all in the area of the relationship between the government and the economy First the local governments need to be incentivized to help rapid entry and development of enterprises Second local governments need to be incentivized to help rapid land conversion from agricultural to non agricultural Third financial deepening is vital that is inducing households to hold more and more financial assets in local currency Financial deepening is essential to convert savings into investments This requires financial stability which is crucial Fourth the learning through opening up is the key to endogenous economic growth The fundamental benefit of opening up is learning rather than enjoying comparative advantage The fifth and final lesson from China is that the central government must proactively manage the macroeconomy The rationale is that enterprises compete with each other in games of industrial organization In order to resolve this problem proactive measures including market oriented means administrative orders and reform measures should be implemented Overall the main lesson from China s past 40 years of reform and opening up is that proper incentives and behavior of the government local and central are important for economic growth China has been conducting reforms in this regard and as a result the government more or less has been playing the role of a helping hand regarding economic growth although China s economic system is far from perfect and many reforms are still needed

China's Economic Reform Raphael Shen,2000-02-28 Both Mao Zedong and Deng Xiaoping drastically altered the course of contemporary China s economic development using opposing strategies Mao froze China s economic system in a perennial

state of consumer goods shortages and pervasive macro disequilibria Deng however began thawing a rigidly structured system by introducing experimental reform measures Mao s revolutionary rhetoric brought China s economy to the brink of bankruptcy Deng s ideological pragmatism netted China glowing successes Mao closed China to the outside world Deng engineered China s reintegration into the world economy Dismantling a dysfunctional system and replacing it with a dynamic new one involving 1.2 billion people is risk laden Reform in China began in 1978 It was tentative and experimental confining reform to organizational and administrative decentralization on farms Successes on farms ushered in reform elsewhere in the economy Over time market based coordinating mechanisms progressively began replacing the system s control devices Results from decentralization internally reinforced those from liberalization externally This consequently transformed China s stale distorted system into a more competitive bustling new one ready for developmental takeoff Its meteoric rise among the world s leading markets in recent years has thrust China s economy to the forefront of growth and development Controlled phased reform is yielding dividends not only for its own consumers but for international economic cooperation and growth as well

**The State Strikes Back** Nicholas R. Lardy,2019-01-01 China s extraordinarily rapid economic growth since 1978 driven by market oriented reforms has set world records and continued unabated despite predictions of an inevitable slowdown In *The State Strikes Back: The End of Economic Reform in China* renowned China scholar Nicholas R Lardy argues that China s future growth prospects could be equally bright but are shadowed by the specter of resurgent state dominance which has begun to diminish the vital role of the market and private firms in China s economy Lardy s book arrives in timely fashion as a sequel to his pathbreaking *Markets over Mao: The Rise of Private Business in China* published by PIIE in 2014 This book mobilizes new data to trace how President Xi Jinping has consistently championed state owned or controlled enterprises encouraging local political leaders and financial institutions to prop up ailing underperforming companies that are a drag on China s potential As with his previous book Lardy s perspective departs from conventional wisdom especially in its contention that China could achieve a high growth rate for the next two decades if it reverses course and returns to the path of market oriented reforms

*An Essay on Economic Reforms and Social Change in China* Assar Lindbeck, 2006 Abstract The author applies a systems oriented holistic approach to China's radical economic reforms during the past quarter of a century He characterizes China's economic reforms in terms of a multidimensional classification of economic systems When looking at the economic consequences of China's change of economic system he deals with both the impressive growth performance and its economic costs The author also studies the consequences of the economic reforms for the previous social arrangements in the country which were tied to individual work units agriculture communes collective firms and state owned enterprises He continues with the social development during the reform period reflecting a complex mix of social advances mainly in terms of poverty reduction and regresses for large population groups in terms of income security and human services such as education and in particular health care Next the author discusses China's future policy

options in the social field whereby he draws heavily on relevant experiences in industrial countries over the years. The future options are classified into three broad categories: policies influencing the level and distribution of factor income; income transfers including social insurance and the provision of human services. *Economic Reform in China and India* C. H. Chai, K. C. Roy, 2006-01-01. The authors have produced an outstanding book on economic reforms in China and India. This book is a wealth of information on this crucial issue, thus filling this important gap in the literature on economic reform and also adding more knowledge to the literature on the history of economic development processes in China and India. This book will be of interest to both scholars of the economic reforms and those more generally interested in the social political changes occurring there. Tulus Tambunan. *Journal of Asian Business Economists*. Chai and Roy have produced a well written, properly documented study of the comparative development of India and China over the last 50 years. The book will be useful to graduate students in Asian studies and economic development. Policy makers in other developing countries can also benefit from this account of the experiences of two major emerging economies under different economic and political systems. Recommended Graduate research and professional collections. J S Uppal. Choice. Recent acceleration of the Indian economic growth rate from 6 to 8 per cent has sparked worldwide speculation that India is about to catch up with China and become another Asian miracle economy. *Economic Reform in China and India* examines this prospect, reviewing the development strategies pursued by the two countries over the last 50 years in general and exploring recently introduced reform measures in particular. The culmination of many years of research by specialists in these economies, this book assesses the performance of China and India at both macro and sectoral levels, including economic, social, political and environmental aspects. It illustrates the reasons why China has outperformed India in the past and identifies the obstacles that India will face in its attempts to catch up with China. Providing solutions for China and India that can be applied to other developing countries, this book will be invaluable for researchers, academics and students focussing on economic development and Asian studies. It will also receive much attention from investors and government analysts interested in the strategic implications of the emergence of the two Asian economic giants. **Dilemmas of Reform in China** Joseph Fewsmith, 1994. In this volume, distinguished Chinese and Western scholars provide a detailed examination of the problems associated with China's transition to a market oriented system. A variety of reform proposals aimed at resolving the contradictions inherent in piecemeal reform are discussed, along with the chances for future liberalization. These clearly written and insightful essays address the roots of China's crisis. The authors focus on institutional changes necessary for a spontaneous market order and point to the close relation between economic reform and political constitutional reform. Topics include the speed and degree of the transition, whether ownership reform

must precede price reform how inflation can be avoided steps to depoliticize economic life how to create an environment conducive to foreign trade and investment and how to institute basic constitutional change and open China to the outside world The revolutionary changes now shaking the foundations of socialism and central planning in the Soviet Union and Eastern and Central Europe are sure to have an impact on China's future Despite their seriousness the events of Tiananmen Square may constitute only a temporary detour on the road toward a private market order The essays in this volume help lay a rational framework for understanding China's present problems and for discussing the prospects for future reform

*The Political Logic of Economic Reform in China* Susan L. Shirk, 1993-07-15 In the past decade China was able to carry out economic reform without political reform while the Soviet Union attempted the opposite strategy How did China succeed at economic market reform without changing communist rule Susan Shirk shows that Chinese communist political institutions are more flexible and less centralized than their Soviet counterparts were Shirk pioneers a rational choice institutional approach to analyze policy making in a non democratic authoritarian country and to explain the history of Chinese market reforms from 1979 to the present Drawing on extensive interviews with high level Chinese officials she pieces together detailed histories of economic reform policy decisions and shows how the political logic of Chinese communist institutions shaped those decisions Combining theoretical ambition with the flavor of on the ground policy making in Beijing this book is a major contribution to the study of reform in China and other communist countries
